TECHNOLOGIE **DE LA VIGIE**

HIGH PERFORMANCE DETERGENTS

MADE IN FRANCE

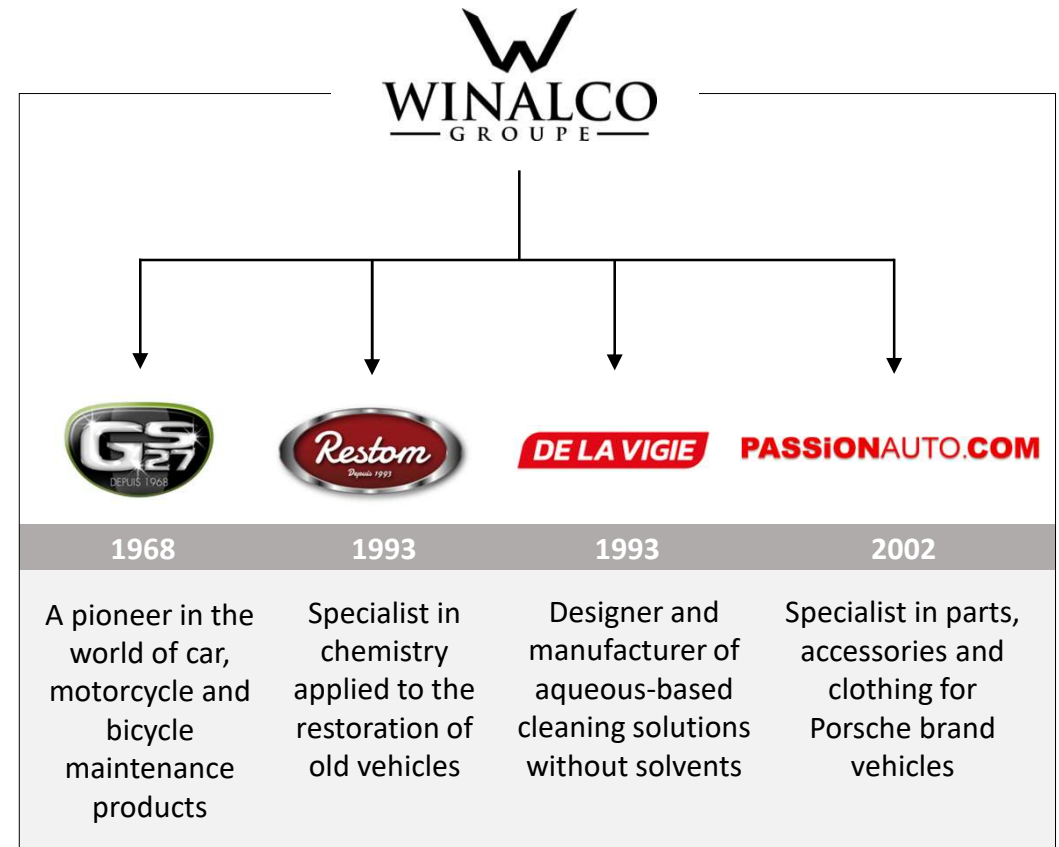

A WINALCO GROUP COMPANY

A common passion

Winalco is a family group driven since its creation by a passion for automobiles.

Specializing in the restoration, maintenance and beautification of all types of vehicles, the group's companies are linked by common expertise combining know-how and innovation to offer their customers quality products, made in France.

In 2024, Winalco will bring together around fifty employees spread across 4 entities: GS27, Restom, De La Vigie and Passion Auto.

DE LA VIGIE

Designer and manufacturer of cleaning solutions

The DE LA VIGIE company specializes in the research and manufacture of very high quality detergent products for various market segments, including industry, communities and individuals.

Since its creation in 1993, the company has been committed to providing products that meet the specifications of the most demanding customers.

Its flagship product, ABNET UNIVERSEL, is a multi-purpose cleaning product with a very broad spectrum of applications. Versatile, it is used in many areas thanks to its effectiveness and reputation.

Thanks to its integrated laboratory, DLV knows how to meet specific formulation (Ecocert, Food Contact, etc.) and presentation requirements.

DLV has a semi-automated manufacturing tool and 4 modern packaging lines, ranging from 250ml to 1000 liter IBC.

DLV offers several packaging solutions such as in-line labeling, filling of flexible bags (doypack) and sleeving of products (sleeve installation).

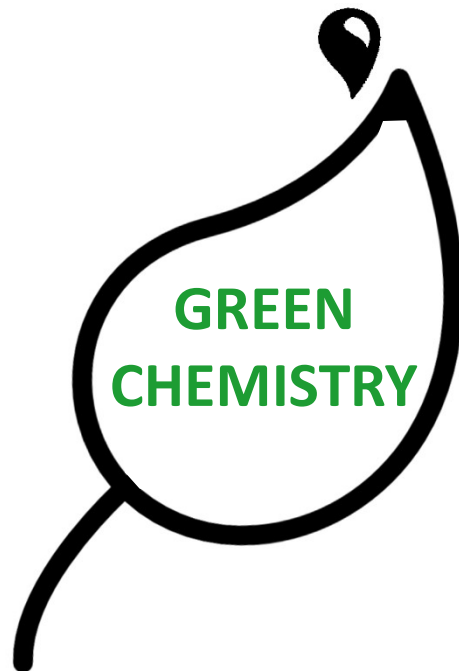

REMPLISSAGE ET ÉTIQUETAGE DE LA GAMME DE PRODUITS D'ENTRETIEN ECOCERT GS27 VÉLO.

DE LA VIGIE

CSR and Green Chemistry approach

DE LA VIGIE is considered today a pioneer in the field of green chemistry and integrates a strong CSR plan into its development.

DLV develops ECOCERT certified formulas meeting numerous environmental standards.

Member of the Association Chimie Du Végétal which brings together industrialists aware of the environmental challenges represented by chemistry based on plant resources as alternatives to fossil raw materials (oil, gas, coal).

Development of highly concentrated products which allow the reduction of packaging and therefore, the weight transported.

A French manufacturer since 1993, DLV is committed to strong local roots and selects its suppliers mainly in France.

DE LA VIGIE

Designer and manufacturer of cleaning solutions

The company produces high-performance detergents intended for the most demanding users (professionals and the general public).

**RENOMMÉE
INTERNATIONALE**

**3 GAMMES DE
PRODUITS**

Custom manufacturing and packaging for numerous international brands marketed in areas such as industry, automobiles, boating, etc.

DLV offers, through 3 ranges, a response adapted to various specific problems and applications, ranging from consumer products to products dedicated to industry.

RANGE**

INNOVATIVE RANGE

Eco-designed products

Today, the need to produce and consume more responsibly has become a major challenge in contemporary demands. De La Vigie knows how to meet these needs with the range of detergent products “Softer.”

- ✓ Eco-designed cleaning products: plant-based surface agents, phosphate-free formula, etc.
- ✓ Which meet current environmental needs
- ✓ Approved for food contact

ABNET SOFTER

ABNET PROFLASH
SOFTER

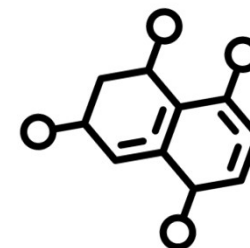

ABNET SOFTER

**ABNET PROFLASH
SOFTER**

Abnet Softer is a multi-surface degreaser cleaner applicable to metals, plastic, wood, leather, glass, etc.

Dilution between 1 and 20%
of product in water

Ready to Use

MULTI-PURPOSE RANGE

Professional, Reinforced and TX

Through 3 products, DE LA VIGIE responds with the versatility of solutions and application methods to multiple cleaning problems.

ABNET PROFESSIONAL

ABNET PROFLASH

Historical reference of the range. Ultra versatile product, ideal for cleaning vehicles. Can also be applied to windows, fabrics and carpets.

Dilution between 1 and 20% of product in water

Ready to use

ABNET REINFORCED (R)

Initially developed to carry out the “dewaxing” of new vehicles. Ideal in the treatment of graffitied or polymerized greases and for the treatment of adhesives.

Dilution between 10 and 20% of the product in water

ABNET TX

Originally developed to deal with complex contamination within the rail sector. Ideal for degreasing all types of surfaces. Leaves a shiny film on metal surfaces after washing.

Dilution between 5 and 20% of the product in water

SPECIALIST RANGE

A need, an answer

The Specialist range responds with each of its references to a specific use.

Special Rims

Treats contamination found on vehicle rims such as brake dust and road film.

Shampoo Scrubber

In a percentage of between 3 and 5%, this product meets the constraints of using a scrubber dryer.

Shampoo Contact

Designed for washing vehicle bodies, it adds shine and prolongs the effects of washing over time.

Non Foaming

Limits the generation of foam, formulated for industrial processes: ultrasonic cleaning, degreasing tank, washing tunnel, etc.
