

CATALOGUING

Crucial to any parts supplier is the quality of the cataloguing, therefore we are 100% committed to ensuring that our data is leading in terms of coverage. With a comprehensive range of over 40,000 references, it is vital to be able to accurately link them to the correct application. This is why the company invests heavily in ensuring that the research and data mapping is carried out to a consistently high standard and is recognised by the Premier Data Supplier accreditation from TecDoc.

A dedicated team of cataloguing specialists work daily to ensure that the vehicle data is maintained, and that all necessary information required to accurately identify the product is easily viewable, so that distributors can confidently supply our products, minimising the need for sending out multiple parts.

To further aid the efficient identification of many product groups, we have added technical layout drawings and 360° imagery, which has reduced the look-up time significantly. Plus, registered distributors also have access to other key features, such as stock availability, pricing, online ordering and access to our marketing and returns portals.

All products can be identified clearly in our leading online catalogue, WebCat. Plus we are a certified supplier to MAM AutoCat and a premier data supplier to TecDoc.

**POSITIONING IMAGES**
Clear and simple part identification

**LAYOUT DRAWINGS**
Reduce look-up time significantly

**360° IMAGERY**
Every detail seen clearly

**STOCK CHECK**
Live stock availability

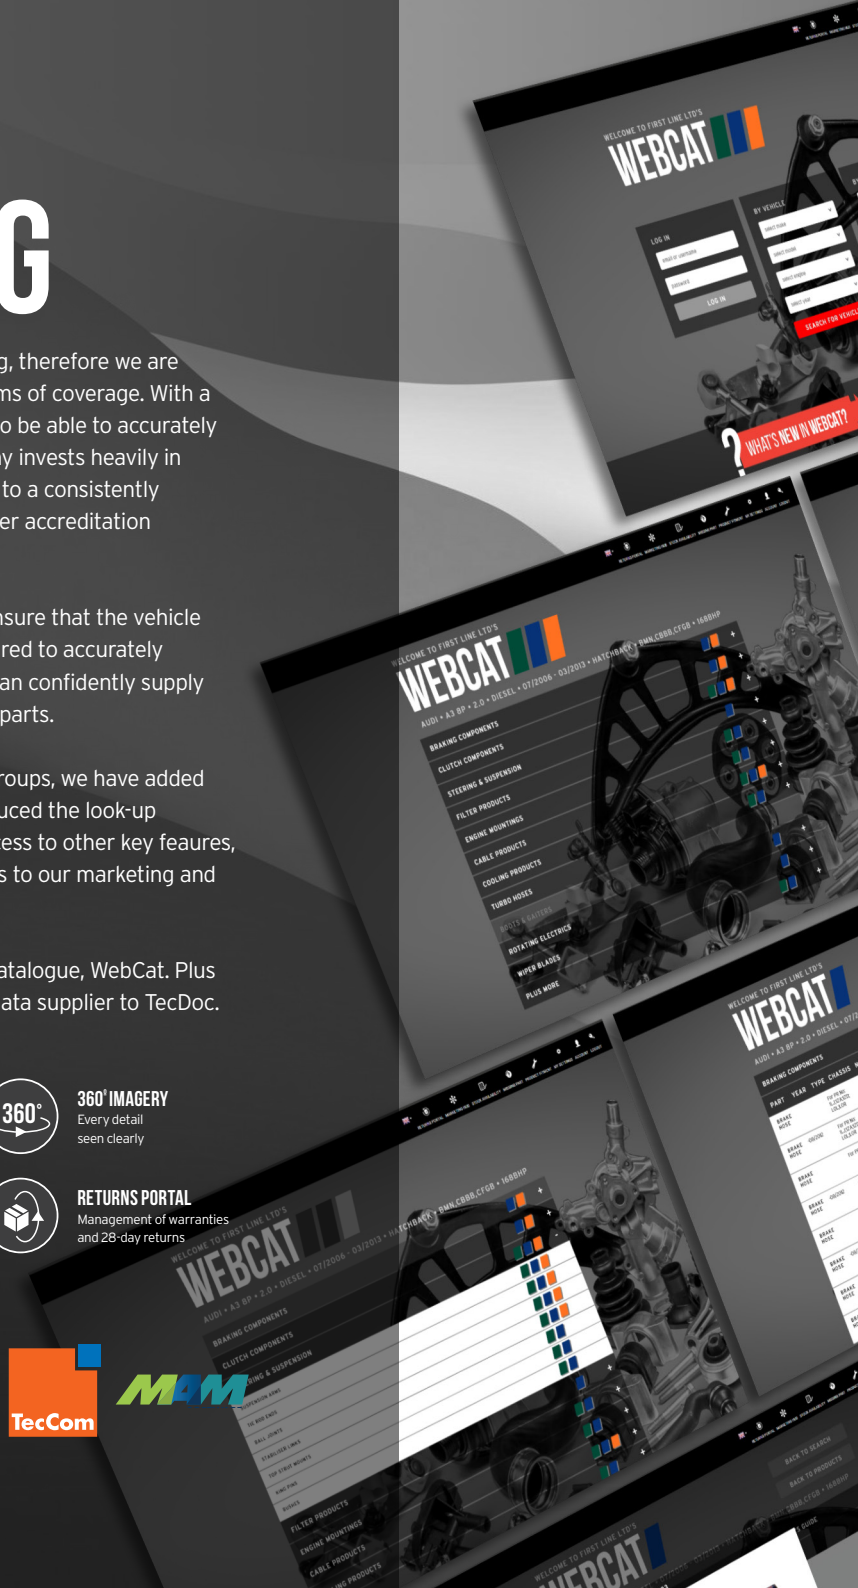

**ONLINE ORDERING**
Fast and efficient ordering

**RETURNS PORTAL**
Management of warranties and 28-day returns

BORG & BECK

Borg & Beck is an established world-wide supplier of premium quality automotive components to the aftermarket, with over 100 years' history of engineering excellence and OE heritage.

Starting life back in 1903 and being the first to patent the sliding clutch, Borg & Beck has been a trusted brand by some of the world's largest vehicle manufacturers, in fact there was a time when Borg & Beck Clutches were originally fitted to almost every single British-made vehicle.

In 2006, the Borg & Beck brand was purchased by First Line Ltd, who have invested heavily in new product development to bring the range up to date and increase the product portfolio. Today, the brand is a vital part of the company's global growth ambitions and now offers a portfolio of over 40,000 references across 60+ product lines and is available globally to the world's aftermarket.

WELL ESTABLISHED

A brand with over 100 years' of engineering excellence and OE heritage

DEPTH OF RANGE

Parts for modern and classic cars, LCV, and truck

EXCELLENT AVAILABILITY

Providing an average of 96% availability

PREMIUM QUALITY

Products from an ISO-accredited company

AWARD-WINNING SERVICE

Industry leading in the aftermarket

60+ Classic Clutch references covering 250+ applications, all of which had Borg & Beck fitted as OE!

Over 100 years' of engineering excellence and OE pedigree. Inventors of the first practical sliding clutch in 1910.

In-house, UK-based, Clutch Technical Test Facility for quality control, product development, and technical support.

65+ Single Mass Flywheel Conversion Kits in range, perfect for those applications that need a more durable solution.

CLUTCH COMPONENTS
1,600+ REFERENCES

Discs with high carbon content, matches OE dimensional specification. Fully coated to prevent corrosion and improve thermal efficiency. Can be fitted straight from the box.

Pads manufactured using a fine, semi-metallic, copper-free formulation, grooved and chamfered, with multi-layered shim technology to provide outstanding noise reduction and anti-rattle qualities.

ECE R90 approval across the range of Pads, Discs, and Shoes where required for complete peace of mind.

500ml & 1L DOT 4 Brake & Clutch Fluid also available.

BRAKING COMPONENTS
7,900+ REFERENCES

Components manufactured to exacting OE specification, e.g. Hybrid style Link Bars & Hydraulic Bushes.

Over 60 HD Stabiliser Links in range to cater for vehicles where a higher specification than OE is required to provide a more durable solution.

Layout positioning images within WebCat for accurate look-up.

Ball Joints, Suspension Arms & Link Bars are supplied with all the necessary fittings as standard, where applicable, for a complete solution.

STEERING & SUSPENSION
9,100+ REFERENCES

Including Brake, Clutch, Accelerator, Speedo, and Gear Control Cables.

Market leading range of Gear Control Cables offering over 270 references for LHD & RHD models.

Offering a range of Brake Cables for vehicles fitted with electronic handbrake systems.

Technical layout drawings within WebCat for accurate and efficient look-up.

CABLES
2,600+ REFERENCES

Latest specification Thermostats supplied with electronically controlled elements and reinforced housings for Citroën/Peugeot applications.

Premium quality seals, bearings and dynamic seal packs used in our Water Pumps for optimum performance. Supplied with gaskets where required.

Includes a leading range of primary and secondary Electric Water Pumps, providing a complete solution.

360° images available within WebCat for accurate and efficient look-up.

COOLING

DRIVELINE
60+ REFERENCES

Technical layout drawings within WebCat for accurate and efficient look-up.

Manufactured to OE specification, with no synthetic fillers, to ensure optimum performance & longevity.

Premium quality bearings manufactured to OE specification, pre-lubricated & supplied with additional grease sachet where applicable.

360° images available within WebCat for accurate and efficient look-up.

Includes Active Sensor Bearings & Face-Spline Hubs as seen on Vauxhall/Opel Insignia and BMW X3, X4, 2/5/7 Series respectively.

All inclusive - Wheel Bearing Kits are supplied with all the necessary components as standard.

WHEEL BEARING KITS
1,000+ REFERENCES

Over 35 Hose Clips available to supplement the range.

Over 70 Engine Hoses available including Air Filter, Air Flow, Crankcase, Heat Exchanger, Intake Manifold and Emission Hoses.

TURBO & ENGINE HOSES
850+ REFERENCES

Cellulose or synthetic Air Filter media selected to match OE specification to ensure 99.9% filtration efficiency and provide optimum engine performance.

Oil Filter elements within the filter e.g. the media paper, valves, and springs meet the OE specification requirements to maintain high quality filtration and reduce wear.

Fuel Filter media specified to meet the requirements of each engine manufacturer to ensure optimum fuel purity and reduce wear of engine parts including injectors, fuel pumps and pressure valves.

Cabin Filters available in either standard or activated carbon, to remove 99% of harmful pollutants found in the air. Fitting instructions included with each reference.

FILTERS
