We provide a complete

Dinex has expanded its range of exhaust parts for the most popular Euro VI trucks. This catalogue represents the most comprehensive and complete emission system program available for Heavy Duty trucks - covering everything from turbo to tailpipe. It includes all the necessary parts for replacing or servicing any Euro VI emission system.

But it doesn't end there: Make sure to explore the online version of this catalog for seamless integration with our award-winning webshop. This online catalog combines visual system layouts and schematics with a quick-search function, technical information, and a direct "add-to-basket" feature. Ordering the right spare parts for your truck has never been easier.

Check out the online version of this catalog here:

The broadest range of parts

With a global portfolio comprising over 15,000 spare parts, Dinex presents the world's broadest range of aftermarket spare parts for heavy on-road applications, as well as off-road construction and agricultural machinery.

OE quality is the minimum benchmark

Ensuring reliable performance is our foremost priority. We design and manufacture all ceramics, coatings, and metal forming in our own factories, with 95% of our entire program being in-house manufactured. This approach is our commitment to guaranteeing optimum quality that not only matches but, in many cases, even surpasses the standards of original equipment.

Certified and approved

As a trusted supplier to some of the worlds largest OEMs, Dinex is naturally certified according to several international standards, including:

- Quality Management: **ISO9001**
- Environmental Management: **ISO 14001**
- Occupational Health & Safety: **ISO 18001**
- Energy Management: **ISO 50001**
- OEM Certified to **IATF 16949**

Euro VI system product range

Remanufactured Diesel Injectors

Pumps for AdBlue®

Injectors for AdBlue®

Emission technologies

DOC (Diesel Oxidation Catalyst), SCR (Selective Catalytic Reduction), catalysts and DPF's (Diesel Particle Filter), developed and produced by Dinex.

DOC
(Diesel Oxidation Catalyst)

DPF
(Diesel Particulate Filter)

SCR
(Selective Catalytic Reduction)

Clamps

The portfolio includes Flat clamps, DIN clamps, V-clamps, Flex clamps and U-clamps.

Flexible parts

Dinex use 2S+, 3S flex pipes and bellow design to comply with leakage requirements.

Thermal Insulation

Keeping heat where it belongs, and improve emission reduction performance.

Sensors

Sensors are designed to monitor exhaust system parameters and secure systems proper operation.

Tailpipes

Direct replacement parts as well as universal tailpipes. Excellent quality parts made from aluminized, stainless steel or polished stainless steel.

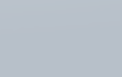

Pipes

Bending from 22 mm to 152,4 mm in alu or stainless steel.

Silencers

Dinex supply lock seamed, stamped or welded silencers in aluminized or stainless steel quality.

Widest global product range from turbo to tailpipe

Type approved DPF, DOC and SCR units

Global in-house manufacturing

Direct replacement of original exhaust parts

A family venture turned to global leadership

Back in the 70's Jørgen Dinesen was a successful sales manager in a global automotive corporation's local branch in Denmark. But his ambitions to shake up the Heavy Duty Aftermarket with better products, wider range and better support, didn't match with the owners strategy, so in 1982 Jørgen quit and founded Dinex (**D**inesen **E**xhausts).

Throughout the years Dinex grew into a leading global automotive supplier to the Heavy Duty Aftermarket and OEM industry. With Torben Dinesen as the 2nd generation leading as CEO since 2000, Dinex still continues the successful practices of offering high quality, competitive pricing, complete systems for all makes and models, and high focus on customer support.

Jørgen Dinesen,
founder and CEO until 2000.

Torben Dinesen,
CEO since 2000 and until now.

Why partner with Dinex?

Dinex Program Benefits

Providing tools and support

Broadest Product Range

Dinex offers competitively priced DPFs (new and reconditioned), DOCs, SCR, OneBox units, bellows, and pipe technology systems. The Dinex portfolio also encompasses Mechatronics components such as NOx, Temperature- and Pressure Sensors, Injectors for AdBlue®, and Pumps for AdBlue®.

Quality: All Dinex parts meet OEM standards and are ready for direct-fit installation out of the box. Each unit undergoes quality testing before packaging.

Warranty: Enjoy a 3-year warranty for aftertreatment systems (Euro VI silencers, DPFs, DOCs, SCR) and pipe technology systems, 2 years for reconditioned DPFs, and 1 year for accessories, Mechatronics, bellows, and flex.

Catalogues

Dinex provides the most user-friendly, interactive, and comprehensive catalogues for exhaust spare parts in the aftermarket industry. These catalogues are accessible in both print and online versions, featuring a flip function and direct integration into the Dinex webshop.

Award winning E-Commerce Platform

Webshop: Dinex.net is user-friendly, enhancing efficiency and simplifying the procurement of aftermarket goods. With the platform, you can place orders 24/7/365, check warehouse status and updated prices, conduct quick cross-reference searches, utilize CSV import, access detailed descriptions and pictures. The fully responsive design ensures seamless access via both PC and mobile devices.

www.dinex.net

Technical & Sales Support Training

Customer Service: Connect with real people through dedicated aftermarket business support.

Sales Support and Training: Receive comprehensive technical product portfolio and sales training.

Cooperative Marketing: Access co-branded flyers, ready-to-send email campaigns, social media promotions, and analytics offerings.

In the Field

Type approved aftertreatment system components

When you purchase Euro VI Diesel Oxidation Catalysts, Diesel Particulate Filters and Selective Catalyst Reduction units from Dinex you can fully trust that our product range has been approved according to the UNECE regulation 49.

The approval includes predetermined testing at an independent European Automotive certification facility, to ensure that Dinex aftertreatment system components meet the Euro VI emission regulation.

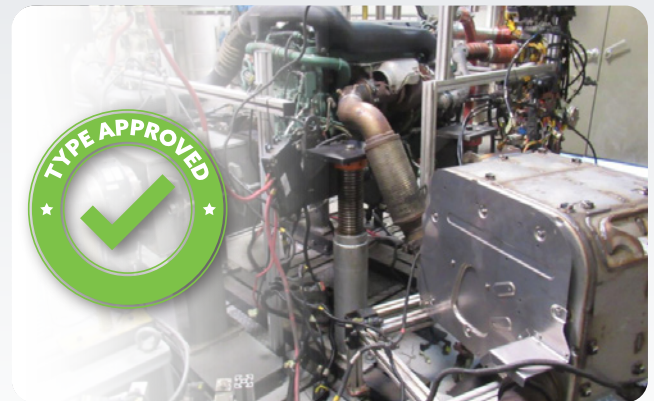

Applus⁺
IDIADA

Why do Type Approvals matter?

Type Approval is your guarantee that vital technologies, such as catalysts (DOCs & SCRs) and particulate filters (DPFs), conform to Euro VI standards – both in terms of emission reduction, performance, and durability.

It's easy to get your hands on cheap replacement substrates without Type Approval, and there is a huge risk of these ending up in remanufactured Euro VI silencers, unless the workshop and the buyer clearly insist on maintaining full compliance.

Know the risk before you take it

Legally speaking, using non-type approved solutions for a Euro VI vehicle, amounts to tampering with engine controls, installing AdBlue® emulators or other defeat devices, which if detected at roadside inspection or worthiness tests, can trigger fines of up to 15.000€, for driver and owner.

As if that's not enough, non-type approved solutions often fall short on durability and performance, which may lead to premature failures, unexpected repairs, and potentially lower fuel efficiency.

The temptation of skipping type-approval to save costs is understandable. But the risk of legal actions, higher maintenance and operating costs, and more frequent downtime, should be understood and taken into consideration.

Dinex endorses quality Reman

Proudly supporting some of Europe's leading certified remanufacturing workshops with type approved substrates. Check out our full range here, and reach out to us for references.

Why will your customers prefer Dinex?

Warranty

Enjoy a three-year, unlimited miles warranty for aftertreatment systems (DPFs, DOCs, SCR, and Euro VI silencers), as well as pipe technology systems. Reconditioned DPFs and Diesel Injectors are covered for two years, and accessories, Mechatronics (including temperature, pressure, and NOx sensors, pumps and injectors for AdBlue®), bellows, and flex are covered for one year.

Exact Fit

No need for guessing or worrying about compatibility. Dinex DPFs, DOCs, SCR, Euro VI silencers, and pipe technology system kits are exact fits to OE, saving you time in the shop.

Reconditioned program

The Dinex reconditioned DPF program provides a viable alternative to new DPFs and, in the long run, represents a more economical and climate friendly option compared to regular cleaning. The DPFs undergo a three-step cleaning process following OE-approved methods to ensure performance, durability, and extended service intervals. The kits also include the necessary clamps and gaskets.

Read more on page 95.

Clamps and Gaskets Included

All Dinex DPF, DOC, SCR, and pipe technology system kits come with included clamps and gaskets, saving you time and ensuring customers receive the right parts for the right repairs.

Pipe Technology Systems

Dinex develops and manufactures complete pipe technology systems. We have decades of experience and know-how, which enables us to offer cost-efficient solutions of the highest quality.

• Flex & Bellows Kit Upgrades

Dinex flex & bellows kits decouple engine vibrations and heat expansion for improved durability. Bellows, 2S and 3S flex kits come in multiple dimensions and lengths to fit your needs. Each kit comes with clamps and gaskets needed for install, saving money and time from ordering individual parts.

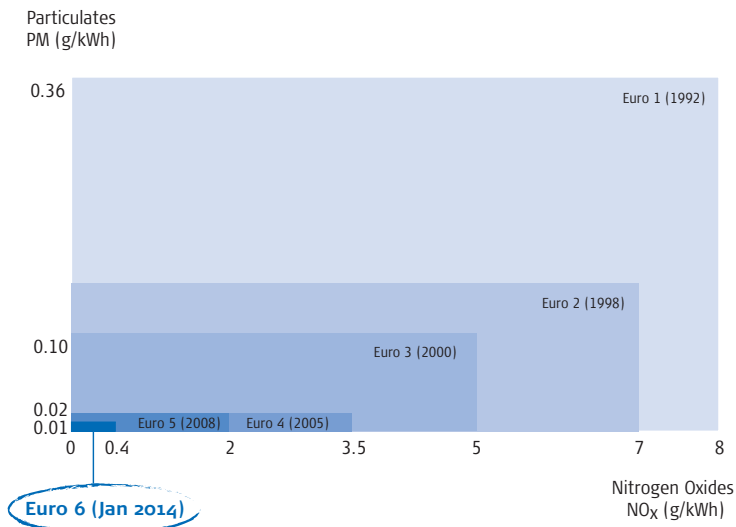

Mechatronics program

The Dinex Mechatronics Program includes a wide range of sensors, injectors, and pumps to replace the OE units directly, and to secure proper system operation conditions of the after-treatment components.

The exhaust system evolution

Over the past 3 decades the evolvement of emission standards in most parts of the world, has driven a significant reduction of harmful substances in the exhaust of diesel vehicles. In comparison to the 1990s, modern diesel engines emit over 90-95% less Particulate Mass and NO_x, reducing impact on environment and benefitting mankind.

Euro 7 is coming!

Negotiations are about to be done, and Euro 7 is expected in place for Heavy Duty vehicles in 2028. Besides introducing regulation of previously ignored pollutants and stricter tests for Type Approvals, here are some of the other highlights:

Particulate Mass (PM): From 10 to 8 mg/kWh

Particulate Number (PN): From 800 to 600 billion per kWh

Particle dimensions: From 23 to 10 nanometers

NO_x: Reducing from 0,4 to 0,2 g/kWh

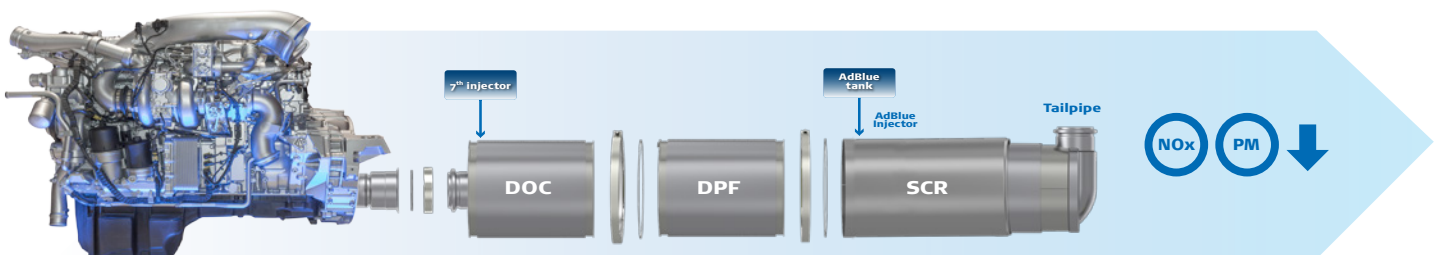

System w/acoustic silencer module (Euro 3)

System w/SCR (Euro 4-5)

System w/DOC + DPF + SCR (Euro VI)

Common Failures

When do you see failures in the DOC?

Typically, it is not the DOC that fails, but a failure happens upstream. This causes the DOC to stop working and results in a cold regeneration.

Common DOC Failures

The HC injector clogged:

Fuel can mix with soot to clog the injector.

EGR coolant leaks & turbo fails:

Oil and coolant sent downstream will contaminate the PGM coating, leading to DOC inactivity. An inactive DOC will struggle to raise the temperature needed for a proper regeneration.

The air filter is full:

The DOC needs air when it ramps up to go through regeneration. If the air filter is full or clogged, the DOC will not receive enough air.

When do you see failures in the DPF?

Diesel Particulate Filters can fail due to failures upstream or due to high mileage, which fills it up with soot and ashes.

Common DPF Failures

Engine and Fuel system failures:

Fuel or oil can mix with soot to clog the DPF.

EGR coolant leaks & turbo fails:

Oil and coolant sent downstream will contaminate the PGM coating.

Air induction system failure:

Incorrect air amount in engine lead to excess soot.

Mileage and replacement intervals:

DPF like each filter has a limited service span. We recommend to replace the DPF with a new or reconditioned unit after every 200,000km on distribution vehicles and after every 400,000km on long distance vehicles.

Visible soot from tail pipe

The DPF may eventually crack allowing unfiltered exhaust to escape. Physical damage, excessive amount of trapped soot, or repetitive improper cleaning may lead to these cracks, and the filter should be replaced by a new or reconditioned unit as soon as possible.

When do you see failure s in the SCR?

Typically, for SCR failures root cause is in other system failures.

Common Failures causing problems with SCR

Failures in DEF system:

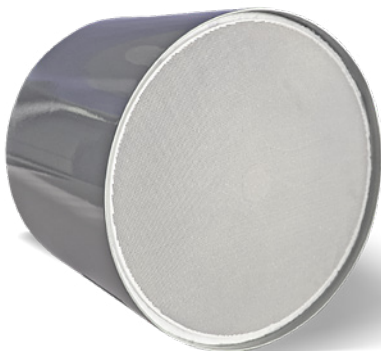

Incorrect operation of DEF system can cause damages on SCR.

Failures upstream:

SCR can be impacted not only by engine and it system failures, but also DOC and DPF failures.

Mechanical defects of substrate:

Substrate may slide out of canning or get some cracks.

Frequently asked questions about NO_x-sensors

The NO_x (Nitrogen Oxides) sensor is crucial for the proper functioning of an SCR system, but it is also a delicate piece of technology that operates in a harsh environment. As a result, failures may occur more frequently than for other parts in the exhaust system.

This sensor is typically a high-temperature device that measures the level of NO_x in exhaust systems before and after the SCR catalyst. The information gathered is used by Engine Controls to calculate the exact amount of Diesel Emission Fluid to be dosed at that moment, achieving the necessary reduction of Nitrogen Oxides (NO_x), as strictly regulated by authorities worldwide.

All Dinex NO_x sensors meet OE criteria and undergo calibration and testing at specialized facilities. These sensors are available for DAF, , Ford, Iveco, MAN, Mercedes, Renault, Scania and Volvo as well as a wide range of off-road applications.

What is the Average life of a NO_x sensor?

About 6,000 hours or 300,000 km (200,000 miles).

Does the sensor have the same calibration as OE (ppm levels)?

Yes, although generally AEM sensor tend to have a bit wider tolerance zone compared to OE sensors, Dinex sensors are very accurate as OE.

Can I drive with a bad NO_x sensor?

Yes, but the engine might operate in safe mode (reduced power and speed), and the emissions might exceed the specified regulations.

How can I determine if the sensor comes installed with the correct software?

The only way is to compare Continental cross-references.

What is the difference between Dinex NO_x sensors and sensors made by other producers?

Dinex adds value to the sensor by establishing continuous improvements to the product range to solve problems and guide our customers to make the correct choice.

What should I do when the sensor does not work immediately after installation?

Double check if the correct cross-reference has been used and make sure all the electrical connections are good. It is also important to run complete system diagnostic to see if there are other issues that could be causing the NO_x sensor failure, such as short or open circuit. Other SCR system components can also affect the NO_x sensor, such as a pump for Adblue®.

For more answers, installation guides, videos and resources on NO_x-sensors, be sure to check out our website, where Dr. NO_x is ready to help you.

**Think you know Aftermarket NO_x-sensors?
Then you haven't tried Dinex Generation 2.0 sensors:**

Every bit as good as OE – only more affordable

Content

Founded in 1928 by Hub van Doorne as Van Doorne's Aanhangwagen Fabriek, later shortened to DAF, the company is now a division of Paccar. DAF trucks, renowned for safety, driver comfort, fuel efficiency, reliability, and customization, are widely favored by businesses worldwide.

DAF Euro VI trucks feature exhaust aftertreatment systems meeting Euro VI emission standards, aiming to notably cut nitrogen oxides (NOx) and particulate matter (PM) emissions from diesel engines. The system comprises a Diesel Oxidation Catalyst (DOC), Diesel Particulate Filter (DPF), and Selective Catalytic Reduction (SCR) system.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe".

FORD

NEW 2024

Content

Ford's truck legacy in Turkey began in 1928 with the appointment of the first Ford dealer. A 1959 joint venture, Otosan, led to local truck assembly, including the popular D-series. Today, Ford Trucks, part of Ford Otosan, offers a wide range of trucks in Turkey, making them a leading manufacturer and exporter.

The Ford F-Max, a powerful heavy-duty truck built for Europe, highlights their focus on innovation. It meets strict Euro VI emission standards and boasts a 493 horsepower engine. This heavy-duty truck emphasizes efficiency and performance.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe."

Content

Iveco, a global truck manufacturer, wasn't founded traditionally. In 1975, five established truck companies from Italy, France, and Germany merged to form Iveco. Their trucks are known for durability, performance, and efficiency.

Iveco Euro VI trucks meet strict Euro VI emission standards, reducing harmful pollutants from diesel engines. Iveco's unique HI-SCR system achieves this with a simpler design compared to other manufacturers.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe."

Content

Founded in 1898 through a merger of key German engineering companies, MAN Truck & Bus (now part of Volkswagen Group) has a long history of building reliable and powerful commercial vehicles. They focus on durability, performance, safety, and efficiency, with a strong commitment to customer service.

MAN trucks comply with Euro VI emission standards, utilizing an Exhaust Aftertreatment System with DOC, DPF, and SCR technology to reduce harmful pollutants. They even offer replaceable DOCs in some models for extended service life.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution “from turbo to tailpipe.”

Content

A pioneer since the dawn of automobiles, Mercedes-Benz trucks have a rich heritage (1896 onward). Renowned for durability and performance, they've continued to innovate with efficient designs (short-bonnet truck) and safety features. Modern Mercedes-Benz trucks are technological marvels, balancing power with clean operation through Euro VI technology and advanced engines. Offering a wide range of models for every need, they are a testament to Mercedes-Benz's commitment to engineering excellence.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe."

Content

Renault Trucks, born from trailer manufacturing in the early 1900s, boasts a rich history. Their iconic “AH” series cemented their reputation for power and durability. The 70s and 80s saw a shift towards driver comfort and fuel efficiency, resulting in new cabins and engine technologies. Acquired by Volvo Group in the 2000s, they continued to develop successful models like the long-haul Magnum and regional Premium.

Renault Euro VI trucks use advanced aftertreatment systems (DOC, DPF, SCR) to meet clean air standards by reducing harmful pollutants from diesel engines.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution “from turbo to tailpipe.”

Type: Injector for AdBlue®

Dinex No: 8CL004
OE number: 7421403962
Type: Pressure Sensor

Content

Scania's history began in 1891 with the merging of two Swedish engineering companies. This combined expertise laid the foundation for a powerful truck manufacturer. Today, Scania is a global leader in sustainable transport solutions. Their Euro VI trucks meet strict emission standards and use a unique HI-SCR system to reduce pollutants and potentially improve fuel efficiency. In Scania Euro VI systems, replaceable are not only DPF, but also DOC unit.

They offer a wide range of high-performing and environmentally friendly trucks and buses.

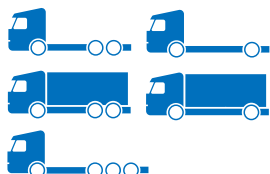

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe."

Content

Volvo Trucks, born in Sweden in 1927, have a rich history of innovation. They focused on durability and safety, pioneering the 3-point seatbelt (1959). Today, they're a global leader with a strong environmental focus.

Their Euro VI trucks meet strict emission standards and use advanced aftertreatment systems to reduce pollutants and keep the air clean. Volvo offers a wide range of powerful and eco-friendly trucks for diverse applications.

Dinex Aftermarket parts and emission components meet OE standards and are enhanced with tested Dinex solutions. Our emission technologies and catalytic coatings are based on our innovative solutions trusted by global OEMs. All Euro VI ATS components are Type approved and validated by third parties. With top-quality exhaust pipes, clamps, insulation, decoupling, and mechatronics, Dinex offers a comprehensive solution "from turbo to tailpipe."

DPF Reconditioning For Euro VI vehicles

going the extra mile

3 STEP cleaning with OEM endorsed technology.

The cleaning process is utilized and approved by major OEMs in the commercial vehicle industry, ensuring that we do not compromise on the functionality and quality of the cleaning.

Typically, a standard cleaning is performed up to stage 1 and/or 2. However, Dinex goes a step further by cleaning the DPF up to stage 3. This is achieved using a proprietary chemical solution that dissolves hardened ash and restores catalytic performance.

The advantages are numerous, including improved fuel economy, extended service intervals, fewer regenerations, reduced downtime, and much more.

Stage 1 – Pneumatic cleaning

- Removes bulk of loose ash and soot

Stage 2 – Thermal cleaning

- Removes remaining soot & coke; loosens ash

Stage 3 – Recondition

- Proprietary chemical solutions
- Dissolves hardened ash
- Restores catalytic performance
- Removes oil & coolant contamination

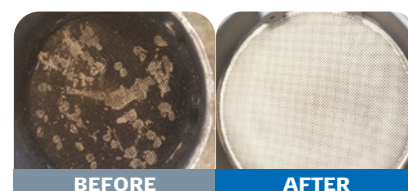

At this stage, twice as much ash and pollutants will have been removed from the filter, as with a simple 2-stage cleaning.

Heating and washing

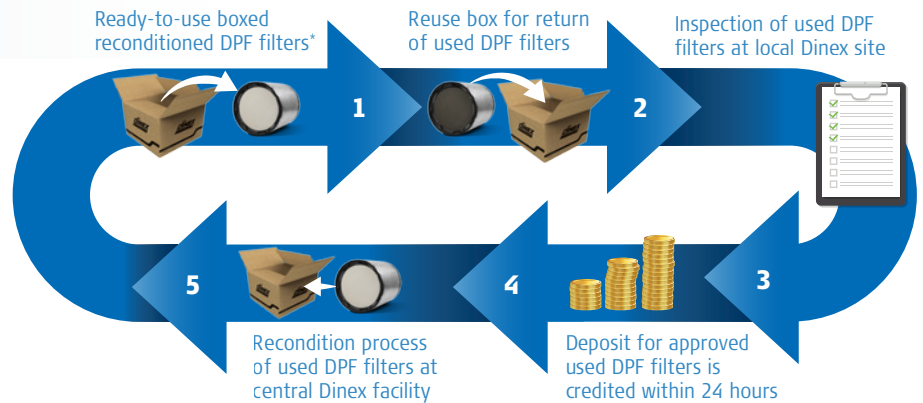

Ultrasonic & chemical cleaning

2 years warranty on all reconditioned diesel particle filters delivered by Dinex.

Exchange Flow

The Dinex particle filter kit contains a Recon filter and needed accessories.

*Clamps and gaskets included

Dinex DPF options based on your specific needs.

Exact fit for

DAF, FORD, IVECO, MAN,
MERCEDES, RENAULT,
SCANIA, VOLVO

A low-cost alternative that allows you to maintain ownership of your DPF. Want to avoid downtime? Keep a spare Dinex DPF on your shelf, and start your own exchange program. Dinex recommend the usage of a reputable, high quality DPF cleaning facility. Not all cleaning services are equal.

Avoid downtime with a convenient Recon program competitively priced with low core charges. Simple, certified and backed by a 2-year warranty.

Predictability and performance. On average, a new DPF will withstand 2-3 cleaning in its lifetime. Lifespan highly dependent on application, duty cycle, maintenance and upstream performance. Please contact your rep for more details.

Studies of Total Cost of Ownership (TCO) over an 2.000.000 km duty cycle, shows that fleet owners save in average over 2.000 € in reduced downtime, less frequent service intervals, and improved fuel economy - by using Reconditioning over traditional Cleaning.

Proudly serving the Remanufacturing industry

Replacing a broken Euro VI silencer is a costly affair, so it's really no wonder why truck owners increasingly turn to Remanufacturing. But as new markets bring new opportunities, new risks also surface.

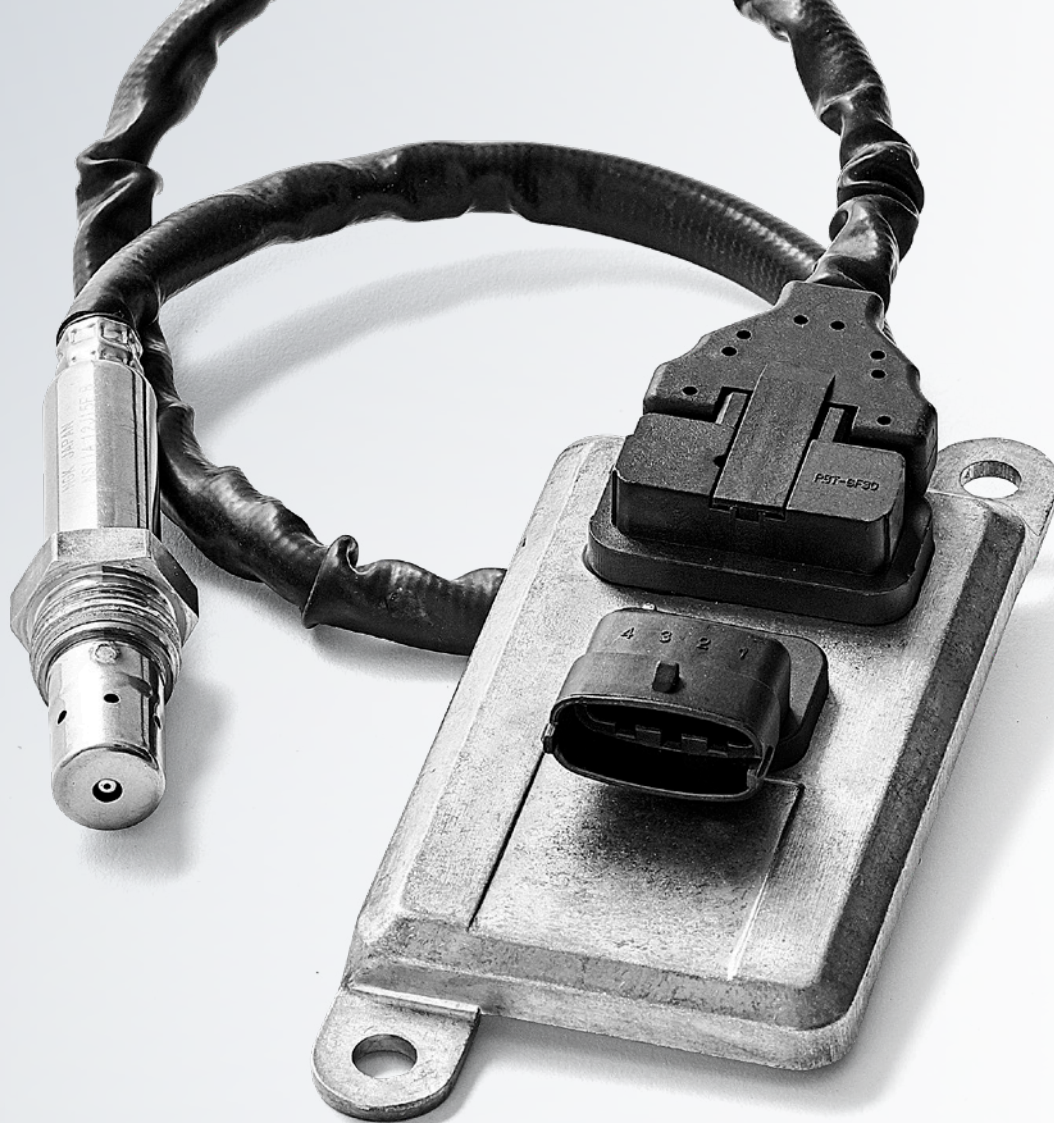

A broken Euro VI silencer often involves one or several damaged catalysts or filters (commonly named "Substrates"), or a blockage of crystallized AdBlue® residues. Nothing that a professional remanufacturing workshop can't fix, simply by replacing the substrates and cleaning the insides.

As a concept, Remanufacturing of Euro VI silencers is an obviously positive no-brainer. A good, professional reman-job results in a product that performs like new, with a CO₂-footprint 80-90% lower, and a very attractive price-tag. Both planet & wallet win!

But as the market grows, quality variations rise, and pitfalls start to show. Recent findings by Dinex and select professional reman-partners reveals that not all suppliers are keen on upholding the same standards, and guess who's stuck with the consequences: Drivers, and truck owners.

Check out Dinex' full range of quality DOCs, DPFs, and SCRs for direct replacement or remanufacturing. All Type Approvals in place and covered by Dinex' leading warranty programs.

For direct replacement
of OE sensors

NO_x sensors

Accurate dosing of AdBlue® and proper operation of the SCR system is critically dependent on the use of fully functional and high-quality NO_x-sensors.

An essential part of modern trucks

Having an inaccurate or faulty NO_x-sensor installed can be the cause of anything from incorrect dosing of AdBlue to more severe (& costly) crystallization damaging the full exhaust system.

That's why you don't want to compromise quality when replacing NO_x-sensors, and with Dinex: You don't have to!

Generation 2 sensors from Dinex

Traditional Aftermarket sensors has a history of compromising build quality, and using outdated components and software, causing a long line of failures, leading to a common conception that OE is the only real alternative.

But Dinex' 2nd generation NO_x-sensors are not like others in the Aftermarket. Built using latest available sensing components, loaded with smarter software that remains compatible, and tested to highest standards, you can expect completely seamless replacement and operation.

Don't take our word for it. Check out our customer's testimonials:

Why settle with industry benchmarks?

New generation of NO_x sensors from Dinex does away with Aftermarket prejudices, as it outperforms industry standards – & saves costs meanwhile.

All You Need From Turbo To Tailpipe

NO_x Sensors by Dinex

Reduce your operating costs

3 layer protection of circuits and the latest sensing technology gives you higher accuracy, better durability, and ultimately: Reduced AdBlue® consumption.

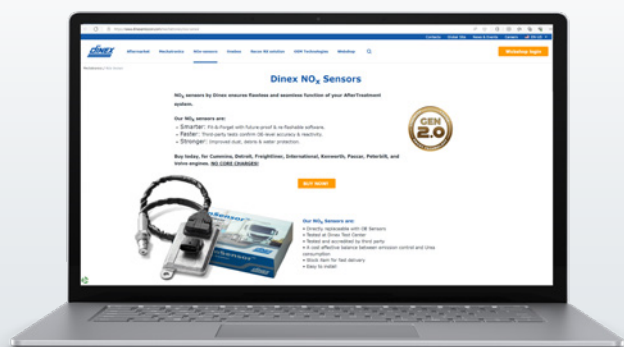

Software so smart, you'll never notice it

Unique programming and ghost code protection gives support for future ECU updates, ensuring seamless compatibility with your vehicle.

Should cost more - but it doesn't

A product that sets its own standards, at the competitive Aftermarket pricing you prefer.

Keep operating conditions under surveillance

Temperature sensors

Maximum efficiency of the aftertreatment system is ensured at high temperatures. Reliable temperature sensors are therefore vital components of the system.

Unstable sensors are costly

A malfunctioning temperature sensor is a typical root cause for partial power loss or even forcing truck engines into safe-mode, severely reducing power output. Going for less than the very best sensors is simply not worth the risk.

The reliable choice

The temperature sensors from Dinex are designed to match the high levels of accuracy and durability demanded today. The sensors fit into all common ATS layouts in Euro 4, 5 and 6 engines and being constructed with the very best materials.

No more excuses!

They are as small and inexpensive as they are frequently neglected. But failing to replace AdBlue® filters can lead to critical consequences.

All You Need From Turbo To Tailpipe

Filters for AdBlue® Pumps by Dinex

Essential for your SCR system

Protects and prolongs the life of the much more costly pump, injector and catalyst, and should be replaced no later than every 100.000 km.

Silicone lube included

Always apply to the sealing ring before mounting, for a tight fit and easier disassembly. And always included when you buy Dinex.

Full range, all in one place

Covering Trucks and Busses from all the big 7 makes, with a complete range of spare parts for your SCR system. All in one place!

For more information, articles, videos, training and online ordering, check out dinext.net

Dr. NOx recommends replacing AdBlue® filters for at least every 100.000 km, to avoid costly damage to your SCR system.

For more information, check out Dr. NOx Episode 5

Premium Line

**Remanufactured OE
Diesel Fuel Injector**

going the extra mile

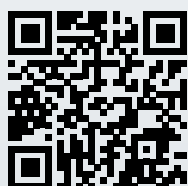

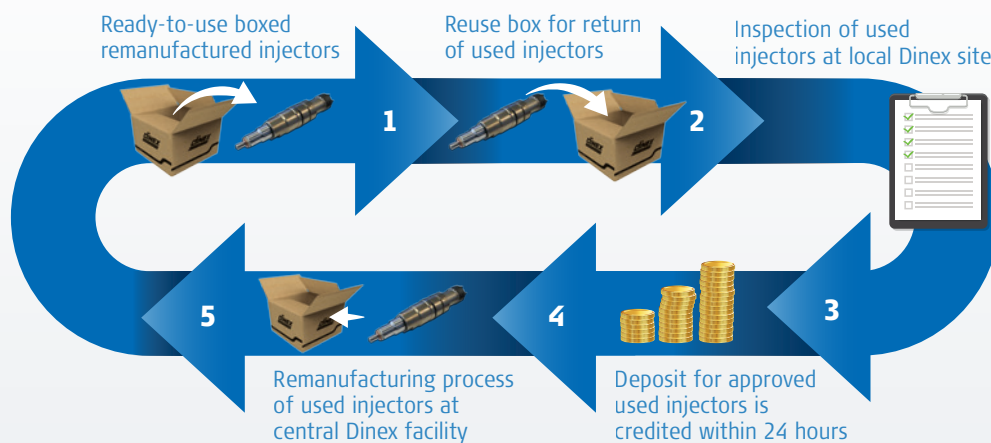

Your Partner in Exhaust and Emission

Our Remanufactured Diesel Fuel Injectors are:

- Direct replacement part
- Original part core that has been industrially remanufactured in Europe
- High quality part with 2 years warranty
- Supplied with all information and provisions for easy replacement
- Very convenient core exchange system – no need to wait until service is completed
- Processed and validated according to original specifications, ensuring optimal fuel consumption
