

ABOUT ARNOTT

With 35 years of experience in engineering, designing and manufacturing high-quality suspension components for the automotive aftermarket, Arnott is the technical expert when it comes to suspension systems. Our ever-growing assortment consists of remanufactured OE air struts, Arnott-designed new (eRide) struts, (magnetic) shocks, innovative air springs, OES air suspension compressors, coil spring conversion kits, valve blocks and ride height sensors.

Arnott offers the broadest coverage in suspension parts with over 740 SKU's covering 38 vehicle brands that are available locally through leading distributors across the globe. Arnott's products are produced with high quality, OE components, offering exact form, fit and function. Each product is extensively tested in both a lab setting and on the company's extensive fleet of vehicles in our American and European facilities as well as custom-tuned to suit the specific vehicle make and model before being produced.

That is the Arnott Advantage.

AIR SUSPENSION PERFECTED.

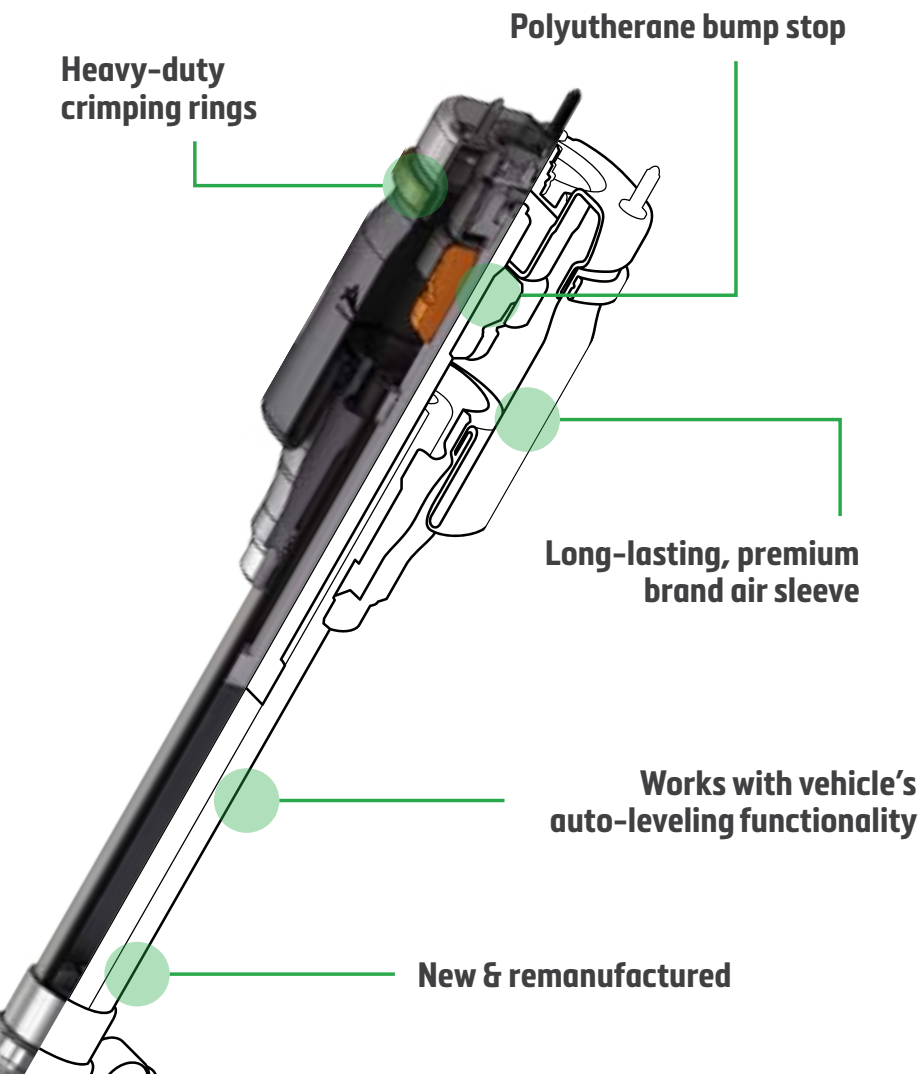

Arnott
Suspension Products

Struts & Shocks

Arnott engineers apply 35 years of experience in designing new and remanufactured struts/shocks.

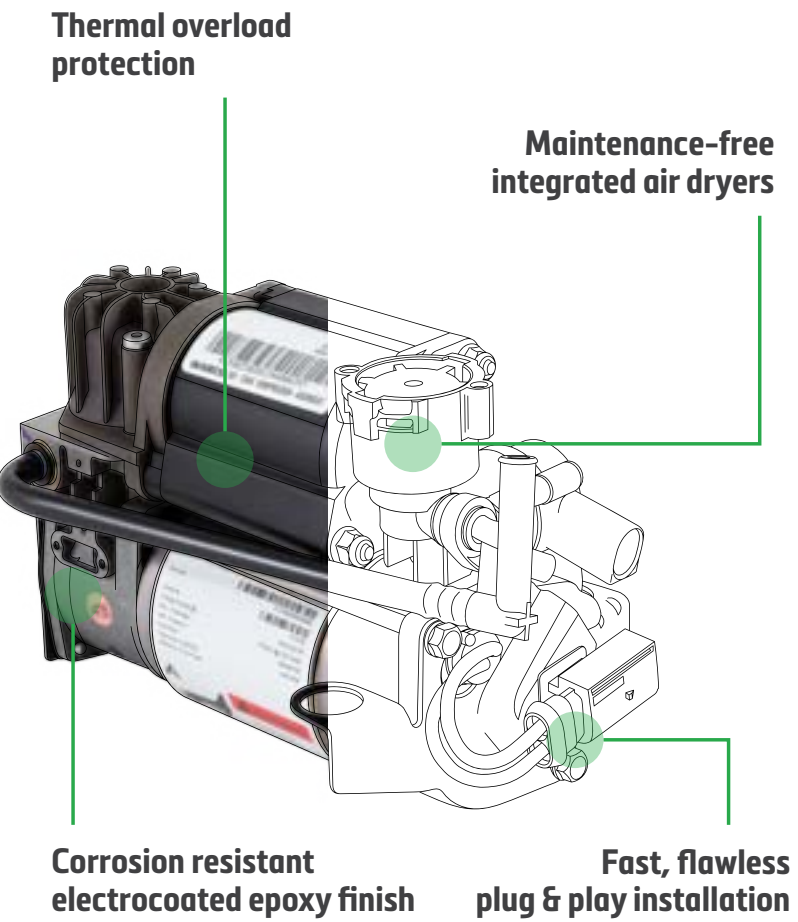

Our growing range consists of more than 420 SKU's, fitting over 370 vehicle applications.

Compressors

Arnott's compressors are direct OE replacements and are vigorously tested to ensure a long life and reduced failure rates.

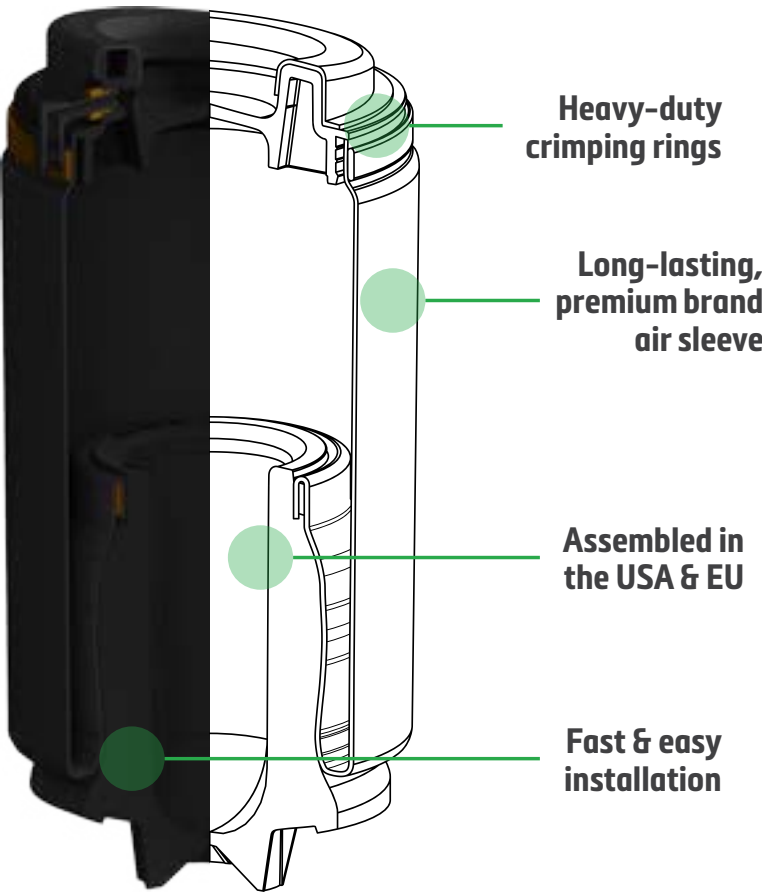

Most compressors are fully assembled for easy installation and include application-specific air lines, wiring harness, integrated dryer and mounting brackets.

Air Springs

Arnott air springs are engineered in our R&D facility in the USA and assembled with Tier 1 components.

They undergo extensive testing on a fleet of more than 40 Arnott-owned vehicles to ensure accurate fit, ride quality and performance.

Coil Spring Conversion Kits

- Converts air suspension systems to more traditional coil springs
- Custom-tuned shock absorbers
- Unique Arnott-engineered Electronic Bypass Module eliminates fault codes
- Pre-assembled for easy installation without vehicle modifications

Valve Blocks

- Distributes air pressure within the air suspension system
- Direct OE replacement
- Road tested for fit and function

Ride Height Sensors

- Determines vehicle height
- Manufactured with quality components
- Plug & Play installation
