

Product code Cod. 1- 07579 750 ml

ELECTRICAL CONTACT SPRAY

Effective electrical contact cleaner especially for car repair. Removes oxidation from electrical contacts and conductive surfaces. Cleans electrical components from dust, grease or oil. It protects the metal from oxidation and allows the current to flow. The contact spray design is ideal for use on objects that carry electricity such as electrical tools, buttons, switches, spark plugs, spark plug wires, circuit board switches, sockets, cables, fuses, plugs, and generally all electrical systems that have to be protected from moisture. The contact lubricant spray will help clean the corrosion with the use of a fine brush

- Prevents startup problems caused by moisture
- Leaves a thin film of protective oil
- It is waterproof and repels moisture
- Resistant to water, salt, weak acids.
- Offers excellent adhesion and corrosion protection.
- Excellent penetrating properties

Always use in a well-ventilated area and avoid contact with the skin as well as inhalation of the product.

Avoid immersing sensitive and painted parts in the product for a long period of time.

MSDS safety data sheet is provided to anyone interested in from the official website of the manufacturer www.exatom.eu
