INDUSTRIAL COMPONENTS (OE)

1

WHAT DO WE DO

We develop parts for the industrial sector (OE) and for the aftermarket, with the aim of becoming the ideal partner for the industries of the Automotive, Racing, Agricultural, Earthmoving sectors, etc.

COMPONENTS TAILORED TO THE CUSTOMER

We work on two kinds of business:

- Finished products
- Machined components

2

HISTORY

Our company was founded in 2019 just before the start of the pandemic. Despite the complicated period, our **values**, our **skills** and the **long experience** gained over the years have been fundamental and have given us even greater impetus to the passion that **drives us**.

We have combined **technical-managerial skills** and **international know-how** to offer the best, but we didn't stop there. Indeed, our ambition drives us to pursue continuous improvement in terms of **quality**, **service** and **product innovation**.

Our goal is not only to offer products but, above all, technologies and solutions, as the name of the company suggests.

PRODUCTS

FINISHED PRODUCTS

We realize, in accordance with the customer's technical needs, finished parts such as shock absorbers, wheel hubs and Knuckles/spindles.

COMPONENTS

We develop technical components in steel and aluminum according to the drawing and the specifications of our customers.

4

FINISHED ITEMS

SHOCK ABSORBERS

WHEEL HUBS

STEERING KNUCKLES

5

STEEL COMPONENTS

Used materials:

- Carbon steels
- Alloy steels

Technologies:

- Forging
- Heat treatments
- Machining
- Surface treatments

STRENGTHS

- **Competitiveness.**

A lean but efficient organization allows us to be competitive while maintaining the best quality levels.

- **Flexibility.**

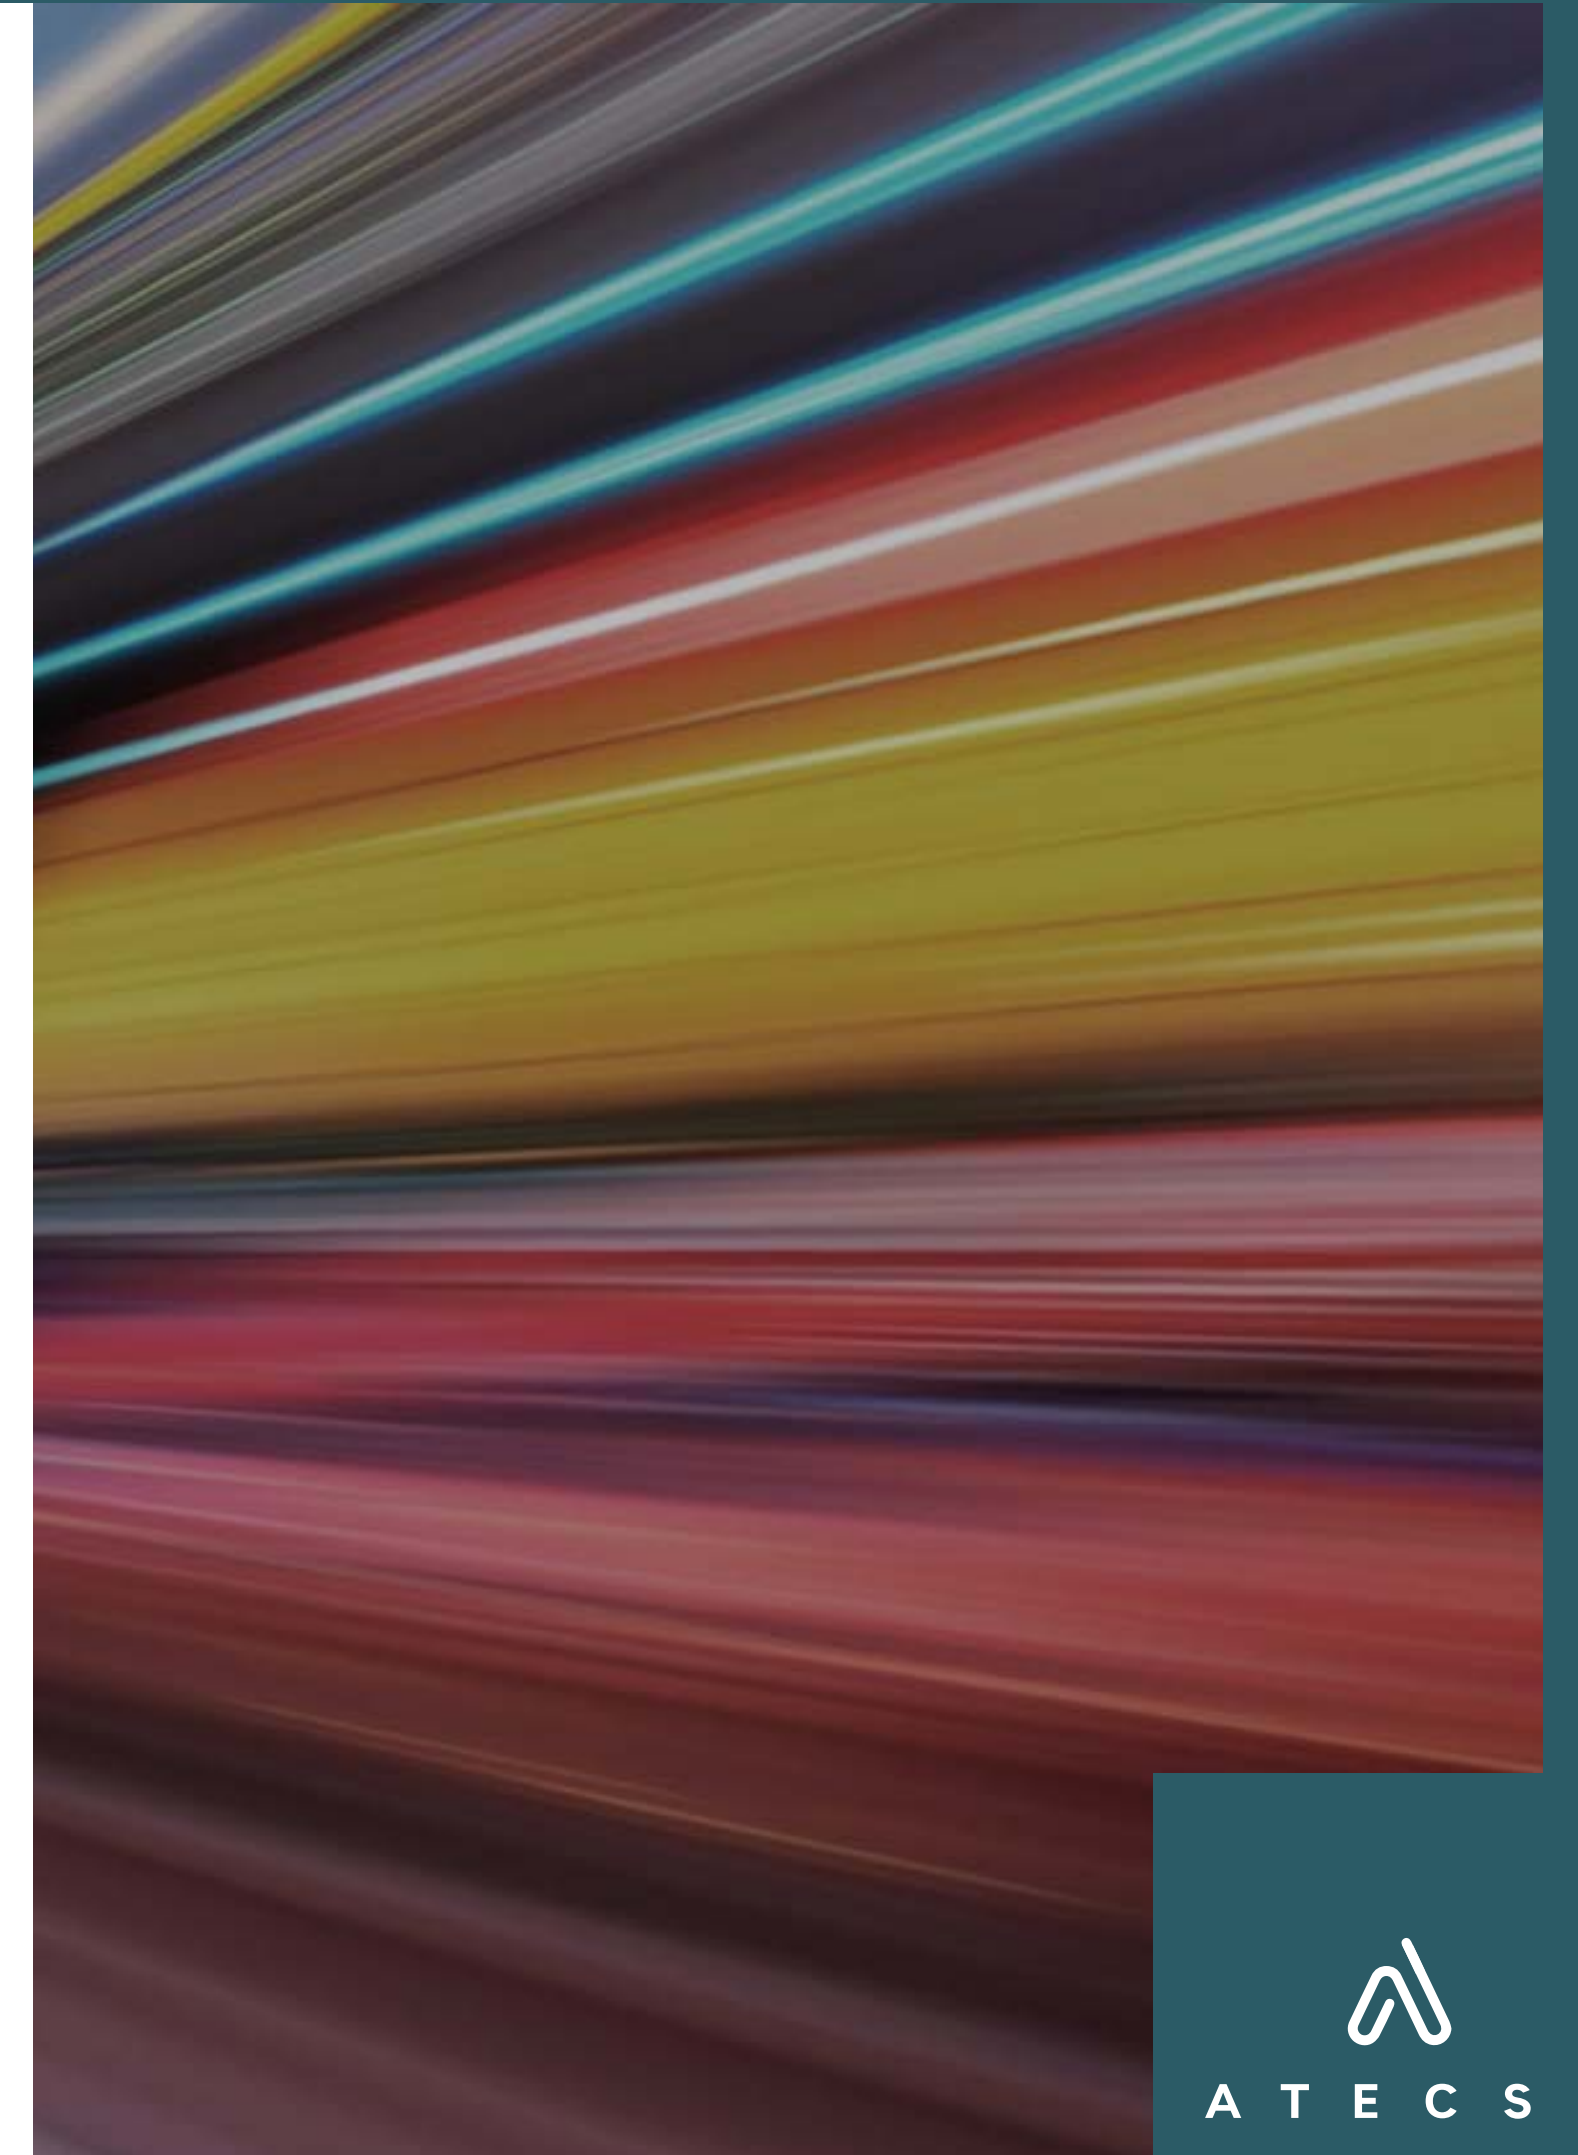

Our skills and our proactive mindset allow us to react promptly to the frequent market changes.

- **Responsiveness.**

From the first contact to the delivery without downtime. Punctuality, precision and respect for agreed conditions are the key to the relationship with our customers.

- **Competence.**

Maximum attention to product development, production process and quality of finished products.
