ABOUT US

Who are we?

Since **1997**, we have been deeply involved in the **automotive industry** as both a **manufacturer** and distributor. Our journey began with the **production of warning triangles**, which quickly became our flagship product. Our first **OEM** customer was Poland's largest car manufacturing facility, FIAT. Today, Reflex Polska stands as **Europe's leading manufacturer of warning triangles**, producing approximately **2 million units annually**. Our commitment to **high quality and rapid lead times** has made us the preferred choice for automobile manufacturers.

Over the years, we have expanded and diversified our production capabilities. We established an **in-house sewing department** that initially focused on producing warning vests and has since evolved to specialize in custom-made bags. Our comprehensive production line covers everything from design and cutting to sewing, personalization, and fulfillment.

Our product range includes:

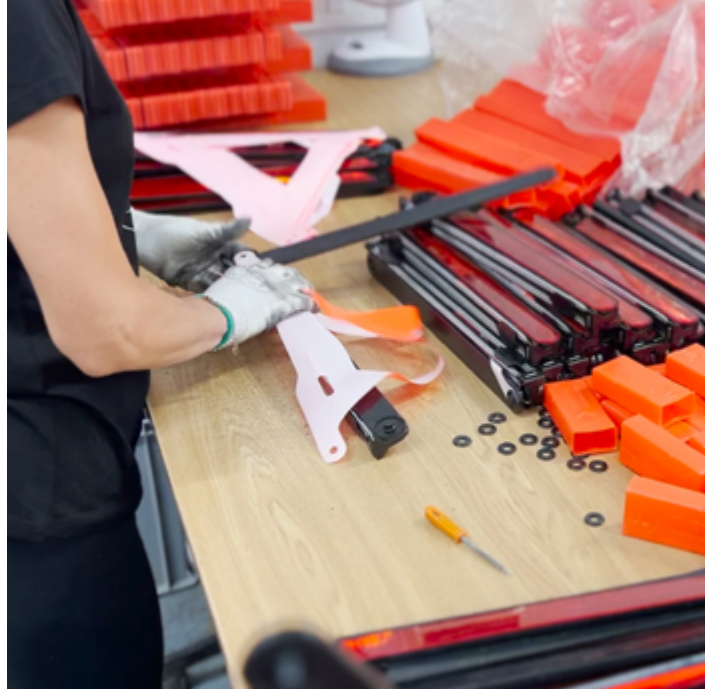

- Warning triangles
- First aid kits
- Reflective vests and warning signs
- Car accessories
- Custom-made tool bags
- Road safety kits

By keeping the entire production process in-house, we are able to offer **unmatched lead times and maintain strict quality control**.

We work with

...and many more!

Find out more about us

Quality management and certification

We are dedicated to continually enhancing the quality of our products and services, with a strong emphasis on **customer satisfaction**. Our goal is to maximize the functionality of our products while advancing production technology through **innovative solutions** and **optimized lead times**. Our commitment has been acknowledged and validated in client audits, where we consistently received top marks across all areas.

Quality is a core value that permeates every aspect of our company. Reflex Polska was **among the first companies in Poland to earn ISO 9001 certification in 1999**, and in 2017, we expanded our commitment to excellence by obtaining the **Environmental ISO 14001 certification**. This reflects the importance we place on environmental responsibility. Our dedication is evident in multiple areas: by introducing **eco-friendly** solutions like GRS fabrics and utilizing recycled materials, we minimize the environmental impact of our products. Additionally, our investment in energy-efficient machinery and a **photovoltaic plant** underscores our commitment to a greener future.

Awards

Thanks to our dedication and years of hard work, we have been honored with several prestigious awards. Forbes magazine recognized us with the "Forbes Diamonds" award, and Puls Biznesu included us in the "Business Gazelles" ranking of Poland's top small and medium-sized enterprises. We take pride in these acknowledgments and are grateful that our efforts and the quality of our services have been **repeatedly recognized in such influential rankings**. While we acknowledge that there is still much to achieve, we look to the future with optimism, anticipating further successes for Reflex Polska.

R&D department

From the very beginning, our goal has been to continuously improve our products. As warning triangles are our core product, we have invested in tools that allow us to test and implement improvements in critical areas.

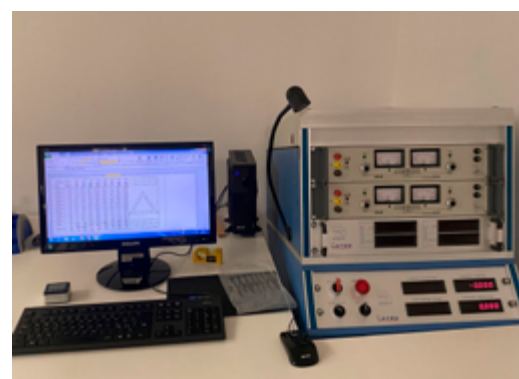

In-house wind stability tunnel

Our wind stability tunnel was constructed to meet rigorous testing standards. It enables us to ensure that our mass production meets wind stability requirements and aids in the ongoing enhancement of our products. This facility has been crucial in developing the leg solutions implemented in both of our warning triangles.

In-house retroreflectometer

The reflector is the key component of a warning triangle, and it must meet strict requirements for light reflection. This depends on various injection parameters and the materials used. Given the sensitivity of this feature, frequent testing is essential. Our advanced in-house retroreflectometer allows us to ensure the high quality of our mass production, a hallmark of Reflex Polska.

Warning Triangles

MICRO

See how our triangles
hold up in 60km/h
wind speeds

DESCRIPTION

MICRO is our flagship model that can be found in many cars on the European market. This is the improved successor of the **SUPER MINI** model that for long time was a benchmark on the market. Our R&D department allowed us to develop a triangle that is **lighter yet more stable against the wind**. Long leg span as well as special design of fluorescent material are key factors. Our yearly production of this model approaches **2mln pcs** that proves how good and reliable this model is.

- homologated according to the latest **UN Regulation no. 150**
- extremely light
- withstands wind speed of at least **60km/h**
- proudly **made in EU**

MICRO FOLD

DESCRIPTION

MICRO FOLD is the **foldable** version of our flagship MICRO warning triangle. **As inventors and patent holders** of the **first foldable triangle** on the market – **NANO**, we managed to even further improve this revolutionary concept. Always ahead of the competition **we have improved the stability against the wind** by increasing the leg span. What is unique about this model is that this was possible even though the weight was optimized.

Thanks to the **compact design** this model fits perfectly into reduced spaces like glove box or motorcycle.

- homologated according to the latest **UN Regulation no. 150**
- **compact** design
- withstands wind speed of at least **60km/h**
- proudly **made in EU**

WARNING VEST

DESCRIPTION

Our vests are fully conform with the regulations. This refers to both physical characteristics as well as reflectiveness:

- **120g/m2** grammature of the fluorescent fabric
- 0.13m2 of reflective tape that translates in minimum visible width of 65cm
- real size L in line with the sizing standard
- special Velcro sewing allowing for **adjustable circumference**
- **EN ISO 20471: 2013 + A1:2016 standard**

PROTRUDING LOAD WARNING SIGN

DESCRIPTION

This protruding load warning sign is produced according to the Italian requirements defined in art. 165 Codice della Strada.

- Material: Aluminium, HIG Reflective sheeting
- Thickness: 1.00 mm
- Reflectivity class: comply with **EN12899-1 CLASS RA2**
- Durability: up to **10 years**
- 4 metal eyelets (15mm diameter each) and rounded corners for easy mounting and safety
- proudly **made in EU**

Please note

*The warning sign must be attached to the rear end of the load. Please note that you will need **two warning signs if the load covers the entire width of the vehicle**

*Although **double-sided warning signs for Spain and Italy** can be found on the market, they are not **allowed**, because the requirements are different and two signs cannot be combined into one.

DIN 13164:2022

Personalize your first aid kit!

DESCRIPTION

This well-known first aid kit is **mandatory for every car** traveling in Germany. It is assembled in full compliance with the DIN 13164:2022 standard, ensuring it meets all the essential requirements for road safety in the country.

The contents of the DIN 13164:2022 car first aid kit:

- 1x Adhesive tape DIN 13019-A (5 m x 2,5 cm)
- 14x Set of plasters DIN13019
- 1x First aid dressing bandage DIN 13151-K (6 x 8 cm)
- 2x First aid dressing bandage DIN 13151 – M (8 x 10 cm)
- 1x First aid dressing bandage DIN 13151 – G (10 x 12 cm)
- 1x Absorbent non-woven compress DIN 13152 – A (60 x 80 cm)
- 2x Elastic bandage DIN 61634 – FB 6 (4 m x 6 m)
- 3x Elastic bandage DIN 61634 – FB 8 (4 m x 8 m)
- 1x First aid blanket (160 x 210 cm)
- 3x2 Absorbent non-woven compress (10 x 10 cm)
- 1x Triangular bandage DIN13168 – D (136 x 96 x 96 cm)
- 1x Scissors DIN58279 – A 145
- 4x Disposable vinyl examination gloves DIN EN 455
- 2x Cleansing wipes (12 x 20 cm)
- 2x Disposable medical mask DIN EN 14683 Type I
- 1x First aid manual

Optional:

- CPR MASK

DYNAMO FLASHLIGHT

DESCRIPTION

2 LED - DYNAMO - charged with kinetic energy

You no longer need to remember to recharge or buy batteries. The light source is the latest generation, long-life LEDs. The torch is **recharged by pressing the retractable lever.**

Technical specifications:

- Made of high quality materials
- Dimensions: 10 x 5 x 2.5 cm
- Power supply: kinetic energy
- Has an on/off switch
- Has a hand loop

LED FLASHLIGHT

DESCRIPTION

3-LED handheld torch with rubber housing

This practical LED flashlight is ready to use right out of the box, with batteries included. Its **rubber-coated housing ensures weather resistance and shockproof durability**. The flashlight also features a convenient **hand loop** to prevent accidental drops.

Technical specifications:

- Power (luminous intensity): 13000-15000MCD per LED
- LED lifetime: 50 000 h
- Operating time: 6 h
- Light source: LED x 3
- Material: rubber
- Weight: 93 g
- Dimensions: 150 / 37 mm (length / diameter)
- Power supply: 2 x AA (supplied)

PACKAGING AND DISPATCH

CUSTOM-MADE BAGS

Our **in-house design department** is equipped to meet any customer request for custom bag designs, including specific dimensions and constructions. Utilizing our **automated cutting line** ensures high precision for each bag component, which are then expertly sewn by our **skilled team**.

We carefully select and source all bag components directly from manufacturers to guarantee **quality**. Standard options include plastic handles, Velcro, zippers, net compartments, elastic tapes, piping for stiff edges, clear paper tag pockets, PP boards for added rigidity, and stitched seams covered by binding.

For any unique elements, our extensive local supplier network allows us to accommodate most requests.

FABRIC SELECTION

High quality fabrics

We source fabrics from **carefully selected suppliers** who meet our rigorous quality standards. Our portfolio features fabrics that comply with both **REACH** and **GRS** standards, underscoring our **commitment to environmental sustainability**. As part of our strategy, we aim to **eliminate PVC from all our fabrics by 2026**.

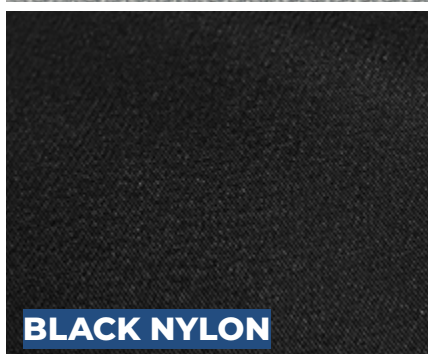

Our standard fabrics are:

- Nylon with PVC backing 70D x 190T
- Polyester 600D x 300D with PVC backing known as "cordura"
- Leatherette
- Polyester with PE backing

For special orders involving specific colors or materials, our extensive network of local suppliers is ready and **able to fulfill most customer needs**.
