

KINERGO® is a fully integrated manufacturing company that prides itself in innovation, engineering, production and confidence. For 15 years, we have been developing, producing and distributing equipment and torque converter spare parts worldwide to facilitate professional repair and diagnostics of automatic transmissions. We supply our products to remanufacturing businesses, service stations, repair shops all across the globe. Own service stations, where we test and improve the technologies.

Since 2016 we are ATRA's member and our US branch was opened last year.

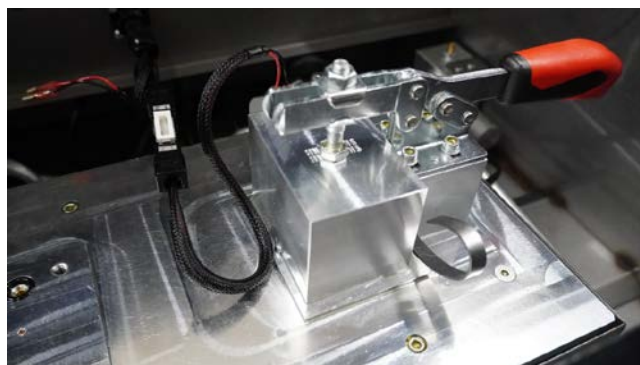

We provide:

- Worldwide delivery.
- Service, support, training programs.
- Customized solutions upon a request.
- Technical base and specialists with many years of experience.

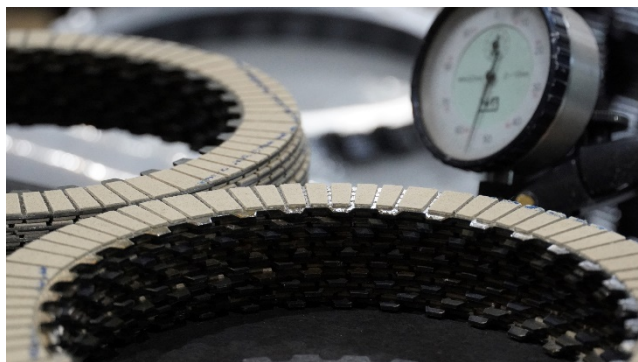

Our main products:
