## Vibration Control Spare Parts – Trust in Original Quality

## Our Strength is Ensuring Comfort, Safety, Robustness and Lifetime

We are Vibracoustic Aftermarket. We are your dedicated automotive vibration control service partner, engineering and supplying original spare parts for the entire range of light and commercial vehicles.

You can choose from a broad, innovative and market-leading portfolio. We offer flexible and customer specific solutions for the Automotive Aftermarket. We are one of the largest global manufacturer of vibration control parts.

Vibracoustic Aftermarket is part of the Vibracoustic Group. The Aftermarket portfolio benefits from the Group's innovation power and from more than 60 years of global experience in engineering and manufacturing original equipment components.

You will find Vibracoustic's products in more than 50 international vehicle brands. We work with all of the top 20 battery electric vehicle manufacturers\*.

\*(based on a forecast for number of units produced as of 2022)

## We are an Aftermarket expert, dedicated to your business

For some it's just a product – for us, it's passion! Our vibration control products are critical components for a smooth, safe and comfortable ride. They reduce noise and vibrations originating from the engine, motor and drivetrain, as well as from road surfaces, transmitted into the chassis.

You can rely on our material, engineering, technology and production expertise. We make sure that original quality is always inside and our spare parts meet all OE performance.

## More than 3,000 parts to choose from

We offer one of the broadest vibration control portfolio on the Automotive Aftermarket. From chassis mounts, air springs, microcellular urethane components, motor mounts, isolators and dampers, torsional vibration dampers to cabin mounts – you can get almost any product you need from a single source.

With high-quality vibration control spare parts for passenger cars, light commercial vehicles, trucks and buses, Vibracoustic Aftermarket is your partner to turn to. **Do not compromise on Original Quality when choosing your Aftermarket product.**
