## INSTALLATION BULLETIN FOR SCANIA REAR WHEEL HUBS FITTED WITH FAG KHM218248.218210 (FAG0017) TAPPER ROLLER BEARINGS

1. To ensure the correct operation of the bearings it is vital that inner bearing (7) & outer bearing (9) are packed with the vehicle manufacturers recommended grease.
2. The pre-load sleeve (8) **MUST** be fitted. This sleeve prevents torque being transferred to the bearing rollers. Pre-load sleeve part number: 1507770, Winnard HSK0032-1.
3. This bulletin is highlighting the importance of installing the pre-load sleeve and correctly greasing the bearings. When carrying out a hub / wheel bearing replacement it is essential to adhere to the manufacturers installation guidelines and examine the vehicles overall condition.

**FAILURE TO FOLLOW THE INSTALLATION PROCEDURE CAN CAUSE PREMATURE BEARING FAILURE**

## TECHNICAL BULLETIN

### DAF 7.5T FRONT / TRAILING WHEEL HUB

This technical bulletin is designed to help customers understand the difference between the older and newer 7.5T front / trailing wheel hubs and to provide installation guidance.

#### OLD HUB DESIGN

**WINNARD HUB0003NB**  
**OEM 1388905, 1391615**  
**USES FAG BEARING 566834.H195**

#### NEW HUB DESIGN

**WINNARD HUB0004NB**  
**OEM 1818004, 1699327, 2019789**  
**USES FAG BEARING 566074.H195**

**PLEASE NOTE:** While the OE and Winnard designs of these hubs have a different wheel flange configurations there are hubs available in the market that both have a similar petaled arrangement like HUB0003NB. Therefore, it is advisable to check the outer bearing diameter to identify the correct part.

HUB0003NB has a 120mm outer bearing diameter and HUB0004NB 125mm.  
 To double check this you can measure the outer hub location diameter of the hub cap.

HUB CAP 1691965 = 125mm and fits with HUB0004NB  
 HUB CAP 1339107 = 120mm and fits with HUB0003NB

HUB CAP LOCATION DIAMETER  
 120 or 125mm

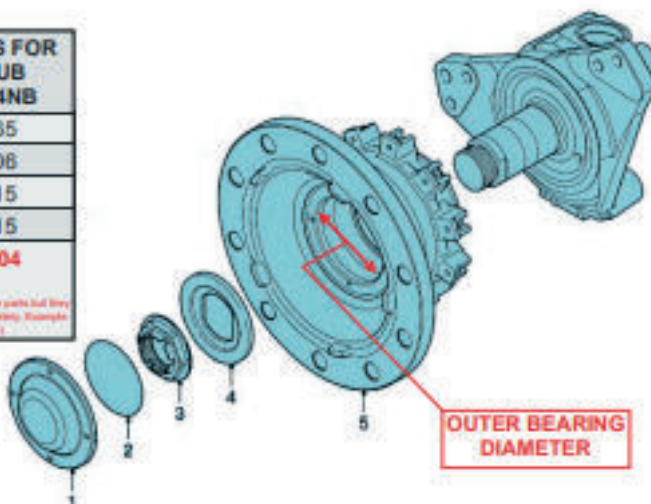

It is possible to install the newer hub, HUB0004NB, in place of the older hub, HUB0003NB, but you need to order the HUB0004NB service kit order to do so, our part number HSK0004. A service kit for HUB0003NB is also available if required, HSK0003

DESCRIPTION	ITEM	KIT PARTS FOR OLD HUB HUB0003NB	KIT PARTS FOR NEW HUB HUB0004NB
HUB CAP	1	1339107	1691965
O-ring	2	393841	1692506
Axle Nut	3	1396606	1697215
Locking Plate	4	1385327	1692215
<b>WINNARD SERVICE KIT PART #</b>	<b>1-4</b>	<b>HSK0003</b> <small>(It contains all the above parts but they may be purchased separately. Example 1692215-1)</small>	<b>HSK0004</b> <small>(It contains all the above parts but they may be purchased separately. Example 1692215-1)</small>

When installing the new hub, HUB0004NB, on an old axle mount the locking plate so that the axle nut (3) fits in the recess.
