## The BTS Reman Program

Remanufactured turbochargers of the series manufacturers

BTS supports the trend towards sustainable and resource-saving vehicle repair with its exchange parts program.

### BTS Reman stands for:

- Economic efficiency
- Environmental protection and conservation of resources
- OE quality
- Industrial, high-quality processing
- Premium-quality turbochargers with the same warranty

## The BTS Budget Program

BTS Budget is the turbocharger for repairs in line with the vehicle's current value. With this product range BTS offers the perfect solution for older vehicle models and a cost-effective alternative.

The alternative turbochargers, naturally in the well-known BTS quality, are available for a wide range of vehicle brands.

The 2nd Generation is here!

## Turbocharger Diagnostic Tool

Quick diagnostic test of crankcase pressure, exhaust backpressure and pneumatic boost control – allows testing without OBD tester.

- High quality aluminium design
- Digital gauge
- For diesel and gasoline engines
- Also for vehicles without dipstick
- Diagnosis carried out while driving

## Turbo Service Set

The complete set that covers all your needs when replacing your turbocharger

The Turbo Service Set is available for all three product ranges: BTS Original, BTS Reman, BTS Budget.

The BTS Turbo Service Set includes:

- Turbocharger
- Mounting kit
- Oil inlet line
- Oil outlet line
- Initial filling additive

### Convince your Customers with BTS Products!

- For a technically sound and comprehensive repair
- Exclude sources of errors
- Replace all necessary parts
- Prolong the service life of the new turbocharger
- Avoid troubles due to claims for consequential damage

## Mounting kit

All Mounting Accessories in one Box!

The BTS mounting kits are perfectly matched to the application and contain all mounting parts in a compact box in line with the manufacturer's specifications.
