

EXTENSIVE RANGE - FAST DELIVERY - HIGH QUALITY

WORLD CLASS PRODUCTION

Klokkerholm Karosseridele are one of Europe's leading suppliers of body parts. We are committed to innovative production methods and world-class manufacturing.

We are leading the way in technological solutions and our production of alternative body parts continues at our 30,000 m² facility. Here, we produce 1.5 million parts annually, which are available in over 40 countries worldwide. We maintain a harmonious integration of human expertise and advanced robotics, enabling us to meet the high demand efficiently. The robots are part of the reason, helping us meet the demand efficiently.

Our core goal remains unchanged: to produce alternative body parts that match the quality of the originals. Our advanced technologies,

including robots, fibre lasers, and 3D scanners, help us achieve this goal. We always want to be better – on every level – and that's what drives us.

With over 100 employees at our state-of-the-art facility, we continue to grow while preserving our original vision. We offer more than 35,000 different items for 60 car makes and over 2,300 models. Our extensive range and fast delivery indicate our efficiency and customer focus.

Klokkerholm Karosseridele stands as a beacon of quality and innovation in the aftermarket industry. Our dedication to merging traditional values with cutting-edge technology ensures that we deliver top-notch products and services to our global customers.
