UNIQCROM

Solvent Color System

Unleash Productivity with Uniqcrom,
EXCELLENCE in car refinish

UNIQCROM

UNIQCROM is a **premium quality** basecoat system that offers outstanding color matching, ease of application and optimal hiding power.

The System
Constantly updated mixing bases

- Ensuring top color matching is achieved by Uniqcrom's **modern high-performance pigments**, accurate formulas and a sophisticated correction engine.

- Our **meticulously crafted formulas** guarantee consistent, high-quality results in every application.

- UNIQCROM's **sophisticated correction engine** optimizes color accuracy for flawless results.

- **Optimal process times** greatly enhance system productivity, thereby increasing its profitability.

- The system is composed of **40 solid bases, 3 binders, 8 metallic bases, 24 pearlescent bases**, and **6 xirallic bases**, covering all needs.

The Technology
Advanced Color Tools

Anchored by our three core strengths — a dynamic, always updated database, superior search engine, and advanced correction capabilities — **UNIQCROM** tools elevate color matching to a new level.

Database Strength

Our Color database is the cornerstone of our Color System, ensuring an always updated source of color data points for unmatched accuracy and efficiency.

Modern Search Engine

Every search retrieves the best possible color match candidates, with correction options and results scores, giving you high-quality information to make the best decisions.

Advanced Optimization

Our cutting-edge correction algorithms ensure the highest-quality color-matching results.

This technology is integrated into our **iCrom** color software.

xCrom *- Our spectro -*

- Accurate color readings
- 5 measuring angles
- Connected to iCrom software

iCrom *- Software -*

- User-friendly color interface
- Correction capabilities
- Continuously updated database

Support System
A fast response team

UNIQCROM has a fast response team to provide support. Contact the technical support services for any product, color, or software enquiries. We will help you resolve any issues.

TECHNICAL SUPPORT

Contact our team of experienced technical professionals for support on products or processes .
