THE POWER IN PUMPS

For more than 80 years, Airtex have been trusted to supply OE manufacturers, leading automotive brands, and the worldwide aftermarket.

Today, from our European headquarters, we continue to relentlessly innovate and engineer to deliver the very best in engineered pump performance. Many Airtex products feature our patented designs and technology available only from Airtex, including our unique SWITCH ECF Technology.

The Airtex product range offers premium performance, guaranteed reliability, and market leading coverage from our core product lines;

- **Water Pumps**
- **Water Pump & Timing Belt Kits**
- **Electric Fuel Pumps**

FUEL PUMPS

WATER PUMPS

You can count on superior performance from Airtex water pumps. Each pump is engineered to keep the engine cooling system in premium running condition and deliver maximum coolant flow and durability just like its OE counterpart.

Airtex utilizes the same robotic assembly process for both OE and aftermarket pumps, maintaining the highest performance with features including;

- **Precision-ground** and permanently lubricated unitized bearing assemblies
- **Unitized seals** for exceptional protection against leakage and contamination
- **Durable housings** that feature precisely machined mounting surfaces for proper sealing
- **OE impeller design & materials** engineered for maximum flow

- **650 SKU's**
- **95% car parc coverage**

FUEL PUMPS

Airtex is one of the automotive industry's leaders in fuel pump technology, manufacturing electric fuel pumps and assemblies for cars, trucks, fleet and speciality vehicles.

With more than 80 years of automotive aftermarket and OEM experience, from our European head office & manufacturing plant Airtex engineer fuel delivery systems to meet or exceed OE design specifications. Our range of electric fuel pumps are precision-machined to maintain accurate metering for reliable automotive fuel efficiency.

- **350 SKU's**
- **94% car parc coverage**

WATER PUMP KITS

Airtex water pump & timing belt kits have been intelligently engineered to deliver OE performance from every component. Partnering premium quality Airtex pumps with timing system components from OE suppliers guarantees perfect performance every time.

Each Airtex water pump kit contains;

- **Airtex OE design water pump**
- **Premium timing belt** manufactured in Europe by **DAYCO**
- **Premium quality tensioner pulley** tested & approved to beyond OE specifications

- **150 SKU's**
- **90% carpark coverage**
