and related mechanical power transmission

From the Chairman's DESK

Mr. Amarpal Sethi

PIX, with its steadfast determination, perseverance, and commitment to its values, has clocked several significant milestones in its relatively short, yet remarkable existence. We have grown from strength to strength over the years thanks to the immense contribution of our employees, vendors, and customers.

Our Vision can only be realized by consistently creating demand and creating a robust operating ecosystem. We follow ethical business practices, core Company values, while deploying the latest technical tools to continually improve. Keeping things simple has the advantage of requiring no additional effort to improve safety, sustainability, or high products quality.

PIX is amongst the leading manufacturers in the global mechanical Power Transmission industry with an extensive range of high-performance V-Belts, Timing, and Poly-V belts to suit a wide array of Industrial, Agricultural, Lawn & Garden, and Automotive applications. The company has been at the forefront of technological advancement in this space through continual investment in state-of-the-art manufacturing facilities, an ultramodern, fully-automated Rubber Mixing plant, a cutting-edge Distribution facility, and highly sophisticated testing centres, managed by a dynamic team of talented professionals.

As a responsible manufacturer of the global business community, together with our various process stakeholders, we aim to contribute to building a clean, green, and sustainable future in harmony with our environment.

public

AMARPAL SETHI
Chairman and Managing Director

The vision of PIX is to be a dominant, global player in the mechanical Power Transmission industry in terms of revenue and brand equity by developing and delivering a broad range of highly innovative, reliable, and price competitive solutions backed with unmatched customer care.

SUSTAINABILITY

At PIX, we are deeply committed to sustainable industry practices towards safeguarding and enriching our environment as well as ensuring human health and safety to drive balanced business growth.

Environmental sustainability is achieved by

- · Use of eco-friendly material and practices in manufacturing.
- Ensuring PIX products are free from any candidate substance of high concern.
- Effluent Treatment Plant and recycled water.
- · Use of alternate forms of clean energy to power our various processes.
- Planting trees on and off campus.
- Water harvesting.
- · Contribution to the local community for green initiatives.
- Awareness training to staff for resource conversation and waste elimination.
