

DUGLAS OIL

italian lubricants by ramoil

◆ **Gli Oli Lubrificanti della Ra.M.Oil sono distribuiti con il Marchio Duglas Oil**

La linea di lubrificanti Duglas Oil è formulata ai massimi livelli prestazionali per assolvere alle sempre crescenti esigenze tecnologiche di un mercato teso alla riduzione dei consumi ed al rispetto delle nuove normative antinquinamento. Il raggiungimento di tali obiettivi è stato possibile con l'utilizzo di basi specifiche per ogni tipologia di applicazione e di additivi di altissima gamma. Ra.M.Oil assicura, attraverso l'uso di moderne tecnologie di miscelazione e con l'applicazione di un rigoroso controllo sulla qualità, il rispetto dei massimi livelli prestazionali previsti dalle classificazioni internazionali sia **A.P.I.** (autorizzata con licenza No: 3909) che **A.C.E.A.** (Associazione dei Costruttori Europei di Automobili) nonché il rispetto degli standard definiti da tutti i Costruttori Mondiali (**OEM**). Il continuo aggiornamento dei processi di produzione associato ad una rigida ed attenta corrispondenza agli standard qualitativi internazionali, danno la certezza di fornire a tutta la Clientela dei prodotti sempre più sofisticati e tecnologicamente all'avanguardia. La Ra.M.Oil inoltre fornisce supporto per le aziende che desiderano **formulazioni su misura** o prodotti con la propria etichetta in supporti di elevata qualità. La Ra.M.Oil è nella lista **ATIEL**, Associazione Tecnica dei Produttori Europei di Lubrificanti, in qualità di produttore di oli lubrificanti riconosciuto dall'ACEA.

Certificazioni

La Ra.M.Oil S.p.A. esprime e sancisce il proprio impegno al rispetto e alla salvaguardia dei principi in cui fortemente crede, **Qualità, Tecnologia, Ambiente e Gestione rischi** adottando un **Sistema di Gestione Integrato** conforme alle norme ISO 9001:2015, ISO 14001:2015 e ISO 45001:2018

- al fine di garantire la conformità del prodotto finito alle specifiche di vendita per soddisfare ogni richiesta ed esigenza dei Clienti;
- per promuovere l'implementazione di tecnologie innovative per la diminuzione dell'impatto ambientale attraverso politiche orientate alla riduzione costante dei rischi e all'ottimizzazione dei processi. Il sistema avanzato di gestione ambientale della Ra.M.Oil ha permesso di conseguire nel 2018 la registrazione europea **EMAS** (Eco-Management and Audit Scheme) secondo i requisiti del Regolamento Europeo 1221/2009.
- al fine di sensibilizzare e responsabilizzare il personale per ottenere una crescita della cultura della sicurezza, attraverso la minimizzazione dei rischi e la formazione continua in tema di salute e sicurezza dei lavoratori.

◆ **Duglas Oil lubricants are Ra.M.Oil house brand**

Duglas Oil lubricants are formulated at the highest performance levels to meet the ever-increasing technological needs of a market aimed at reducing consumption and complying with the new anti-pollution regulations. The achievement of these objectives was possible with the use of specific bases for each type of application and top-of-the-range additives. Ra.M.Oil ensure, using modern mixing technologies and the application of strict quality control, compliance with the maximum performance levels required by international classifications such as **A.P.I.** (official license No: 3909) and **A.C.E.A.** (Association of European Car Manufacturers), as well as the standards defined by all World Manufacturers (**OEM**). The continuous updating of production processes, associated with a strict and careful correspondence to international quality standards, make sure of providing all customers with increasingly sophisticated and technologically advanced products. Ra.M.Oil also provides support for companies that want **tailor-made formulations** or products with their own label in high quality packaging. Ra.M.Oil is on the **ATIEL** list, the Technical Association of European Manufacturers of Lubricants, as a manufacturer of lubricating oils recognized by ACEA.

Certifications

Ra.M.Oil S.p.A. commitment to the principles in which we strongly believe, **Quality, Technology, Environment and Risk Management** by adopting an **Integrated Management System** compliant with ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 standards.

- in order to guarantee the conformity of finished products to technical specifications, to satisfy needs and demands of the Customers.
- to promote the implementation of innovative technologies with the scope of reducing environmental impact through policies aimed at constantly reducing risks and achieve process optimization. Ra.M.Oil advanced environmental management system allowed us to achieve European **EMAS** (Eco-Management and Audit Scheme) registration in 2018 according to the requirements of European Regulation 1221/2009.
- in order to raise awareness and empower staff to achieve a growth in safety culture, through risk minimization and continuous training on workers' health and safety.

GTe LINE

HYBRID TECHNOLOGY AND
ENVIRONMENTAL PROTECTION
100% SYNTHETIC FORMULATION

I lubrificanti della linea GTe sono realizzati per rispondere alle richieste di un mercato sempre più orientato verso la tutela dell'ambiente, in grado di soddisfare le severe esigenze degli OEM Europei ed Asiatici in termini di prestazioni ed emissioni. Formulati con basi 100% sintetiche ed additivi di ultimissima generazione, sono concepiti per fornire eccezionali prestazioni nei modernissimi motori ibridi (HEV e PHEV) sovralimentati e "downsized".

I lubrificanti GTe sono inoltre fortemente orientati verso le filosofie di Fuel Economy e Long Life (nuove specifiche VW), che traghettano grazie al basso HTHS ed al limitato contenuto di ceneri (Mid SAPS), garantendo la compatibilità con tutti i più recenti sistemi di post-trattamento e conseguente rispetto della normativa EURO VI. Infine, i GTe garantiscono al motore un'elevata protezione LSPI (Low Speed Pre-Ignition) ed un'eccellente compatibilità con i bio-carburanti.

Duglas GTe LINE lubricants are made to meet the demands of an environmentally oriented market, able to meet the restrictions of European and Asian OEMs in terms of performance and emissions. Formulated with 100% synthetic bases and latest generation of additives, they are designed to provide exceptional performance in supercharged and downsized hybrid engines (HEV and PHEV).

GTe lubricants are also strongly oriented towards the Fuel Economy and Long Life (new VW specifications) philosophies, which are obtained thanks to the low HTHS and the limited ash content (Mid SAPS), ensuring compatibility with all the latest after-treatment systems in compliance with EURO VI regulations. Finally, the GTe guarantee engines a high LSPI protection (Low Speed Pre-Ignition) and an excellent compatibility with biofuels.

GTv LINE

INNOVATIVE LOW SAPS TECHNOLOGY
100% SYNTHETIC FORMULATION

I lubrificanti della linea GTv, realizzati su base totalmente sintetica con un'innovativa tecnologia di additivazione a Basso contenuto di Ceneri (LOW SAPS), sono appositamente studiati per la lubrificazione delle auto equipaggiate con i più moderni motori benzina e turbo diesel ad iniezione diretta che rispettano le normative antinquinamento EURO V ed EURO VI. Garantiscono una totale compatibilità con tutti i sistemi di abbattimento delle emissioni allo scarico (DPF, TWC, FAP) e conferiscono spiccate proprietà di Fuel Economy (FE) per una costante riduzione dei consumi di carburante. I lubrificanti della linea GTv superano le stringenti richieste delle ultimissime sequenze API ed ACEA C.

Duglas GTv lubricants range is made on totally synthetic bases with an innovative Low Ash content (LOW SAPS) additive technology. They are specially designed for the lubrication of cars equipped with the most modern gasoline and turbo diesel engines with direct injection that comply with EURO V and EURO VI anti-pollution regulations. GTv lubricants guarantee total compatibility with all exhaust emission abatement systems (DPF, TWC, FAP) and confer strong Fuel Economy (FE) properties for a constant reduction in fuel consumption. They exceed the strict demands of the very latest API and ACEA C sequences.

GTs LINE

SYNTHETIC TECHNOLOGY
SYNTHETIC FORMULATION

I lubrificanti della linea GTs, realizzati su base sintetica con un'avanzata tecnologia di additivazione, sono stati sviluppati per soddisfare le specifiche tecnologie dei diversi Costruttori Mondiali (Mercedes, Audi-Volkswagen, BMW, Ford, GM, Fiat, Renault, PSA, Porsche, Ferrari, Toyota, Honda, Hyundai) che realizzano motori sempre più complessi e con intervalli di cambio sempre più prolungati. Il loro utilizzo è indicato per le auto ed i veicoli commerciali leggeri equipaggiati con motori a benzina, diesel e combustibili alternativi.

Duglas GTs lubricants range are made on synthetic bases with an advanced additive technology. They have been developed to meet the main World Engine Manufacturers specs (Mercedes, Audi-Volkswagen, BMW, Ford, GM, Fiat, Renault, PSA, Porsche, Ferrari, Toyota, Honda, Hyundai), which produce increasingly complex engines with ever longer change intervals. Their use is indicated for cars and light commercial vehicles equipped with petrol, diesel and alternative fuels engines.

GT LINE

ADVANCED TECHNOLOGY
MINERAL FORMULATION

I lubrificanti della linea GT, progettati con l'utilizzo di basi accuratamente selezionate ed additivi di moderna concezione, sono stati realizzati per garantire ottime performance a veicoli non più nuovi e rispondere alle esigenze di veicoli commerciali leggeri con motori contraddistinti da elevate percorrenze operanti in condizioni di esercizio non gravose.

Duglas GT lubricants range are designed with the use of carefully selected bases and additives of modern conception. They have been created to guarantee excellent performance for both old vehicles and light commercial vehicles, characterized by high mileage engines operating in non-heavy operating conditions.

OLI MOTORE TRAZIONE LEGGERA / PASSENGER CAR ENGINE OILS

VLD A11 GTe SKY 0W-20

100% SYNTHETIC - Blue Oil

API SP, SN PLUS; ACEA C5; VW 508.00/509.00; VW TL 52/577; PORSCHE C20; MB 229.71; STJLR 51.5122, 03.5006; GM dexos2

VLD A12 GTe SUPER FE 5W-20

HEAVY DUTY LINE

LUBRIFICANTI PER LA TRAZIONE DIESEL PESANTE /
HEAVY DUTY DIESEL OIL

I lubrificanti della linea Trazione Pesante della gamma Duglas Oil sono realizzati attraverso l'impiego di selezionati componenti sintetici e minerali e con l'ausilio di modernissimi sistemi di additivazione tali da far sì che il lubrificante possa garantire contemporaneamente elevatissime percorrenze (U.H.P.D.O. - S.H.P.D.O.), riduzioni delle emissioni (Norme Euro VI-V-IV), compatibilità con i dispositivi di post-trattamento (DPF-SCR), riduzione dei consumi di carburante (Fuel Economy) e resistenza all'usura.

I lubrificanti della linea Trazione Pesante della gamma Duglas Oil sono progettati per:

- Contribuire a prolungare gli intervalli di cambio dell'olio
- Contribuire a migliorare il rendimento del carburante nei camion
- Mantenere pulito il motore
- Offrire un'eccellente protezione dall'usura
- Essere conformi alle normative in tema di emissioni

Duglas Oil ha una linea completa di prodotti per la Trazione Pesante che rispetta i requisiti prestazionali richiesti in tutto il mondo (API, ACEA) e da tutti i Costruttori (Mercedes Benz, Volvo, Scania, Iveco, MAN, Renault, DAF, CAT, MTU, Mack) potendo quindi estendere l'utilizzo dei prodotti ai parchi misti.

Duglas Heavy Duty Diesel Oil lubricants range is made using selected synthetic and mineral components and with the aid of modern additive systems to ensure that the lubricant can simultaneously guarantee very high mileage (UHPD - SHPD), emission reductions (Euro VI-V-IV standards), compatibility with after-treatment devices (DPF-SCR), reduction in fuel consumption (Fuel Economy) and wear reduction.

Duglas Heavy Duty Diesel Oil lubricants range is designed for:

- Help extend oil change intervals
- Helping to improve fuel efficiency in trucks
- Keeping the engine clean
- Offer excellent wear protection
- Comply with emissions regulations.

Duglas Oil has a complete line of products for Heavy Traction that meets the performance demands required all over the world (API, ACEA) and by all Manufacturers (Mercedes Benz, Volvo, Scania, Iveco, MAN, Renault, DAF, CAT, MTU, Mack), thus being able to extend the use of the products to mixed vehicle fleet.

GREEN LINE

LUBRIFICANTI PER AGRICOLTURA
E MOVIMENTO TERRA /
FARM TRACTOR AND OFF-HIGHWAY OIL

I lubrificanti della Green LINE, ottenuti grazie ad un sapiente bilanciamento dei componenti, sono realizzati per garantire le massime performance a tutte le esigenze del settore Agricolo e del Movimento Terra. Questi macchinari, sempre più sofisticati e costosi, operano in condizioni estreme di utilizzo a causa delle elevate potenze richieste, delle riduzioni delle emissioni e dell'uso di un unico lubrificante per diversi sistemi da lubrificare: trasmissioni, motore, circuiti idraulici, frizioni e sistemi frenanti. I prodotti Duglas Oil Green LINE, proponendo una vasta scelta di U.T.T.O. e S.T.O.U., sono in grado di soddisfare tutte le richieste delle principali case costruttrici (CATERPILLAR, ALLISON, John Deere, Massey-Ferguson, CASE, New Holland, KOMATSU, KUBOTA).

Duglas Oil Green LINE lubricants, obtained thanks to a skilful balancing of components, are designed to ensure maximum performance for all the needs of the Agricultural and Public Works Machinery needs. These machineries, increasingly sophisticated and expensive, operate in extreme conditions of use due to the high power required, the reduction in emissions and the use of a single lubricant for different systems to be lubricated: transmissions, engine, hydraulic circuits, clutches and braking systems. Duglas Oil Green LINE products, offering a wide choice of U.T.T.O. and S.T.O.U., are able to satisfy all the requests of the main manufacturers (CATERPILLAR, ALLISON, John Deere, Massey-Ferguson, CASE, New Holland, KOMATSU, KUBOTA).

TRANSMISSION LINE

LUBRIFICANTI PER
TRASMISSIONI MECCANICHE /
MECHANICAL TRANSMISSION
LUBRICANTS

Duglas Oil presenta una linea Transmission Line specialistica per cambi e differenziali di automobili e veicoli industriali. L'alta qualità degli additivi e delle basi utilizzate garantisce la massima protezione per gli ingranaggi, contribuendo alla riduzione di rumori e degli attriti. L'accurata selezione delle componenti utilizzate ha permesso di ottenere dei prodotti GEAR, a base minerale con additivazione API GL4/GL5 EP, idonei per cambi e differenziali ipoidi e dei prodotti a base sintetica SUPER GEAR con tecnologia TDL (total-drive-line) e LS (limited-slip) per i cambi manuali di ultima generazione con spiccate caratteristiche di riduzione dei consumi (Fuel Economy).

Duglas Oil presents a specialized Transmission Line for automobile and industrial vehicle transmissions and differentials. The high quality of the additives and bases used guarantees maximum protection for the gears, contributing to the reduction of noise and friction. This range is composed by GEAR PRODUCTS, mineral based with API GL4/GL5 EP additives which are suitable for gearboxes and hypoid differentials, and SUPER GEAR products which are synthetic technology based with TDL (total-drive-line) and LS (limited-slip). They are suitable for the most recent manual transmissions and "new concept" gearboxes whose main feature is fuel consumption reduction (Fuel Economy).

AUTOMATIC LINE

LUBRIFICANTI PER TRASMISSIONI AUTOMATICHE / AUTOMATIC TRANSMISSION LUBRICANTS

I lubrificanti per trasmissioni automatiche Douglas Oil sono realizzati con l'utilizzo di basi selezionate, sintetiche e minerali, ed additivi caratterizzati da una elevatissima stabilità all'ossidazione ed una eccellente resistenza nelle più severe condizioni di utilizzo. Le trasmissioni automatiche sono oggi più complesse che mai e, per questo, le aspettative riguardo ai fluidi per trasmissione automatica sono sempre più alte. In effetti, la trasmissione automatica è probabilmente il componente meccanico più complicato di un'automobile, coinvolgendo impianto elettrico, sistemi meccanici, componenti idraulici e processori computerizzati per restituire un cambio ottimale su tutte le marce e trasferire la potenza del motore alle ruote motrici.

Duglasoil dispone di un'ampia gamma di fluidi progettati per proteggere i componenti critici della trasmissione e prolungarne la durata, in grado di assicurare cambi marcia più fluidi più a lungo, e una guida più rilassata.

I lubrificanti per trasmissioni automatiche Duglas Oil garantiscono:

- Maggiore coppia
 - Ottima protezione dall'usura per prolungare le prestazioni e la durata dell'intero apparato di trasmissione
 - Migliore efficienza operativa con riduzione rischio di slittamento della cinghia
 - Migliore stabilità ossidativa con eccellente controllo della viscosità

La gamma Automatic Line, partendo dal classico ATF DEXRON per arrivare ai sofisticati DEXRON VI, DSG, DCT, CVT e POWERSHIFT, prevede prodotti totalmente sintetici, semi-sintetici e minerali in grado di poter soddisfare tutte le esigenze richieste dai Costruttori (GM, ZF, Voith, Mercedes, VW, Man, Volvo) e protrarre il più a lungo possibile gli intervalli di cambio.

Duglas Oil's lubricants for automatic transmissions are made using selected, synthetic and mineral bases and additives characterized by a very high oxidation stability and excellent resistance even when used in the most severe conditions. Today automatic transmissions are more complex than ever, and because of this, expectations regarding automatic transmission fluids are constantly increasing.

Automatic transmissions are indeed the most complicated mechanical component of an automobile, involving the electrical system, mechanical systems, hydraulic components, and computerized processors to provide optimal shifting across all gears and transfer engine power to the drive wheels.

Dugdale oil has a wide range of fluids designed to protect critical transmission components and prolong their lifespan, resulting in smoother gear changes for longer, and a more relaxed ride.

DuglasOil has a wide range of fluids designed to protect your vehicle.

- Greater torque
 - Excellent wear protection to prolong the performance and lifespan of the entire transmission system
 - Improved operational efficiency with reduced risk of belt slippage

The Automatic Line range, starting from the classic ATF DEXRON to the sophisticated DEXRON VI, DSG, DCT, CVT and POWERSHIFT, includes completely synthetic, semi-synthetic, mineral products capable of satisfying all the needs required by manufacturers (GM, ZF, Voith, Mercedes, VW, Man, Volvo) and extend change intervals as much as possible.

LUBRIFICANTI PER NAUTICA OUTBOARD /
NAUTICAL OUTBOARD LUBRICANTS

I lubrificanti Duglas Oil per applicazioni Outboard, studiati per rispondere alle esigenze della nautica da diporto, sono realizzati con l'utilizzo di componenti di altissimo livello qualitativo. L'Outboard 2T è formulato per tutti i motori marini 2 tempi, con o senza miscelatore separato, con l'obiettivo di garantire la massima protezione contro l'ossidazione e la protezione del motore. L'Outboard 4T è realizzato per i motori nautici 4 tempi, sia fuoribordo che entrobordo, garantendo la massima protezione del motore e degli organi di trasmissione sottoposti ad un ambiente forte ossidante.

I Marine 4012 sono indicati per la lubrificazione dei motori a 4 tempi diesel alimentati a gasolio utilizzati in marina, nell'industria e nella trazione ferroviaria che impiegano gasolio con un contenuto di zolfo inferiore all'1%.

Duglas Nautical Lubricants Outboard range is developed for private and commercial boating. Products are made using high quality components. The OUTBOARD 2T is formulated for all 2-stroke marine engines, with or without a separate mixing. The main aim is to provide maximum engine protection and avoid the oxidation. The OUTBOARD 4T is created for 4-stroke marine engines, inboard or outboard, ensuring maximum protection of both engine and transmission components subjected to a highly oxidizing environment.

Marine 4012 are suitable for the lubrication of 4-stroke diesel engines powered by diesel used in marine, industry and railway traction which use diesel with a sulfur content of less than 1%.

FUNCTIONAL LINE

La gamma Duglas Oil di fluidi funzionali è costituita dai tradizionali brake fluids DOT 4 destinati ad un uso convenzionale, nonché quelli ad elevatissime prestazioni quali i DOT 5.1, e dai fluidi speciali per circuiti frenanti e sospensioni di alcuni veicoli PSA/Citroen e Fiat.

La gamma Duglas Oil di Antigeli è caratterizzata da una moderna inibizione che conferisce al prodotto elevate proprietà anticorrosive ed antischiuma nonché ottime caratteristiche Long Life tali da soddisfare le esigenze di lunga durata e stabilità all'ossidazione richiesta dai principali Costruttori Mondiali (VW, Mercedes, Volvo, Man, Renault).

The Duglas Oil range of functional fluids consists of traditional DOT 4 brake fluids intended for conventional use, as well as those with very high performance such as DOT 5.1, and special fluids for braking and suspension systems of some PSA/Citroen and Fiat vehicles.

The Antifreeze Duglas Oil range is characterized by a modern inhibition that gives the product high anti-corrosion and anti-foam properties as well as excellent LongLife characteristics such as to meet the needs of long life and oxidation stability required by the main World Manufacturers (VW, Mercedes, Volvo, Man, Renault).

GREASE LINE GRASSI LUBRIFICANTI/ GREASES

Duglas Oil ha realizzato una gamma di grassi lubrificanti ottenuti dalla combinazione di selezionate basi lubrificanti con moderni saponi di ossidi metallici ed additivi di elevatissimo livello qualitativo. La Grease Line è finalizzata alle applicazioni richieste dalla trazione pesante e dal movimento terra.

Duglas Greases range is obtained through the combination of selected base oils with modern metal oxide soaps and high quality additives. The Grease Line is suitable for heavy duty vehicles and construction equipment.

INDUSTRIAL LINE

Tutti i macchinari, industriali e no, impiegano oli idraulici e da lubrificazione. Che si tratti di generare e trasmettere energia, ridurre o trasmettere forze motrici, generare raffreddamento o aria compressa, di applicazioni di macchine utensili o di molte altre aree di produzione, i lubrificanti industriali hanno un compito chiave da svolgere. Molti processi funzionano senza intoppi solo con soluzioni lubrificanti appositamente realizzate. Si tratta pertanto di fluidi che ricoprono un ruolo fondamentale nel garantire performance sempre più elevate nei sistemi automatizzati.

Duglas Oil propone un portfolio prodotti in grado di soddisfare tutte le esigenze dell'industria, contribuendo in modo significativo a migliorare la produttività e l'efficienza riducendo al contempo il consumo energetico.

All machinery, industrial or not, use hydraulic or lubrication oils. Whether it is generating and transmitting energy, reducing or transmitting driving forces, generating cooling or compressed air, machine tool applications or many other manufacturing areas, industrial lubricants have a key task to perform. Many processes only run smoothly with specially made lubricant solutions. Therefore, these are fluids that play a fundamental role in guaranteeing ever higher performance of automated systems.

Duglas Oil industrial lubricants can make a significant contribution to improving productivity and efficiency as well as reducing energy consumption.
