1960 yılında Kürkçüoğlu Egzoz olarak başladı egzoz serüvenimiz. 2018 yılında PTM Makine olarak güncellenen firmamız 2011 yılından bugüne DPF Dizel Partikül Filtresi Temizleme Makinesi üretimi konusunda uzmanlaşmıştır. Aynı zamanda bulunduğumuz bölgede DPF Temizleme hizmetini de sunarak bitmeyen bir AR-GE ile makinemizi geliştirdik. Bu sayede teknik bilgisini de sürekli güncelleyen firmamız tüm müşterilerine 7/24 teknik bilgi desteği sunma avantajı elde etmiştir. Bugün 16 ülkede ülkemizi temsil etmenin mutluluğu ile yolumuza devam etmekteyiz.

İlk günden bugüne değişmeyen tek kuralımız;

Müşteri Memnuniyetidir.

Our exhaust adventure started in 1960 with the name of Kürkçüoğlu Exhaust. Our company, which was updated as PTM Makine in 2018, has specialized in the production of DPF Diesel Particulate Filter Cleaning Machine since 2011. At the same time, we have developed our machine with an endless R&D by offering DPF Cleaning service in our region. In this way, our company, which constantly updates its technical information, has gained the advantage of providing 24/7 technical information support to all its customers. Today, we continue on our way with the happiness of representing our company in 16 countries.

Our only rule that has not changed since the first day;

Customer Satisfaction

Sertifikalarımız / Our Certificates

IF YOU USE DIESEL VEHICLES, YOU MUST KNOW THESE!

DPF

Dizel Partikül Filtresi

We recommend
DPF Cleaning at
both oil changes for
fuel economy and
good engine
performance!

What is a DPF Particulate Filter?

The Diesel Particulate Filter is a part in the exhaust system that is designed to reduce emissions of Hydrocarbons (HC), Carbon Monoxide (CO) and collects particles from engine gases to minimize the release of particles into the air. Soot Particles accumulate within the DPF channels and are regularly incinerated to prevent the filter from clogging. This process is called Regeneration. Because regeneration is not possible, in case of clogging, cleaning or high-cost replacement parts are required.

Why Is It Clogged?

- Faults in the EGR Valve
- Using the Wrong Engine Oil
- Faults in Turbo
- Using of Low Quality Fuel
- Long Time Driving at Low Speed and in Stop-and-go Traffic

What are the Symptoms?

- DPF Fault Lamp On Dashboard
- Loss of Power of The Vehicle
- Increased Fuel Consumption
- Increased Idle Speed
- Continuous operation of The Fan
- Continuous Black Smoke

If the Diesel Particulate Filter and the engine fault lamp come on at the same time, more serious problems may have occurred. In order to solve these faults, the "Diesel Particulate Filter" must be cleaned or a new one must be installed at high cost.

DPF CLEANING WITH PTM4019

PTM4019 DPF SMART, with many years of experience and successful results in **thousands of vehicles**, cleans particles close to 100% without making any changes to the original system of the vehicle, even if it is completely clogged, and ensures that the vehicle **returns to full performance for a long time**.

AFTER DPF CLEANING PROCESS

Recovered

- Engine Performance
- Fuel Economy
- High Engine Power
- Extended Engine Life
- Exhaust Emission Rates

PTM4019, UNIQUE AND FINAL SOLUTION FOR ALL DIESEL VEHICLES

PTM4019 DPF SMART PLUS is our 7th generation new machine, which is the result of more than 14 years of machine production. We are stronger now with a more practical, more advanced and smarter machine. With the PTM4019 DPF SMART PLUS, cleaning of all automobiles and heavy-duty vehicles can be done in a short time with full success.

PTM4019 DPF SMART PLUS

DPF Cleaning Section of Large Vehicles Such as Buses, Trucks, Construction Machines

With 10" Touch Screen Easy Operation

Occupancy Test Measurement and Printout

Contaminated Waste Control with Intelligent Filtering System

All Processes and Controls in 7 different languages. Turkish, German, English, Italian, French, Russian, Dutch

Environmentally friendly use with PTM4019 DPF ECO without waste water in DPF Cleaning system

Dimensions
Width: 165cm, Height: 240cm,
Depth: 100cm, Weight: 480Kg.

Easy Portable Ergonomic Design

✓ **We Do Not Use Hot Water**
We do not need water heating, we save both electricity and time. Cleaning starts after the opening of our machine.

✓ **We Do Not Use Acid Based Chemical**
Nano Technology, our special cleaning liquid with solvent feature provides fast and complete dissolution. It does not harm ceramic.

✓ **We do not Damage to DPF**
After cleaning close to 100%, we do protect the normal functioning of the DPF.

We Do Not Use Hot Water

Since we do not need water heating, we save both electricity and time. Our machine is ready to clean after opening.

We Do Not Use Acid-Based Chemicals

Our Special Cleaning Fluid, which has nanotechnology, solvent feature, provides fast and complete dissolution. It does not damage ceramics and precious metals.

We Do Not Damage DPF

DPF continues to work normally, although it cleans almost 100% after the cleaning process. After cleaning, the vehicle runs for a long time without malfunction as if a new DPF was installed.

100% Result, 100% Guarantee with PTM4019 and Nano Technology Cleaning Fluid

► PTM4019 - Machines Setup

Install the liquid loading motor in the cleaning liquid bottle.

Place the canister at the bottom of the machine and mount the hose and cable coming out of the canister to the cleaning fluid inlet and the 12V inlet.

Install one end of the water hose to the water inlet behind the machine and the other end to the mains tap.

The installation is complete after installing the air hose to the air inlet behind machine and plugging the machine socket.

Air pressure is between 5 and 10 bar, water pressure is between 3 and 10 bar. A minimum 50L compressor is sufficient at air pressure.

► PTM Machines Special Cleaning Liquid

PTM4019 Special Cleaning Liquid is produced by **Nano Technology** and it enables the particles which clogging by the penetration to the channels being smaller than 1mm of particle filter do **dissolve in a ratio around %100**. There is no interference in the particle filter which is installed on the machine without damaging the original system and the cleaning liquid does **not have any harmful effects** to the filter, which may occur in future.

PTM DPF Cleaning Machines is designed to work **coordinately** with this special cleaning liquid and **can not be used with different cleaning materials**. You can safely obtain the special cleaning liquid at any time from our firm under appropriate conditions.

► PTM Machines Error Messages

! Liquid Level Falls

- Message indicating that the cleaning fluid has decreased

! Liquid Pressure Low

- Message indicating that the electric jack from the cleaning fluid canister has disappeared

! Liquid Completed Liquid Dispensing

- Cleaning fluid is required. The machine will not start without cleaning fluid.

! Air Pressure Low

- Message that appears when the air pressure is below the 4.5 bar or when there is no air pressure

! Water Pressure Low

- Message below the 2,5 bar indicating that the water pressure is off.

With PTM DPF Cleaning Machines, You Will Find The Definitive Solution of DPF Failures!
