Aftermarket

Our Air Springs Portfolio for Commercial Vehicles

Original and Strong Quality from a Single Source

Vibracoustic
Aftermarket

No matter which vehicle, application, vehicle age or mileage: you get the right Air Spring for truck, bus, cabin, trailer and seat from a single source. We are offering two strong Commercial Vehicle Air Spring brands: Vibracoustic and blacktech. Our Aftermarket portfolio benefits from the Group's innovation power and from more than 60 years of global experience in engineering and manufacturing Original Equipment components.

Our Air Springs for Commercial Vehicles offer easy assembly, reduced maintenance costs and high durability. Vibracoustic Aftermarket is your partner to turn to for original and strong quality Air Springs for Commercial Vehicles. We are continuously expanding our Aftermarket portfolio to your needs: Discover which of our two brands suits your Commercial Vehicle best.

Original Quality Air Springs

Strong Quality Air Springs

Vibracoustic solutions meet the highest quality criteria. Our original quality Air Springs are developed and engineered in close collaboration with original manufacturers to meet customer performance. Our Aftermarket products fulfill original performance and are produced in OE quality.

- 100% Original Equipment [OE] quality
- OE rubber quality, ensuring best resistance to temperature and ozone exposure resulting in an OE specified product lifetime
- Precisely configured suspension characteristics to Original Equipment specifications
- Maximum load capacity requirements
- Maximum service life
- Easy and precise fitting
- Global availability | Vibracoustic Air Spring range: 1.000 references

blacktech is an Aftermarket brand of Vibracoustic. blacktech's strength is to scale OEM specifications to Aftermarket requirements to offer a market-leading and strong quality Air Spring portfolio securing the performance also for increased vehicle age and mileage.

- Strong quality as alternative to original spare parts
- Strong rubber quality ensuring high resistance to temperature and ozone exposure resulting in an attractive cost-mileage-ratio
- Reverse engineered suspension characteristics for Aftermarket requirements based on our OE engineering and material expertise
- High load capacity requirements
- Long service life
- Easy and precise fitting, different service alternatives
- Global availability | blacktech Air Spring range: 1.300 references

As your dedicated Aftermarket partner for Commercial Vehicle Air Springs, our global sales team is close to you wherever you need us.
