

BOOTS

**MADE IN
SPAIN**

Transmission

Steering

Shock absorber

MAINTENANCE

- Dust boots are what protect your vehicle's crucial joints from road dust, dirt and humidity.
- When they wear out or break, they can open the door to serious problems, such as corrosion and premature wear of the transmission, steering or shock absorbers which can lead to costly repairs and jeopardise your safety on the road.
- Regularly checking and replacing these bellows is vital to keep your vehicle in good condition and ensure a safe and trouble-free drive.

TRANSMISSION BOOTS

Universal kits are available for cutting:

D8000E for passenger cars.

D8500E for vans and 4x4.

In addition, we have more than 700 specific bellows for each vehicle. All kits include grease and two metal clamps for correct installation.

STEERING BOOTS

Universal kits are available for cutting:

D8901E for manual steering.

D8902E for power steering.

In addition, we have more than 800 vehicle-specific bellows available. All kits include two plastic clamps for correct installation.

SHOCK ABSORBER

We have more than 300 vehicle-specific bellows.

Quality control

- We control the composition of our parts.
- They withstand temperatures between -40°C and 150°C.
- We monitor the entire manufacturing process, from raw materials to packaging.

ISO 9001:2015 & IATF 16949:2016
