

HYPER SPRAY

ULTRA PROTECTIVE PENETRATING OIL AND HYDRO DISPLACER FOR CONTACTS AND PARTS

Κωδικός προϊόντος Cod. 1-07579 750 ml

Top water displace - lubricant that displaces water and moisture from mechanical and electrical systems and installations. Immediately repels water and moisture from cable electrical installations and ignition systems in cars, trucks, motorcycles, marine engines, agricultural vehicles, earthmoving vehicles, electric motors and generally from all electrical devices. Leaves a protective lubricating coating on applied surfaces. Very necessary for use in car repair shops in industrial facilities in electrical installations. Ideal for use on marine engine electrical wiring that is prone to moisture and water! Excellent application on guns and their accessories because it works very well in terms of cleaning performance and friction reduction. Be careful when using the product on sensitive plastics and rubber.

- Completely displaces water and moisture
- Absolute protection against water and moisture on switches and plugs
- Excellent application in relays and wiring of marine vessels, cars and especially heavy vehicles such as trucks, trucks, excavators, etc.
- Cleans, lubricates and protects all weapons and their accessories
- Extinguishes small fires and is non-flammable
- Instantly cools overheated components
- Does not contain silicones
- Very long duration of action
- Does not affect tires and seals

To be used only by professionals, always in a well-ventilated area and to avoid contact with the skin as well as inhalation of the product.

Safety data sheet MSDS is provided to anyone interested from the official website of the manufacturer www.exatom.eu
