

## Infopro Digital Automotive Unveils Enhanced Atelio Data: Setting New Standards for Workshop Efficiency

*Infopro Digital Automotive launches an enhanced version of Atelio Data, designed to boost workshop efficiency with advanced features like precise vehicle identification and integrated OEM data.*

*The Atelio Data update empowers workshops to navigate the complexities of the modern automotive landscape, delivering faster diagnostics, streamlined repairs, and unmatched accuracy to elevate service quality and customer satisfaction*

**Frankfurt – 8 September 2024**

Infopro Digital Automotive, a leading global provider of data and software solutions for the automotive aftermarket, announces the launch of the new and improved version of Atelio Data, its flagship software dedicated to repair and maintenance in workshops.

Atelio Data has been a vital tool for workshops, offering online methods and data solutions that cater to daily operational needs. The software allows for rapid data retrieval, significantly improving workshop productivity. It provides precise and unlimited vehicle identification (up to 90 criteria), fully integrated documentary assistance, task-based repair manuals, a powerful search engine, and a complete history of vehicle searches and maintenance tasks performed.

With 99% coverage of vehicles on the road, encompassing 77 makes, Atelio Data ensures technicians can access the information they need no matter the car brand or model. With more than 500,000 wiring diagrams and over 3 million repair manuals at their fingertips, workshops can tackle any repair with confidence and speed. The guided diagnostic module further supports over 5,000 components, ensuring repairers have the necessary data for accurate troubleshooting.

As the number of vehicle brands and models continues to grow, the challenge of accessing relevant data quickly becomes increasingly significant. The new version of Atelio Data introduces substantial improvements, making it easier for workshops to access vehicle data effortlessly.

**This update allows workshops to:**

- **Accelerate and gain access to Simplified Diagnostics:** Enhance performance with faster diagnostics.
- **Speed up Repair Management:** Streamline repair processes for quicker turnaround.

- **Enhance Professionalism:** Utilizing OEM data for improved accuracy and reliability.

#### **New Features and Enhancements:**

- **Responsive and Customizable Software:** Tailored for both beginners and experts to enhance usability.
- **On-Demand Documentary Assistance:** Immediate access to documentation, especially for unusual searches and data.
- **Highly Performant Search Engine:** Efficiently organized data for quicker and more effective retrieval.
- **Integration of OEM Part References:** Ensuring the use of accurate parts information.
- **Enhanced User Feedback Mechanism:** Allowing continuous improvement based on user input.
- **Highly Accurate and Unlimited Vehicle Identification:** Offering precision with up to 90 criteria.
- **Diagnostic Platform with Assistant:** Comprehensive support for diagnostic procedures.
- **Extensive Electronic Content:** Includes wiring diagrams, component locations, fuses, and relays.

With this extensive coverage and depth of content, Atelio Data continues to set the standard for workshop tools, empowering technicians to handle a wide array of repair tasks swiftly and with confidence. The new version of Atelio Data is designed to address the evolving needs of the automotive aftermarket, equipping workshops with the tools they need to boost productivity, minimize downtime, and enhance overall service quality. Infopro Digital Automotive continues to invest in Atelio Data's evolution, with plans for additional features and expanded data coverage in future updates, ensuring workshops remain equipped to meet the demands of the rapidly changing automotive industry.

#### **About Infopro Digital Automotive**

*Infopro Digital Automotive is the automotive division of the larger group Infopro Digital. With over 70 years of experience and nearly 900 employees in 11 countries, we develop digital tools and software dedicated to the performance of decision-makers in the various sectors of the automotive industry. Our services benefit various automotive stakeholders, including car manufacturers, aftermarket parts producers, distributors, and workshops. Our brands: ETAI, HaynesPro, OATS, Inovaxo, Autronica, ETAI Ibérica, IsiCondal, Caroline, Haynes, DriveRightData*
