## PERFORMANCE SUPERKIT

## PERFORMANCE BRAKE CALIPER REPAIR KIT

## TEMPERATURE STRIPS

## NEW FRENKIT PERFORMANCE LINE INCLUDE HIGH PERFORMANCE COMPONENTS

- **Pistons:** OE specifications and specific Performance pistons for racing calipers.
- **Performance dust boots:** made of silicone material developed under our specifications, will not crack under very high temperatures.
- **Performance piston seals:** completely developed and formulated by FRENKIT, new seals offer more durability and confidence in extreme heat conditions than the standard components.
- **Temperature strips:** every kit includes a custom FRENKIT temperature indicator strip. It is applied directly to the brake caliper and indicates the maximum temperature achieved.

Frenkit Performance components have been tested both in laboratory and on racetrack under extreme conditions.
