FORGING THE FUTURE

**Mfg. & Exporter of
All Types of Closed Die Forging**

REVOLUTION IN FORGING

The Company

Imperiall Technoforge Private Limited (ITPL) was founded in 2012 by Mr. Sameer Patel , Mr. Kalpesh Patel and VP Group in the industrial hub of Rajkot (Gujarat) India. ITPL Forging is a very young company which has grown as one of the leading manufacturer of steel forging components for both domestic & international markets. We have a manufacturing facility with approx. 100,000 sq. ft. of area. ITPL is an ISO 9001:2015, AED PED Certified, BEML and DEFENCE approved company. Our primary objective is to provide world-class quality products at competitive prices and fast delivery.

Determined to Progress

Our Philosophy

With constant value addition to products and services enhancing customer satisfaction through innovation, upgraded technologies, excellence and maintaining the reputation as a world class supplier of quality Forged Components.

Mission Statement

To lead by example by achieving highest levels of quality through a winning combination of state-of-the-art technology, excellent service, ethical marketing and pricing and following cost-efficient manufacturing procedure that ultimately leads to optimum customer satisfaction.

Social Responsibility

We do acknowledge our society to which we owe so much. Apart from being a leading provider of quality forging products we have been an accountable organization with a sense of social responsibility to serve the society with human welfare activities and contributing to learn, grow, acquire new skills, better their lives and doing so, better the society as a whole. We will encourage employee involvement in community programmes and socially responsible activities.

Health & Safety

We are committed to maintaining a safe, healthy and effective working environment for all our employees. We strive to provide an injury - free work environment. For that to happen we have designed all our production equipments to meet our stringent safety requirements and standards. A regular maintenance of all equipments makes sure that the equipments failures and accidents are minimized. We specially train our employees how to handle and be cautious about hazards pertaining to toxicity.

Environment

We try to minimize the environmental impact by making our manufacturing processes environment-friendly and energy-efficient. We streamline our use of materials and energy in a way that reduce the total usage. We also work on reducing and phase out hazardous materials at our production set-up. We believe that environmental protection is a management responsibility as well as the responsibility of every employee of the company. We will respect the places where we do business by endeavoring honestly in preserving environment as we cherish nature.

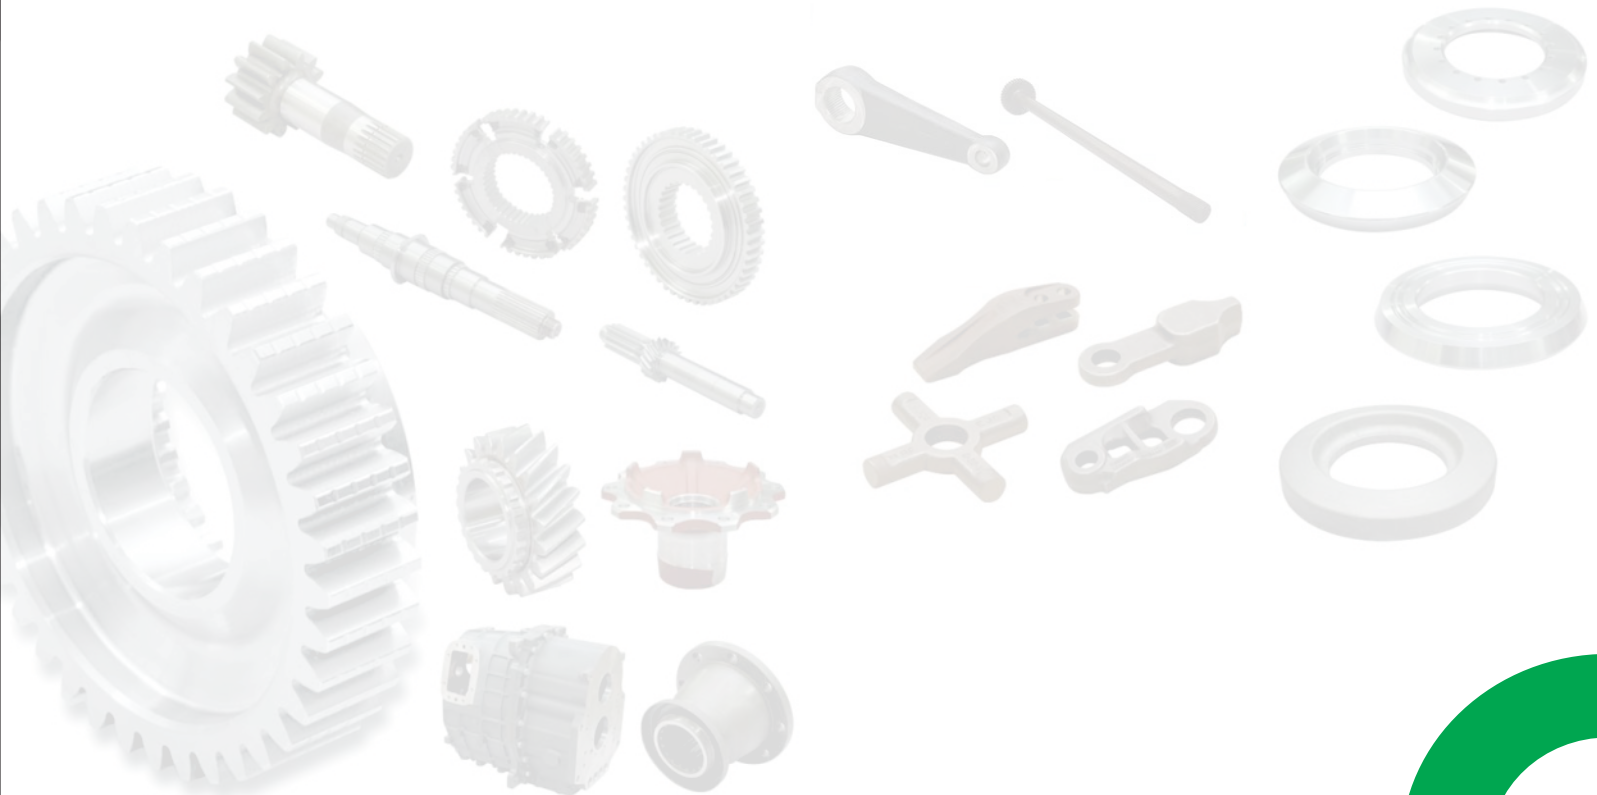

Imperiall Advantage

Dependability and sustainability are what defines Imperiall Technnoforge. We promise absolute best quality products, rapid response and excellent customer services. Our advanced technology makes us one of the best steel forging component manufacturers in the country having the entire basic infrastructure to produce quality forged components. We cater to the fields like Automobiles & Refineries and many other Industrial Forgings.

We are a quality conscious organization offering a vast range from forged to fully finished machined components to provide total product solutions to our customers.

Our sections of tool and die development, machining and inspection and testing offer outstanding in-house services. With an appropriate working environment, we inspiredly excel and deliver the best in terms of value and services, Our Skilled, qualified and motivated team gives its cent percent to uphold our high levels of performance. We approach changes with an open mind and always keep ourselves ready for progress. We ensure that our operations are always eco-friendly.

Advanced Technology

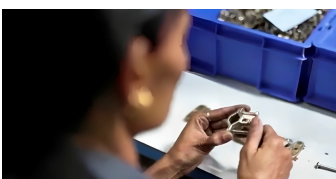

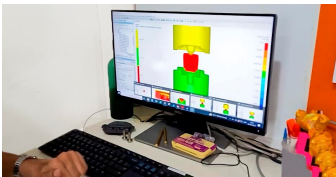

CUSTOMIZED FORGING SOLUTIONS

ITPL offers completed range of forging products at very competitive prices. with highest level of precision in our products and subject them to stringent quality checks during the manufacturing process. It results in excellent quality and long durability.

ITPL produces many different parts and makes its forgings by using Drop Hammers. Almost all forgings it makes are custom made as per customers drawing and specifications. ITPL also undertakes reverse engineering on components, if drawings / specifications, parts are forged in carbon, alloy and stainless steel and can range in weight from few hundred grams to 180 KG. Components can be supplied in as forged of semi / fully finished CNC turned condition. Special packing is provided for finished components.

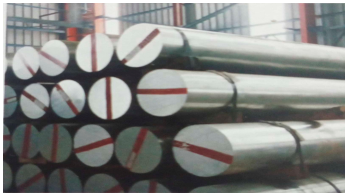

For ITPL, technology is and engineering application to achieve a goal of solve a problem. Therefore keeping in view of this definition the ITPL has always adopted new technologies in order to create a distinct place in the “Manufacturing Industry” to serve its valued clients round the globe.

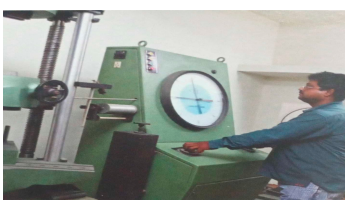

Infrastructure

Our sound infrastructure has the basis of modern facilities employing technologies that gives solidity to our core competence.

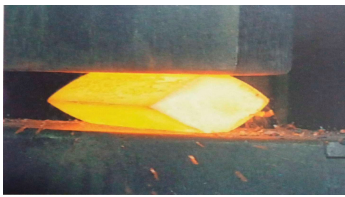

Raw Material Testing Facility

We ensure that the quality material used by us is tested with precision and dependability with the modern equipments. This is part of our commitment to remain quality conscious at every stage.

Inspection and Testing

We have a chemical testing lab as well as physical testing lab with Hardness Testers. Metallurgical Microscopes, Universal Tensile Testing Machine, Izod Testing Machine and Measuring Devices.

Forge Shop

Our Forge Shop is well-equipped with 5 Tons, 3 Tons and 1 Ton Hammers, Trimming Pressers with Pusher Type Furnaces with temperature indicators.

Die Shop

It's a fully equipped hi-tech Die shop with CNC Turning Centers, well-supported with allied machinery.

Shot Blasting Shop

This is a metal laundry. Forgings require cleaning before machining. This Involves more perfection in surface inspection.

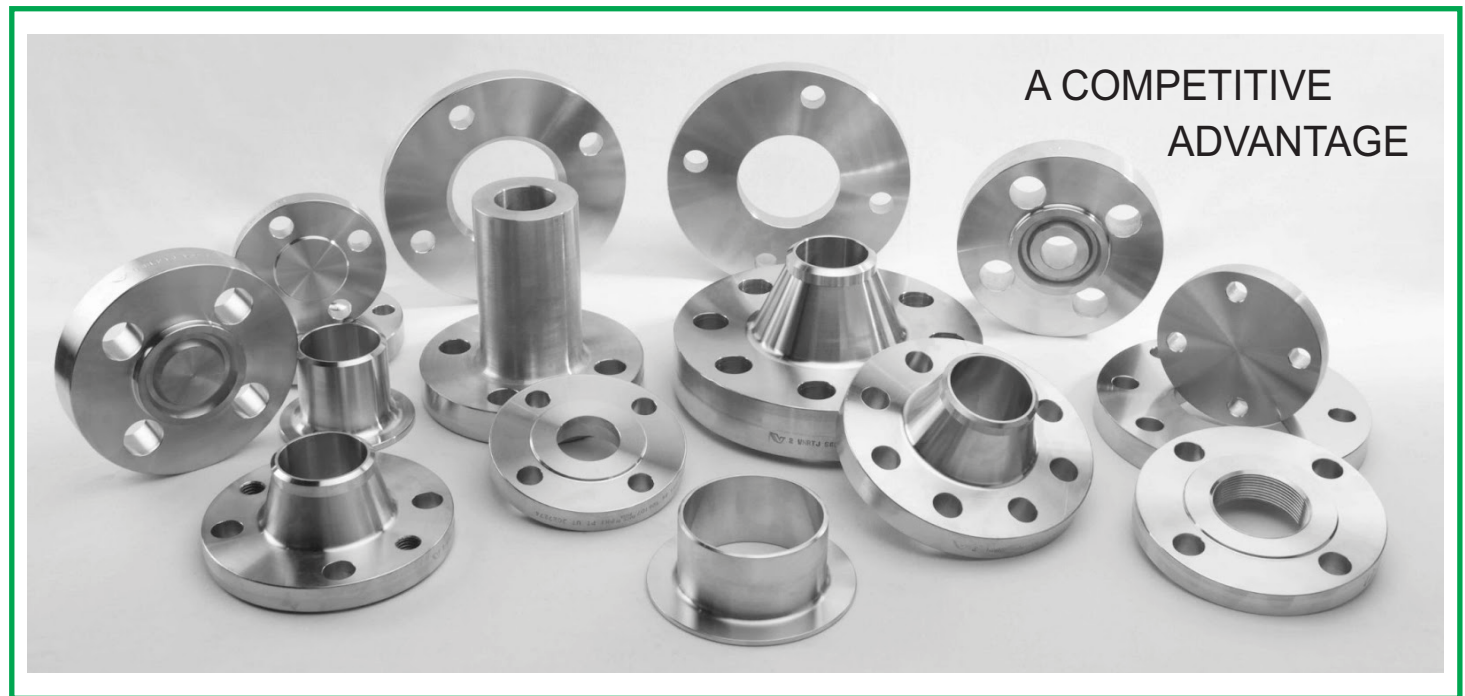

Strength

Quality Assurance

We aim to reach the peak of perfection by manufacturing engineering products that are innovative and of high quality. We follow a meticulous Quality Management System. At all stages of manufacturing, we have employed a process control system by which automatic inspection reports are generated to keep everything within limits. The product parameters are well-specified at every level as well as with the metrical accessibility and its condition at the process level. A visual board helps for tool setup, planing and special instructions.

Quality Objectives

- Increase Customer Satisfaction □ 100% on-time delivery □ Zero percent rejection
- Continuous process improvement □ Training and development of employees
- Latest infrastructure □ Strict adherence to safety norms

Quality Policy

Our approach will be customer centric. We are committed to make persistent efforts to satisfy the customer by producing quality products in accordance with their needs at highly competitive prices

Quality Certification

Imperiall Technoforge Pvt. Ltd. is an ISO 9001:2015 & AD PED certified company follows stringent quality norms throughout its manufacturing process to achieve optimum satisfaction.

Core Values

For the benefit of all concerned

We concentrate on product quality through consistency in production process, that is being enhanced with heedfulness to our customers requirements to always deliver the maximum value to them which is ultimately beneficial to all stakeholders

Integrity & Ethics

We are committed to operate with honesty and adhering to our values any given level.

Changes is the only constant

We always strive to introduce change with innovation from time to time an enterprising spirit, teamwork and creativity,

Customer Satisfaction

Customers are at the center of our planning and we keep strengthening our relationships with them in order to maximize growth and profitability. "Forging Relationships" means to exactly know how customers would make their choices and using it for the mutual benefits

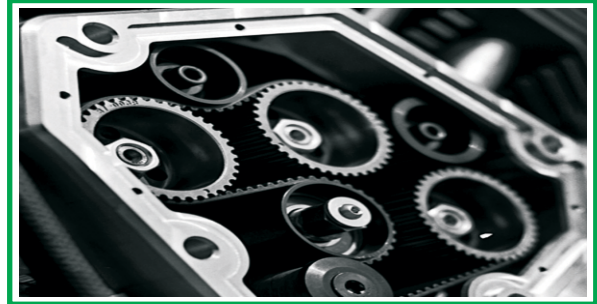

FORGING RELATION

A large, stylized image of two hands shaking, symbolizing a partnership or agreement. The handshake is set against a background of a city skyline with mountains in the distance. Overlaid on the image is a network of white lines and dots, resembling a circuit or data flow, which connects various points across the scene. The overall color palette is dominated by blues, greys, and a warm orange glow from the handshake.

Major Sector

OIL & GAS

AUTOMOBILES

PIPES & FITTING

PETROCHEMICAL

RAILWAY

ELECTRIC TRANSMISSION

DEFENCE

EARTHMOVING

Why IMPERIALL ?

❑ **STRONG MANAGEMENT TEAM :**

The Management Team is comprised of highly qualified Chartered Accountants, Engineers, MBAs, hence represents a strong management reputation in the forging industry.

❑ **DEDICATED EMPLOYEES :**

Has a pool of skilled man-power towards a common goal and vision.

❑ **LATEST MACHINERY :**

Equipped with latest technology which proves Imperiall best in the market in terms of quality.

❑ **ZERO OUTSOURCING :**

Imperiall believes in quality, so to keep that quality level at 100% it operates through its fully fledged in-house facilities.

❑ **100% ON TIME DELIVERY :**

Due to the above factors Imperiall has been able to finish its order on time and follows one of the best management approach i.e. JIT (Just-In-Time).

❑ **DEDICATED AFTER SALE SERVICES :**

We believe in Feedback And Improvements that go along. We are not just the provider to our customers but we believe in long term relationships, so we provide up to the mark after sale service.
