About US

Since 1993, Restom® has been the **French specialist** in applied chemistry for the restoration of old vehicles.

We are characterised by our **French manufacturing and our quality**.

Like you, we are true enthusiasts. Preserving our heritage is a mission that is near and dear to our hearts.

We are always ready and willing to meet our customers' needs, and we continuously seek out new products to ensure that any restoration project will be a success.

Our modest size makes us accessible to our customers. Our chemists are available to share their **technical solutions and expertise** with you.

RESTOM® in figures:

- Close to 30 years of experience
- More than 200 products
- 1 R&D lab
- 1 colour department
- 1 production plant spanning 1,200 m²

OUR TANK TREATMENTS Steel, copper, brass, plastic or aluminium

As forerunners in the treatment of tank interiors, Restom®'s reputation is firmly established.

To offset the porosity of plastic tanks and rust and oxidation in metal tanks, **Restomise them!**

We offer complete kits which include:

- Restom® SDT 4060, a super-powerful grease remover
- Restom® PAC 2030, a phosphating rust remover (except Poly kits)
- Restom® EIR2000, a two-component epoxy resin.

Depending on your tank's material and capacity, you will have your choice between our:

- SuperKit (metal)
- Kit Alu (aluminium or new)
- Kit Poly (plastic)

RESTOMISATION: (noun) Action of sustainably renovating the inside of a fuel tank using 100% French Restom® products. **Restomise:** (verb) Action performed by an enthusiast or a mechanic: "I Restomised my tank 10 years ago."

RESTOM'S SUPERKIT

IMITATED, NEVER DUPLICATED

MORE THAN **200 000**

TANKS TREATED IN FRANCE

OUR PAINTS

Restom also has a complete range of paints made with our own formulas. Solvent-based like back in the day, they are all loaded with corrosion inhibitors and have strong adhesive and resistance properties (resistant to splatter, temperatures, fuel, etc.).

Don't miss out on our: **Restom® MotorPeint PMV 3030** (motor paint), **Restom® EAF 2092** (cold weather epoxy), **Restom® Carpeint 6010** (paint finish), etc.

YOUR COLOURS ON DEMAND: Retrouvez les couleurs d'origine d'antan

Our colour department is at your disposal to create precise shades for you based on:

- A manufacturer reference number or colour code
- Small body parts
- An RAL or other colour chart reference number.

OUR POLISHES – Specific grains for each type of surface

Renovate your chrome, stainless steel, aluminium, copper, paint or plastic and make it shine! We adapt the grain in each of our polishes to ensure they do right by the surface you want to polish.

For example:

- Restom® Antibleu 4020 (anti-bluing)
- Restom® Chromes 2070 (chrome)
- Restom® NetInox 2060 (stainless steel cleaner).

OUR CLEANERS

Discover our professional grade cleaners for interiors and exteriors, with or without water:

- Restom® Cuir Baume 8210 (leather balm)
 - Restom® LavCar 6050 (car washing)
 - Restom® NetCar 9090 (car cleaner)
- And many more...

OUR MACHINERY PRODUCTS

We have also developed a range of products for your vehicle's machinery.

For example:

- Restom® Graisse au cuivre 5080 (copper grease)
- Restom® motor oils
