LIFE IS A JOURNEY

Beautiful fragrances are our passion, that is why we are happy to present an innovative way to refresh your world of fragrances.

Invame is a new car perfume brand, born out of passion for beautiful fragrances. Made in Poland, created by the best European perfumery specialists.

The latest technologies, allowed us to obtain a unique fragrance enclosed in a polymer. Designing the fragrance, we took into account an

exclusive look, longlasting fragrance release and the safety for the car's upholstery and cockpit.

Reaching for the original Invame collection, we want our fragrances to make your time pass by, while traveling by car. We want the air to revive your senses. Thanks to the functional attachment with a simple universal clamp, it can be easily positioned on the air vents of any car, both vertically and horizontally.

When you turn on the airflow, it will release the perfume smell. The air enters the center of the fragrance, distributing beautiful and modern fragrances.

PREMIUM **ALUMINIUM**

ORIGINAL CAR PERFUMES

Invame is a brand creating sophisticated car fragrances closed in a designer form. Carefully selected fragrance notes from the leading Italian producers allowed us to create an extraordinary collection that will satisfy the tastes of the most demanding customers.

Aluminium Cover

Yet, the scent itself and the material in which we place it is not enough – we also need a subtle, elegant case that will match the interior of our car. That is why we chose aluminium as one of the first materials we've ever used.

It seems obvious to us that a fragrance cover made of aluminium, as a metal commonly used in car interior decorations, would perfectly blend in with the other elements of the dashboard and air vents.

Aluminum housing available in 3 variants

WINVAME

We offer multiple colours of the aluminium cover. We can decorate your aluminium case with laser engraving or full-colour printing.

Types of scents

ORIGINAL CAR PERFUMES

Thanks to the large printing surface, our car perfumes can be compared to small billboards inside a car. As we spend a significant amount of time in a vehicle, there is no better possibility to approach clients.

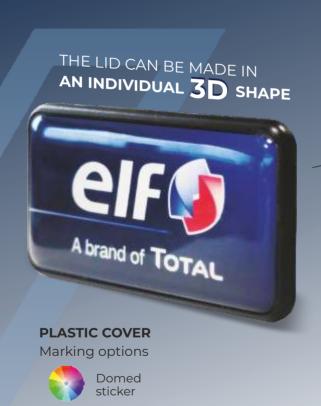

Plastic Cover

Rectangular plastic cover with matt finish. Full colour illustration finished with transparent polymer resin on the lid.

WINV/ME

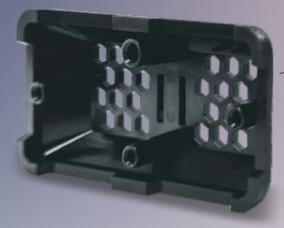

Car fragrance personalized with a polymer resin is the best choice if you are interested in colorful designs. Thanks to the rectangular shape, it is possible to place many details in the project.

ORIGINAL CAR PERFUMES

Not only the look of our products is unique. We offer carefully selected scents which match every taste. We also give the opportunity to produce car perfumes with the custom scent like a coffee or chocolate.

Round plastic cover with matt finish. Full colour illustration finished with transparent polymer resin on the lid.

Elegant car fragrance, perfect for circular graphics. Small yet memorable due to the vibrant colours which may be presented on the plastic cover.
