Autolite®

IGNITING YOUR PASSION

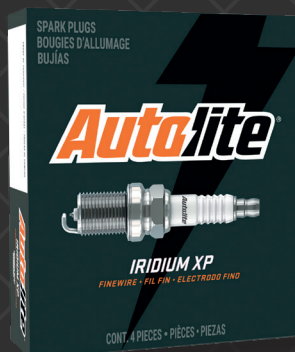

Autolite® Copper spark plugs deliver quick starts, good fuel economy and smooth acceleration.

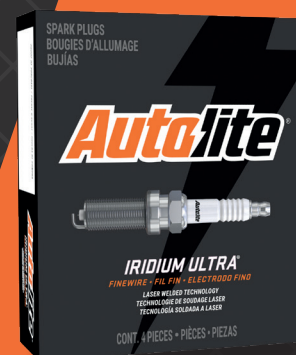

The platinum-to-platinum design of Autolite® Double Platinum spark plugs greatly decreases gap erosion and reduces misfires. These are superior-performing spark plugs for distributorless ignition system (DIS) engines.

Autolite® Iridium XP is an engineered OE replacement iridium spark plug, balancing a tested blend of iridium, platinum and palladium. Autolite® Iridium XP plugs precisely focus spark energy at the optimum ignition point to deliver high power, long life and exceptional value.

Autolite Iridium Ultra® is an engineered OE replacement iridium spark plug. A laser-welded 0.5 mm iridium finewire center electrode provides optimal fuel efficiency, acceleration and focused ignitability.

Autolite® Glow plugs provide a fast and reliable cold start for both older engines (HV) and the most modern applications (LV). Featuring after-glow capability, and made from premium quality materials to meet OE standards.
