DASHBOARD COVER

During the summer months, our car dashboard suffers from various factors.

Firstly, there's dust, which settles into every part and seeps into the small gaps between plastic components. But most importantly, there are the scorching rays of the sun, which dehydrate the plastic parts, especially the softer ones, causing them to look old and become more susceptible to damage over time.

For these reasons, GiannisMallis offers a dashboard protector custom-cut and stitched for each car model.

Essential information for ordering includes the brand, type, and year of the car.

Features:

- 100% sun protection

- Excellent fit

- Specifically tailored for each car

- Special fabric for durability

- Available in black color

We discovered that the market was missing a protective cover that is very necessary for every car. So, we studied every detail and created the PARCEL SHELF PROTECTOR to protect the factory upholstery of the car's parcel shelf from the sun's rays and dust that enters the car's interior during everyday use.

GiannisMallis Company has patterns for all car brands and manufactures the PARCEL SHELF PROTECTOR to fit each car individually.
