million

of vans in the EU alone

**6.3**  
million  
in France

**4.3**  
million  
in Italy

**3.9**  
million  
in Spain

# FAST brand

The FAST brand, which specializes in light commercial vehicles segment, has been supplying top-quality replacement parts for over 17 years. Our product range allows us to offer the widest selection of parts in the market, covering more than 10,000 products for 70% of vans on European roads.

FAST does not only supply the largest variety of parts, but also improves and modifies products compared to the competition. In addition to excellent quality, our parts feature a number of modifications and improvements in their design. We pay attention to users' suggestions and opinions, which we then implement. As a result, a final customer can enjoy a high product.

From the very beginning, the FAST brand has been building its portfolio based on the experience of vehicle users and a professional approach to the parts development and production process. We create a comprehensive range of products for every European van model. Our portfolio includes fast-moving parts, as well as less common parts such as hinges, rollers, plastic body parts and many others which are unique in the aftermarket.

FAST is the only brand that specializes in light commercial vehicles' parts, offering everything you need in one place. Choose from over 10,000 product for vans. FAST has the widest range of LCV spare parts in Europe and the UK.

# The width of FAST assortment

## FAST - Aftermarket +

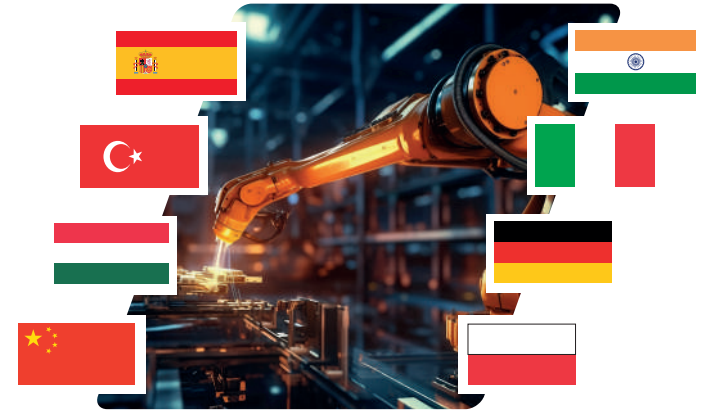

FAST is not an average aftermarket brand for the vast majority of vans. It is also an added value. We listen to our customers, observe the market and draw conclusions at the stage of complaints process. The results of such activity are modifications and reinforcements we apply to FAST products.

We manufacture only in proven and certified factories in different parts of the world. We focus on quality and durability.

Our product development department constantly improves durability and strength of FAST parts.

- FAST brand intercooler pipes dedicated to Iveco Daily 14> have reinforced material compared to the original products.
- In addition, the pipes themselves have thicker walls than OE.

We are the only company that has modified the tie rod end on Iveco Daily 14>.

We are the only ones in the market to have introduced a modification to the Daily 14> upper control arm bolt.

- Special milling and seger.
- Wider flange.
- Reinforced welds.

# Become our partner!

**Good quality products**  
are not enough to be  
successful!
