## ➤ Low profile trolleys

- Standard or on the customer demand

### Hint points

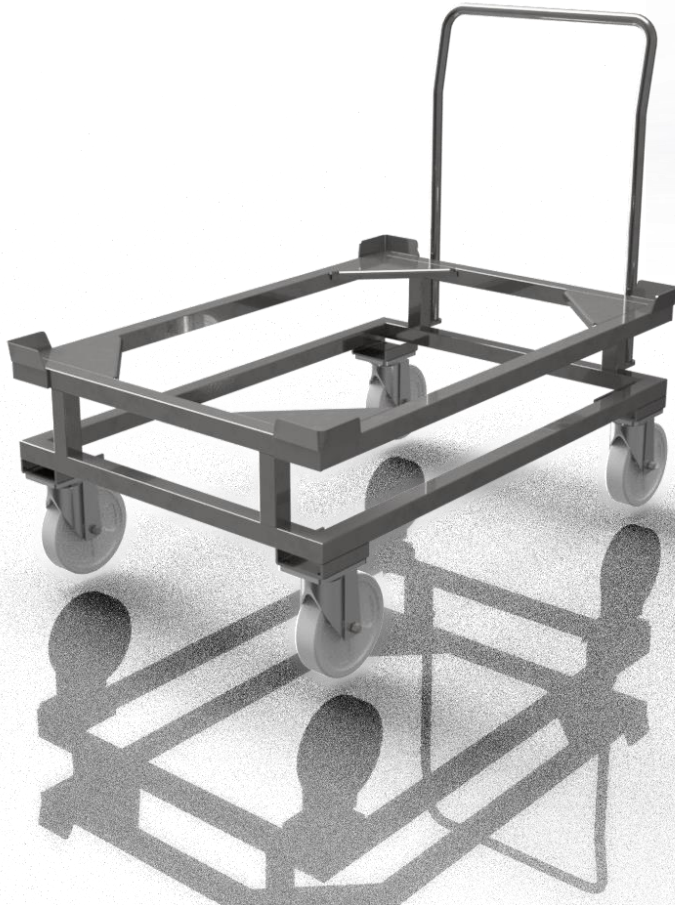

1. Purpose
  - Transport of plastic boxes and pallets.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ High profile trolleys

- Standard or on the customer demand

### Hint points

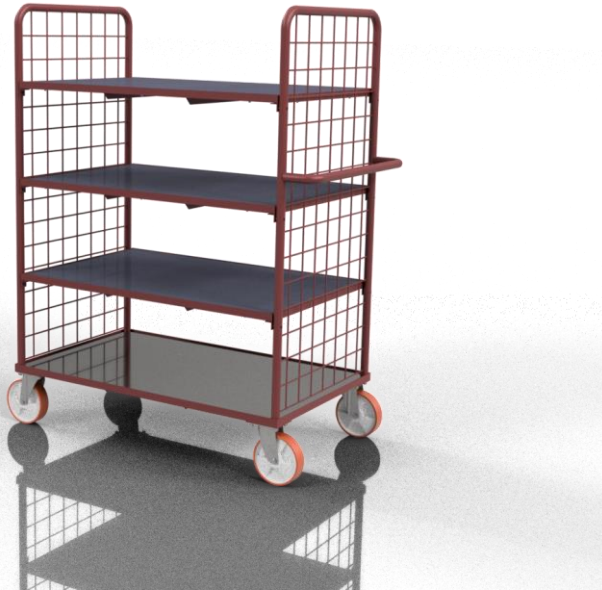

1. Purpose
  - Transport of plastic boxes and pallets.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Trolleys with shelves

- Standard or on the customer demand

### Hint points

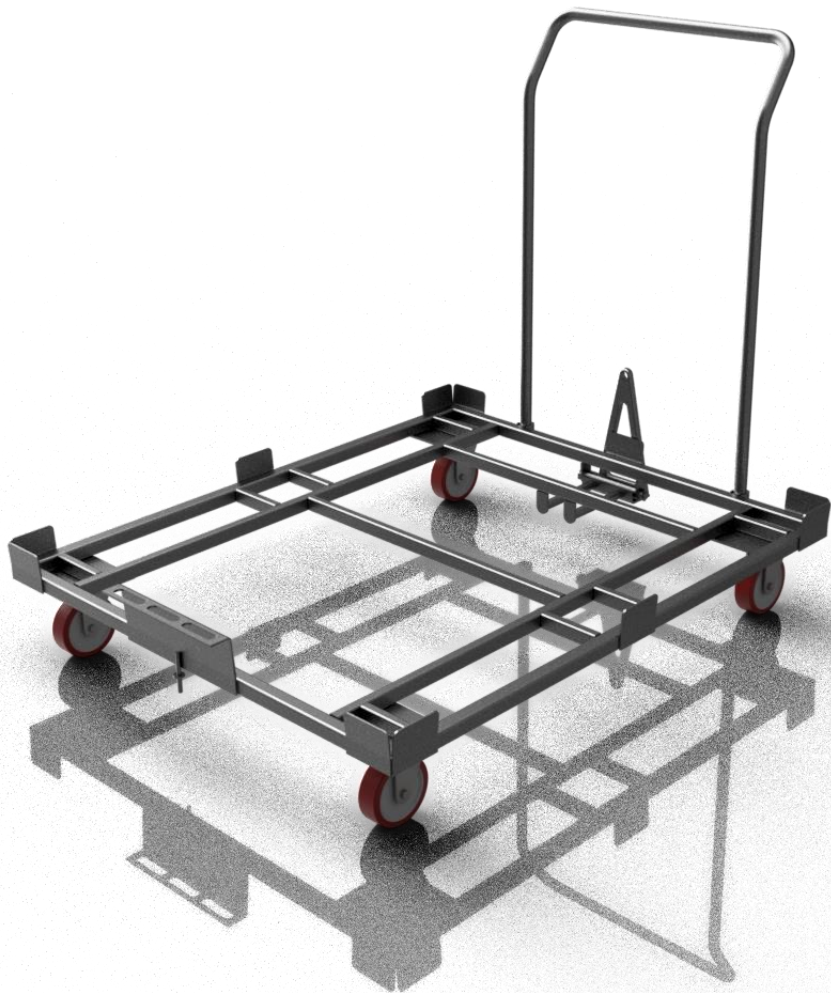

1. Purpose
  - Transport of plastic boxes and pallets.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Trolleys for „Milk Run” composition

- Standard or on the customer demand

### Hint points

#### 1. Purpose

- Transport of plastic boxes and pallets,
- "Milk Run" method of delivery of parts and products,
- Connecting several trolleys into one composition with a towing vehicle.

#### 2. Useful space dimensions [length x width]

- Upon request.

#### 3. Materials from which they are produced:

- Mild steel S235 (EN 10025);
- INOX (stainless steel), 1.4301 (EN/Wr).

#### 4. Anti-corrosive protection

- Painting or powder coating;
- Galvanisation.

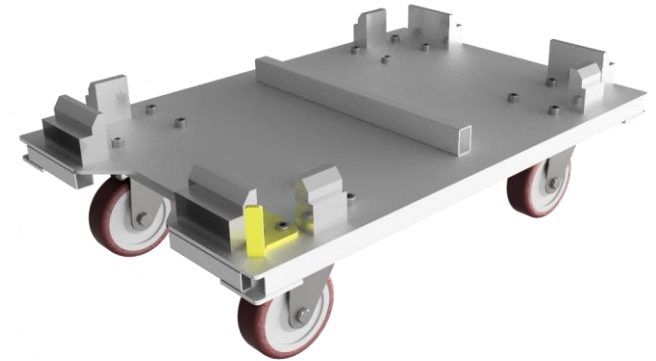

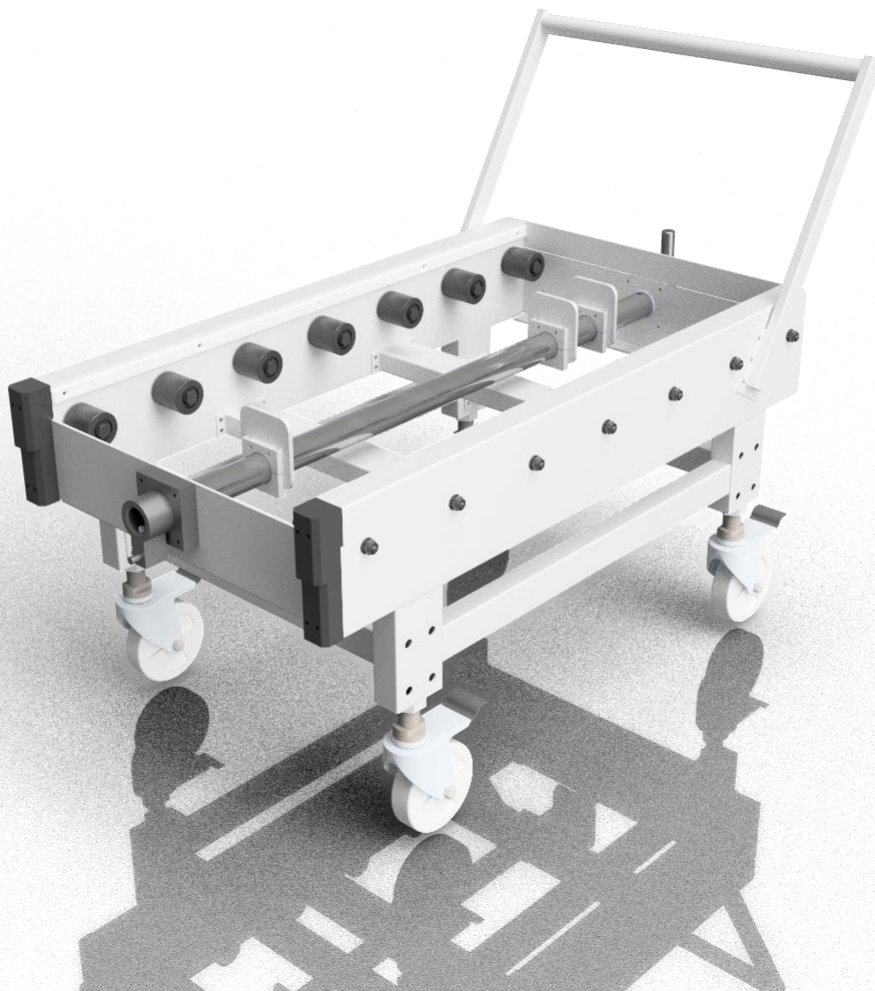

#### 5. Upon customer demand

- Various equipment;
- ESD properties.

## ➤ Trolleys for automatic production lines

- *On the customer demand*

### Hint points

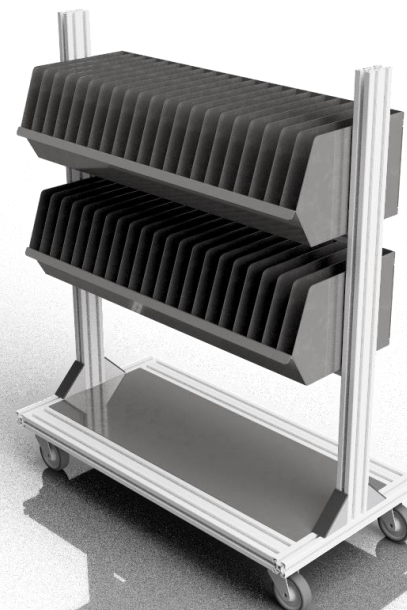

1. Purpose
  - Transport of plastic or metal pallets within an automatic line.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

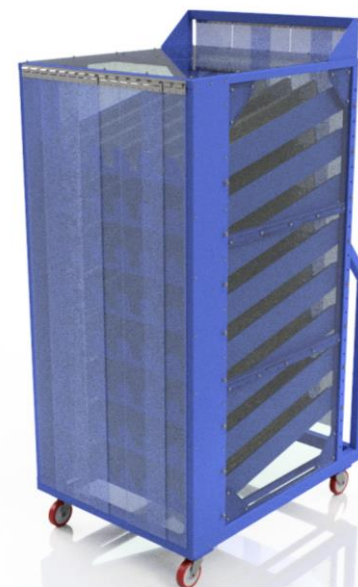

## ➤ Cabinets and racks for storage of production components

- Standard or on the customer demand

### Hint points

1. Purpose
  - Disposal of production components (washers, reels, stator, shafts, etc.).
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

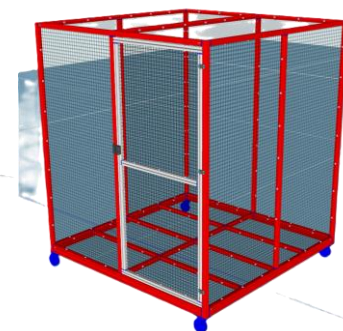

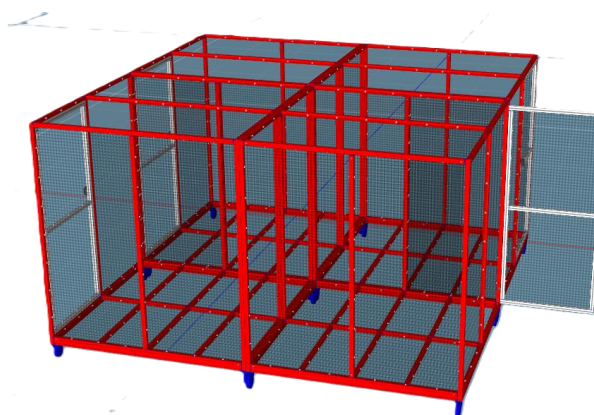

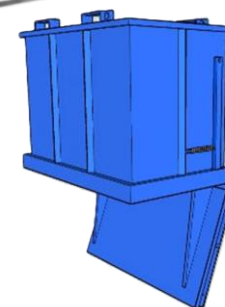

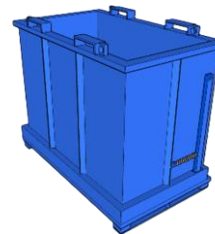

## ➤ Cabinets, cages and containers for storing of scraps

- Standard or on the customer demand

### Hint points

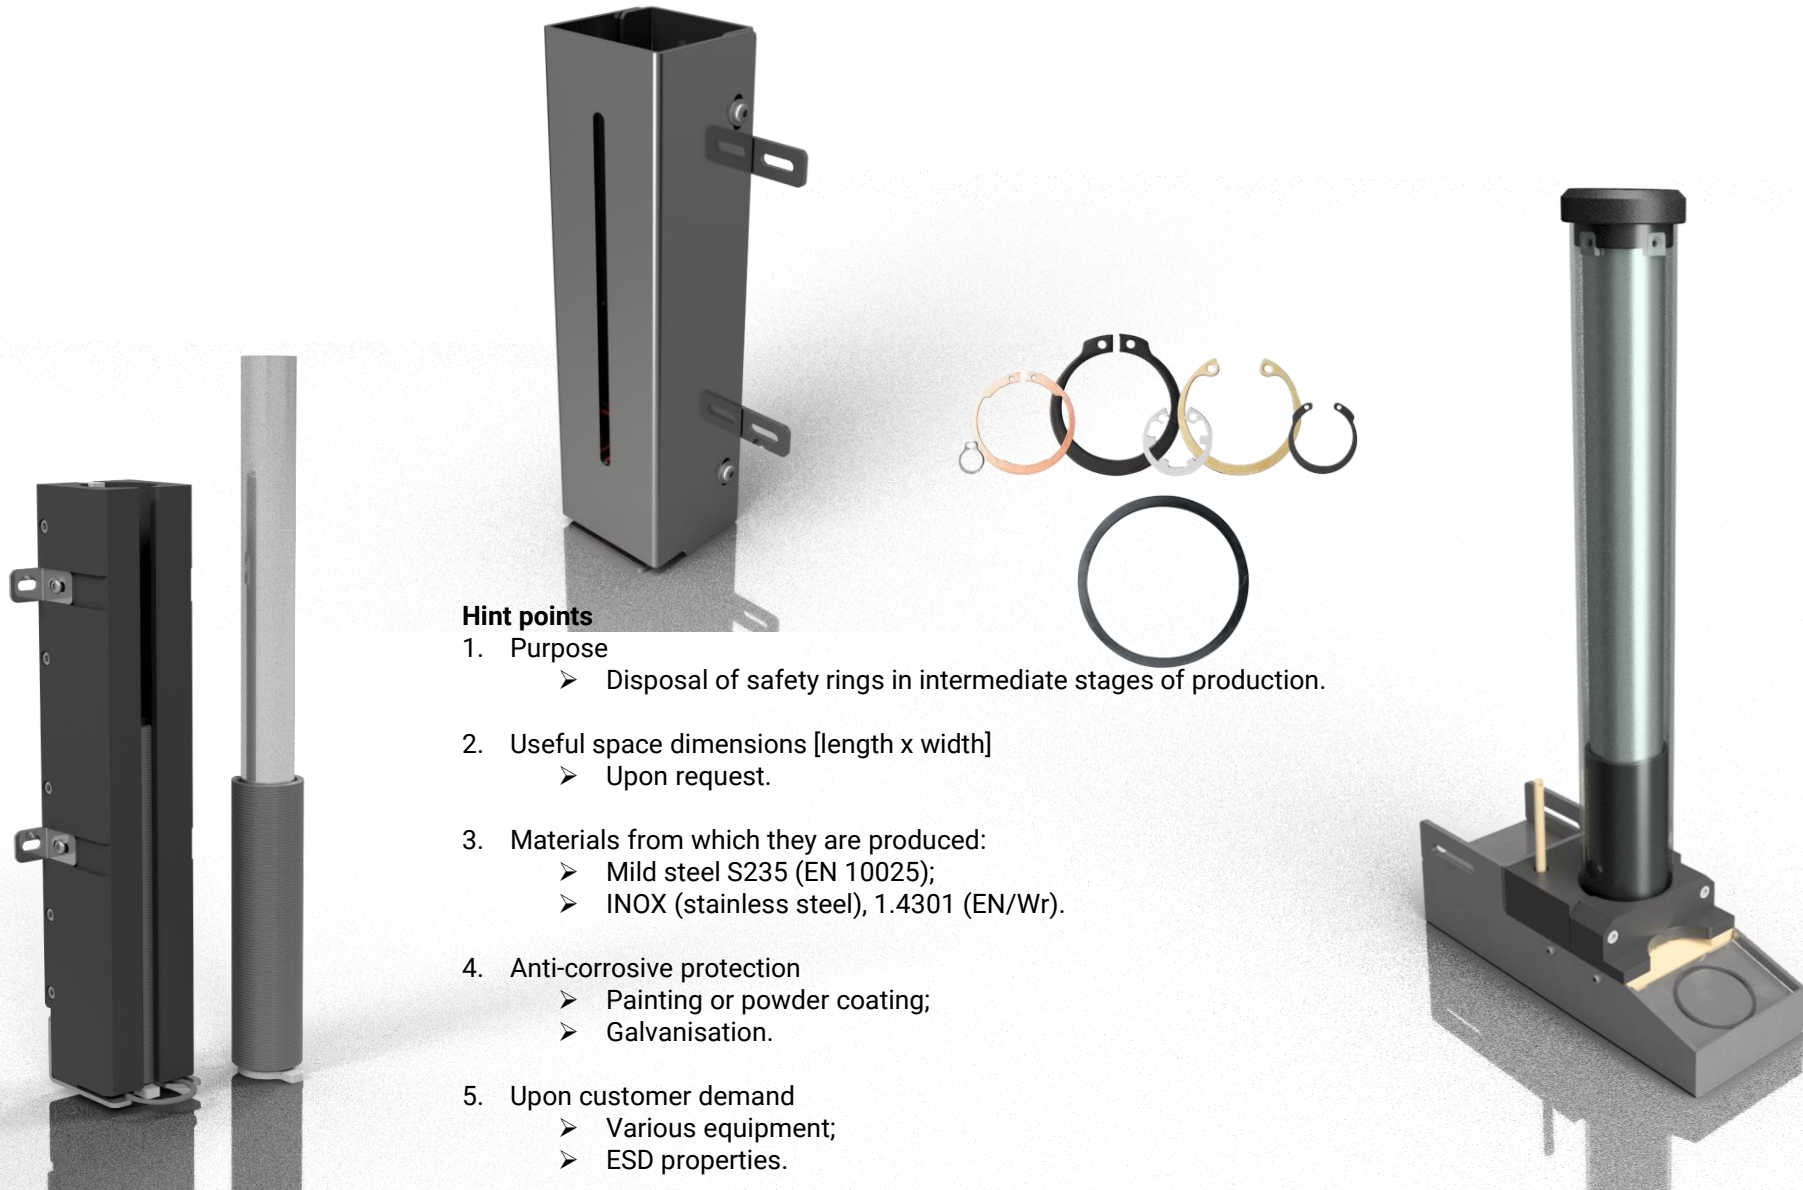

1. Purpose
  - Scrap disposal.
  - Solo or modular design, manipulation by forklift, trolley or by hand.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Ring dispensers for retaining or wave rings

- *Standard or on the customer demand*

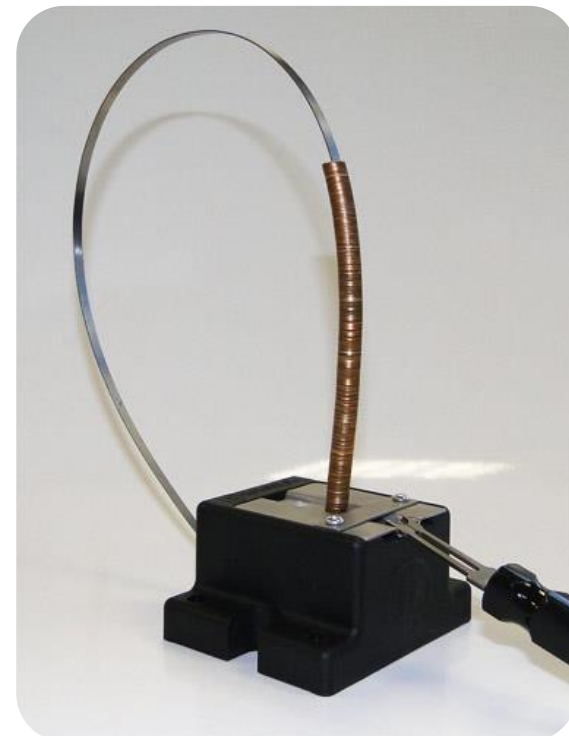

### Hint points

1. Purpose
  - Disposal of safety rings in intermediate stages of production.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Dispensers for rings type E

- Standard

### Hint points

1. Purpose
  - Disposal of safety rings in intermediate stages of production.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

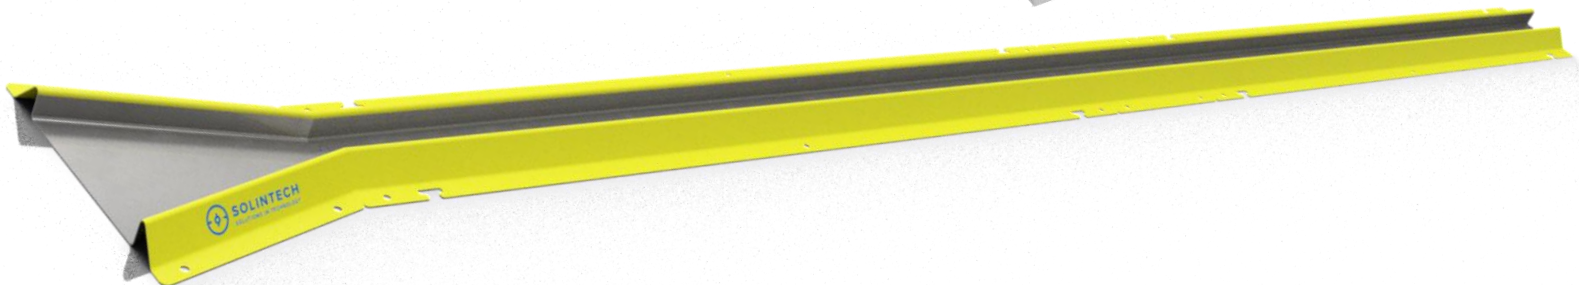

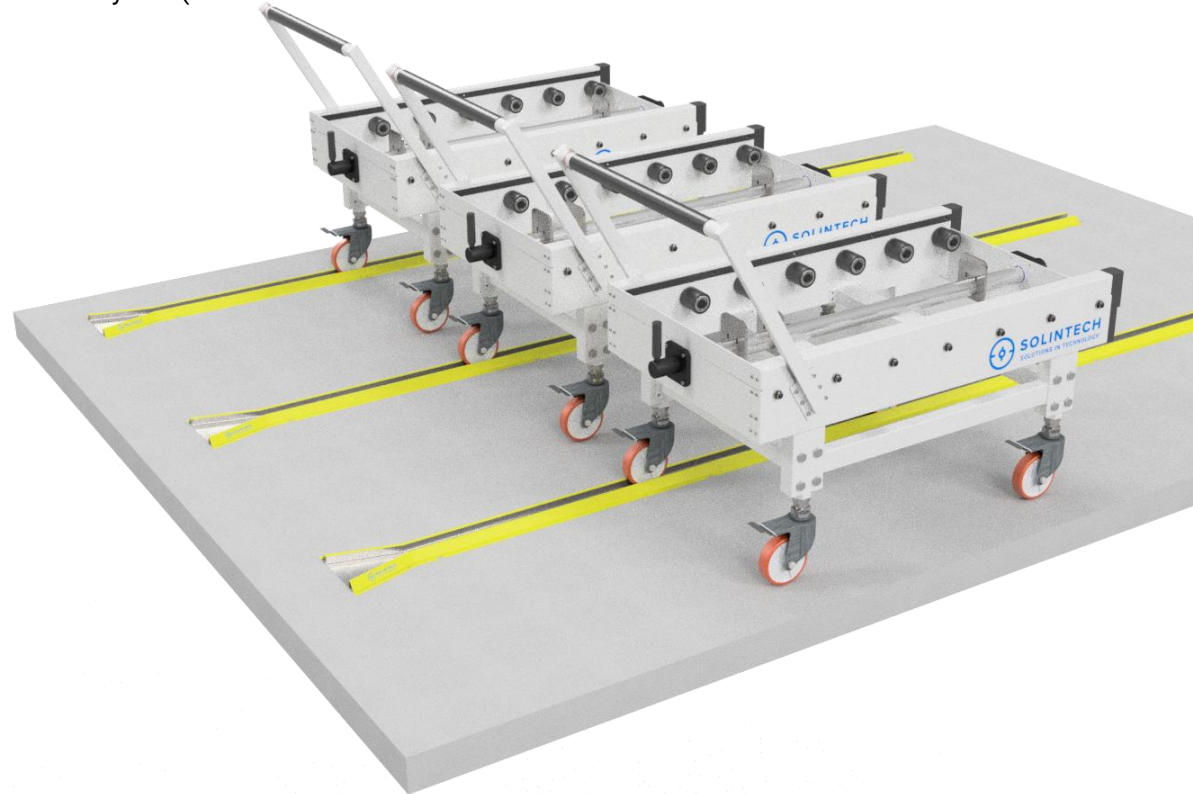

## ➤ FIFO Rails

- *Standard or on the customer demand*

### Hint points

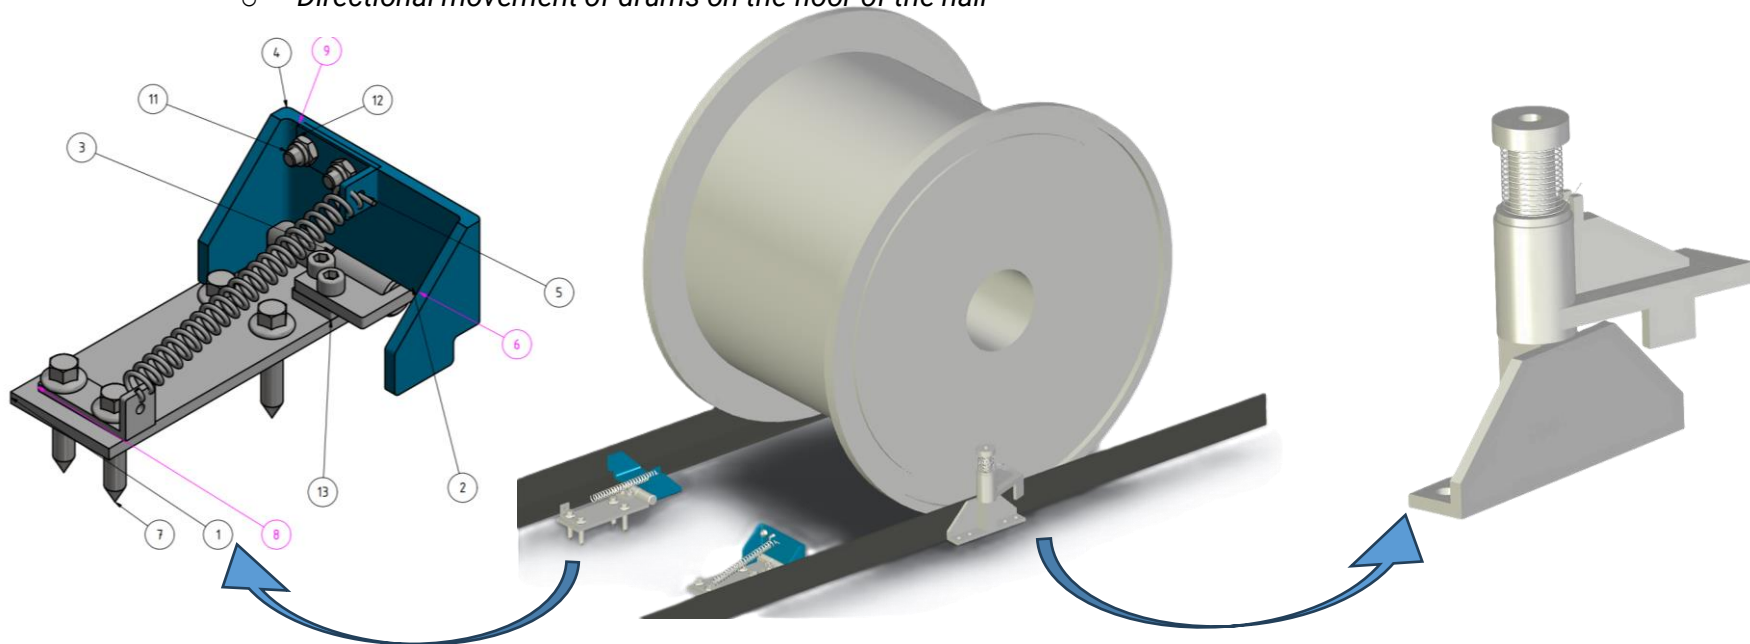

1. Purpose
  - Directional movement of carts on the floor of the factory hall ("First-In-First-Out" principle).
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Coil router

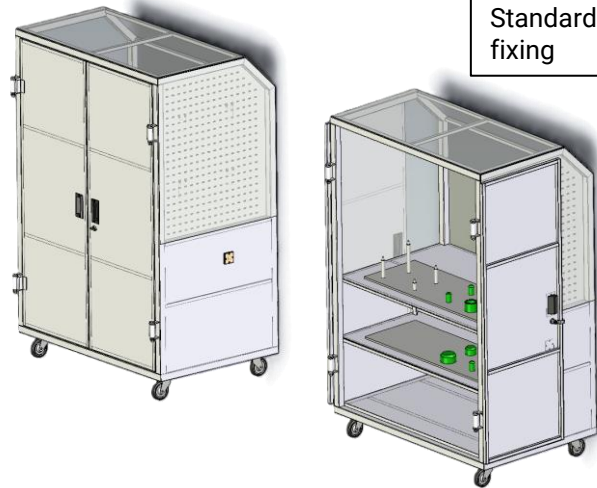

- Directional movement of drums on the floor of the hall

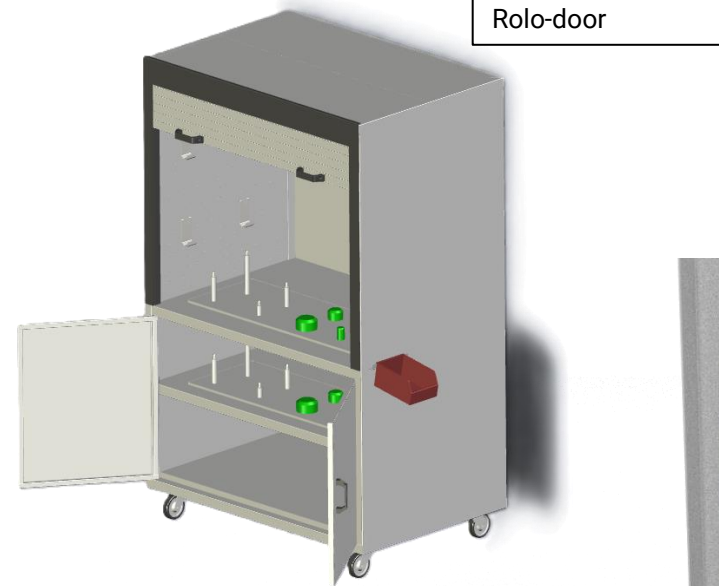

## ➤ Lean equipment

- Workplace organization (cabinets, hinged shelves, tool templates, etc.)

Standard door - magnetic fixing

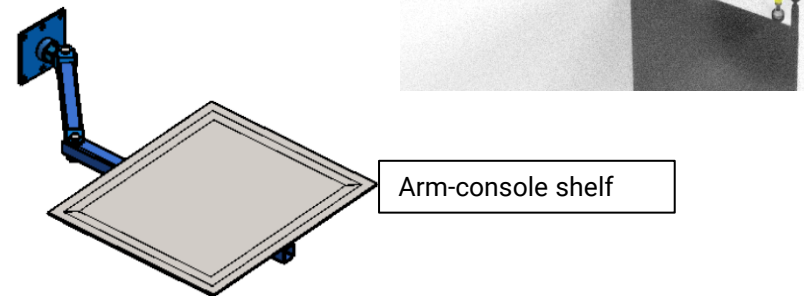

Rolo-door

### Hint points

1. Purpose
  - Organized storage of work equipment, tools, test pieces, etc.
  - Saving space in the production hall.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

A rack in the shadow of the pillar of the production hall

Arm-console shelf

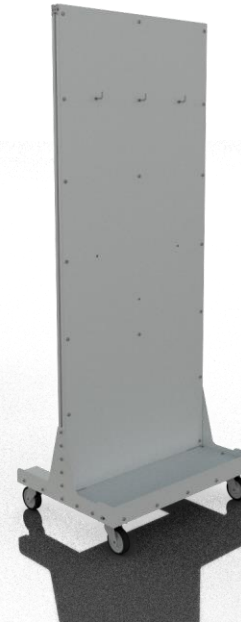

## ➤ 5S Equipment

- *Keeping the work area clean and tidy (cupboards, table, hinged shelves, bottle racks)*

5S Ormari

5S Table

### Hint points

1. Purpose
  - Storage of equipment for cleaning dirt, storage of jackets, bags, glasses and the like.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

Stalak

## ➤ Trash bins and cabinets

- *Standard or on the customer demand*

### Hint points

1. Purpose
  - Disposal of various waste.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

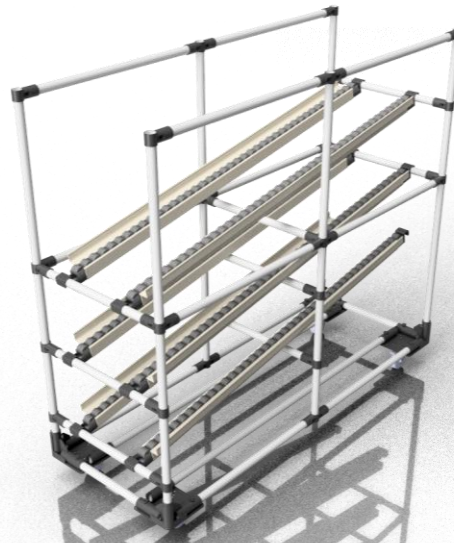

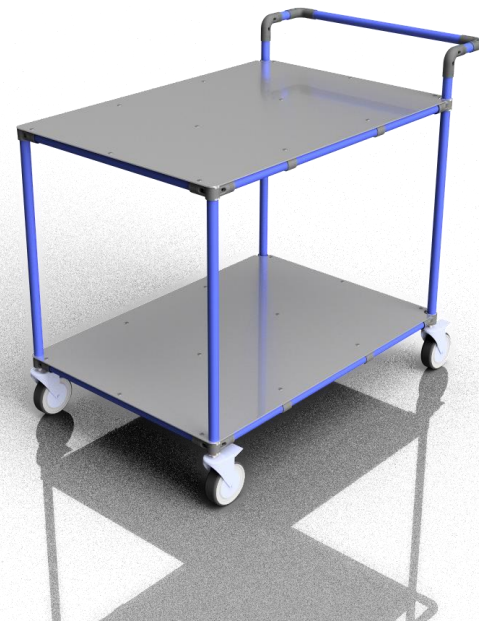

## ➤ Modular constructions

- *Equipment made of pipes, profiles, couplings and screws.*

### Hint points

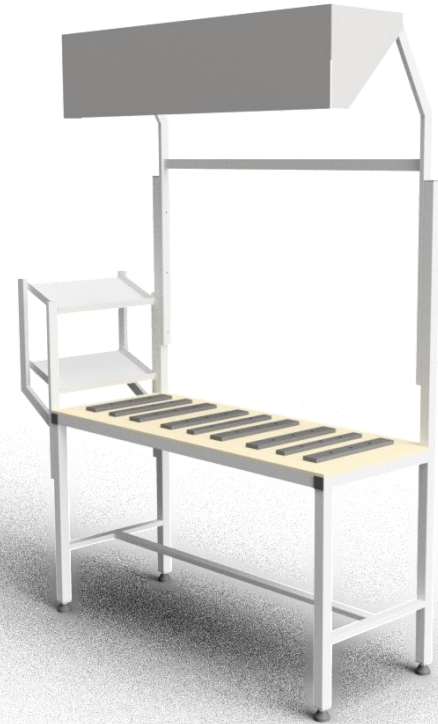

1. Purpose
  - Storage of equipment, production components, workspace, INFO boards.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
  - Aluminium.
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

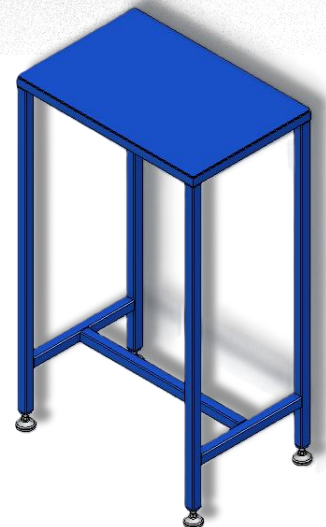

## ➤ **Working desk**

- *Equipment for laboratories, offices, workshops, production halls*

### **Hint points**

1. Purpose
  - Assembly, testing and other operator activities in production or workshop.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

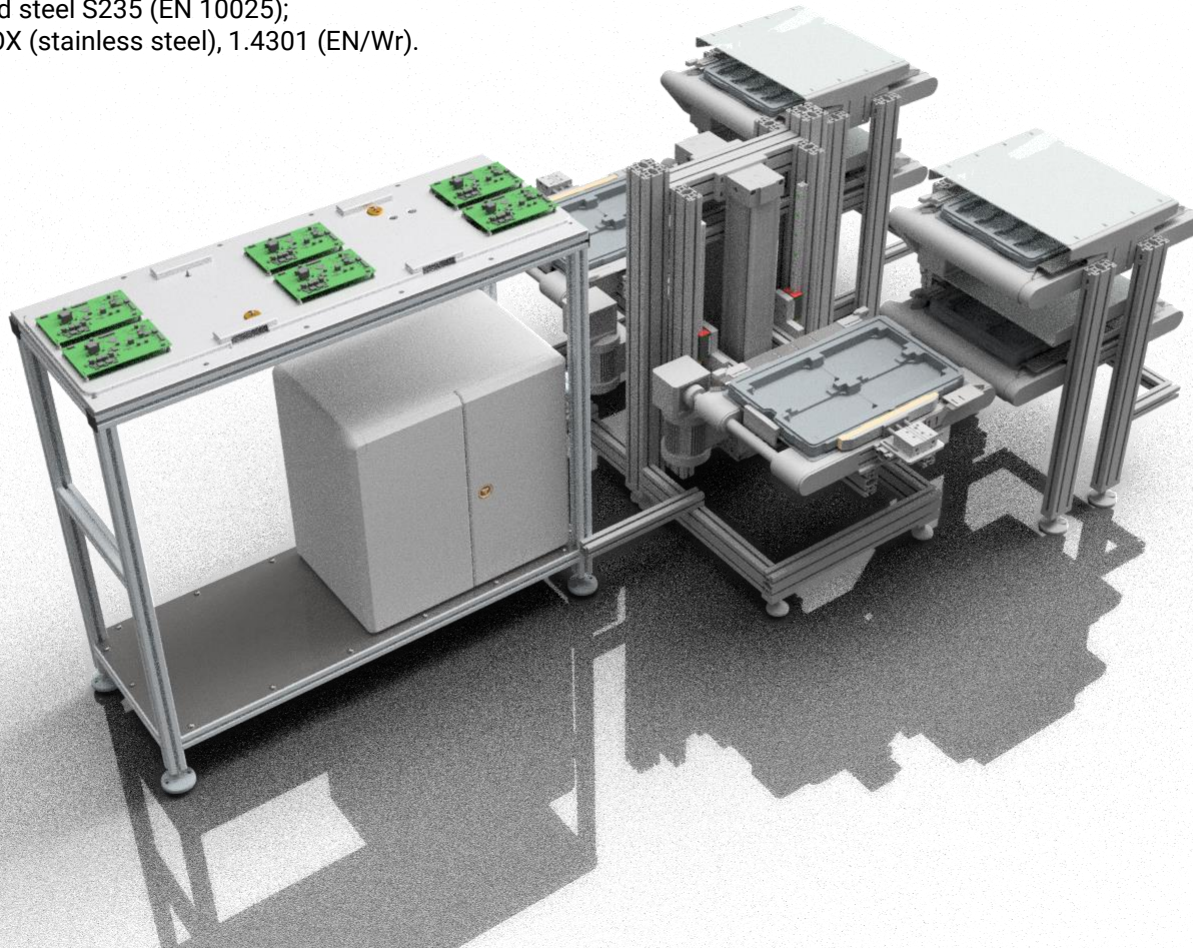

## ➤ **Conveyors for feeding of robotic cells**

- *On the customer demand*

### **Hint points**

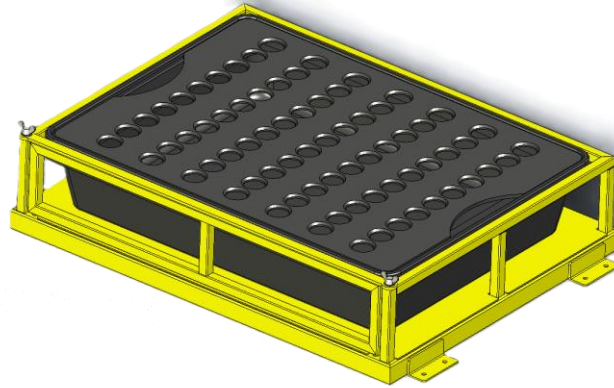

1. Purpose
  - Manipulation of cargo within the production line.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

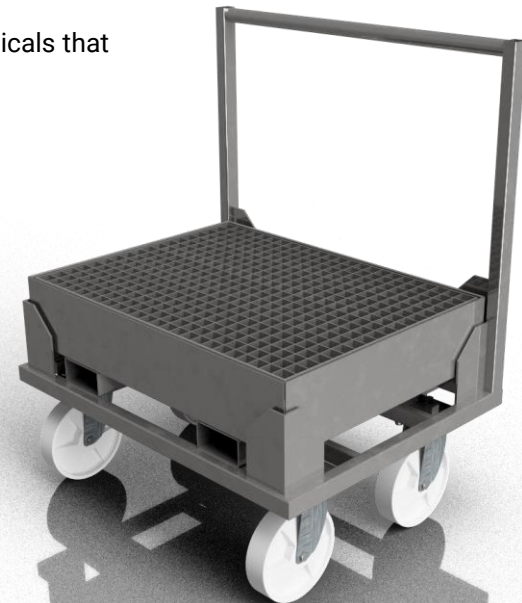

## ➤ Spill trolleys and pallets

- *Transport and disposal of packaging with chemicals.*

### Hint points

1. Purpose
  - Spill tanks are containers that accept chemicals that leak out of their original packaging.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

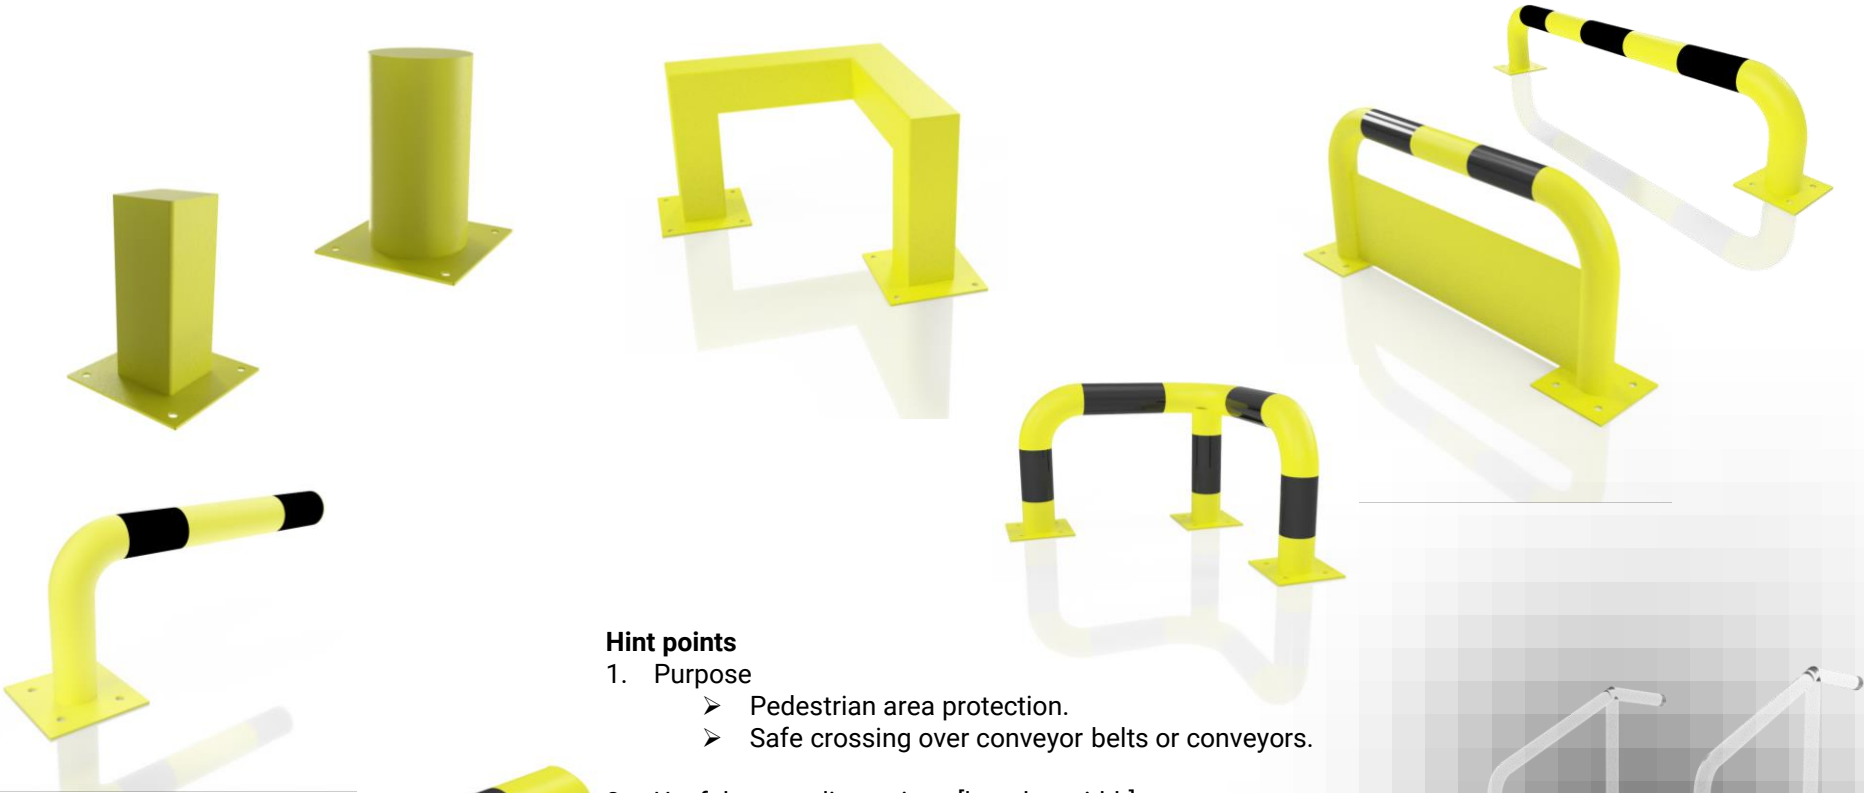

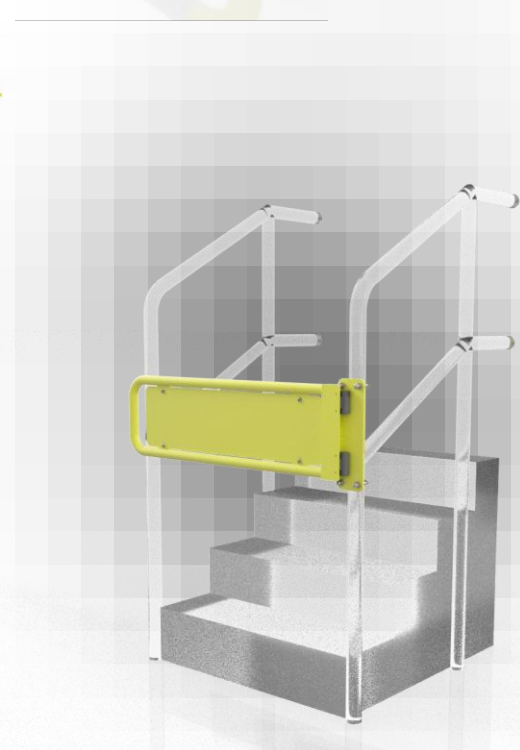

## ➤ Safety barriers

- Pillars, obstacles, fences and security doors.

### Hint points

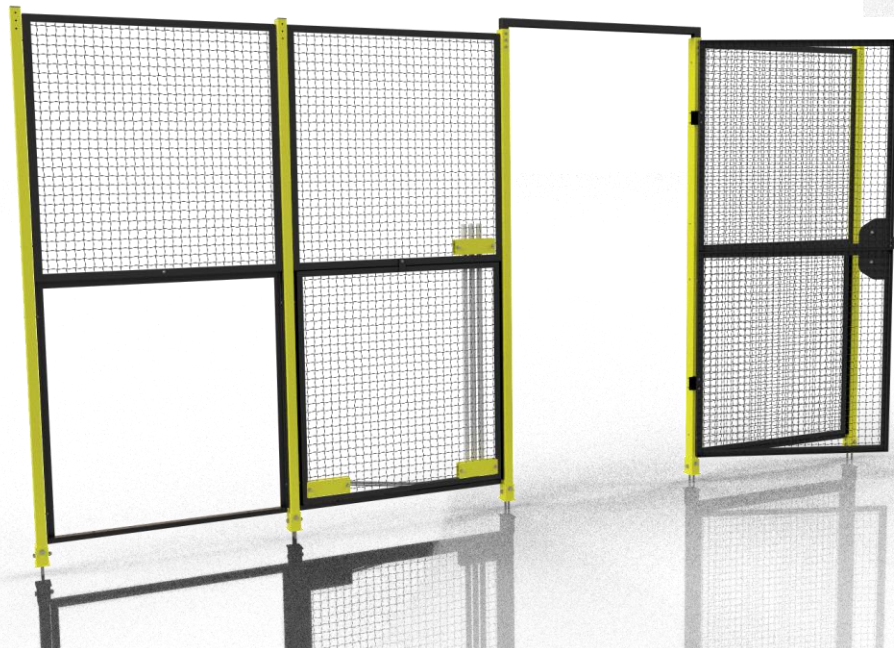

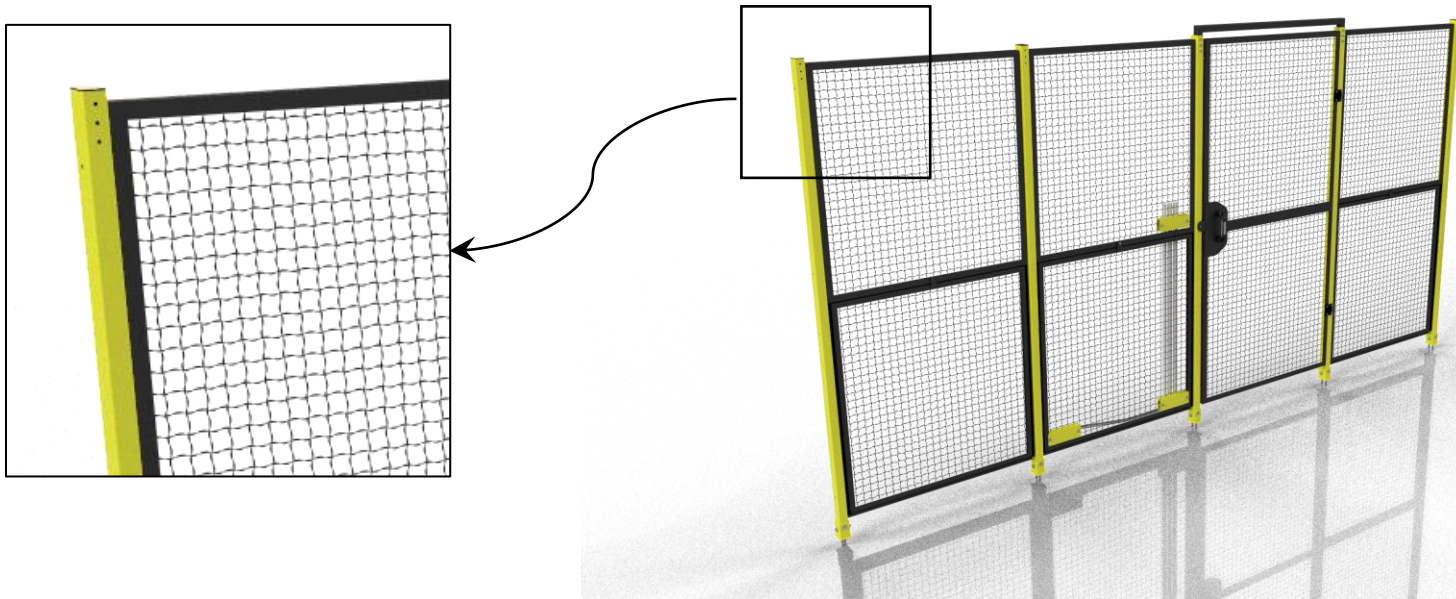

1. Purpose
  - Pedestrian area protection.
  - Safe crossing over conveyor belts or conveyors.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ **Safety fences**

- *Safety fences around automatic machines or robotic production cells.*

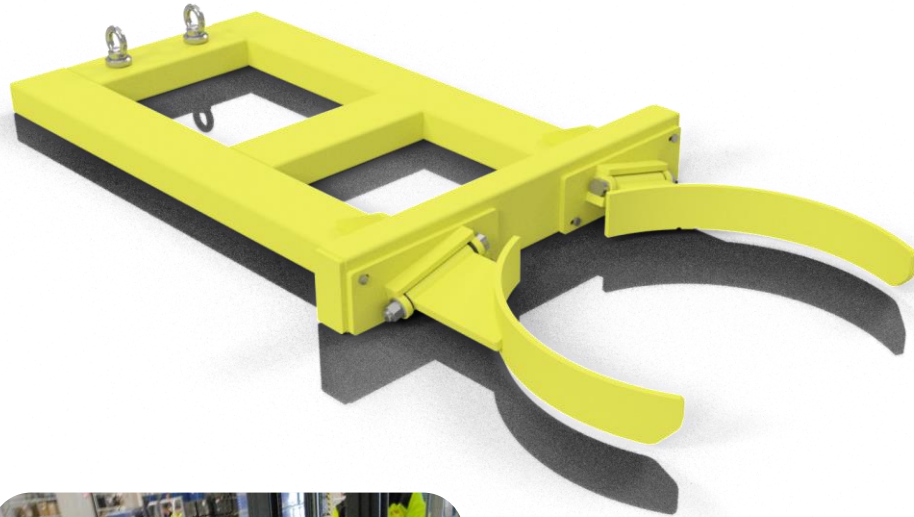

### **Hint points**

1. Purpose
  - Protection of the working space of the machine.
  - Safe operation of automatic machines or robotic cells.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Manipulators for barrels

- Forklift accessories

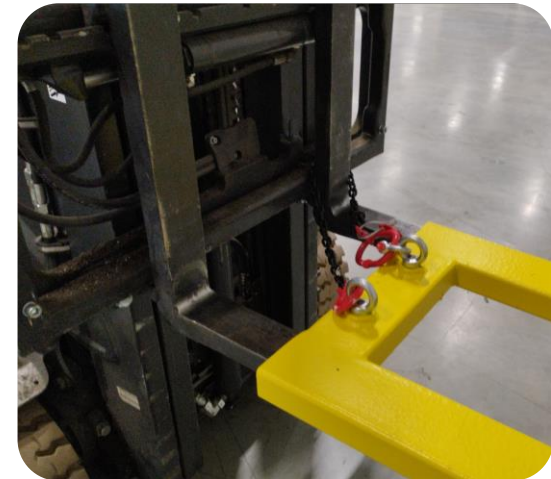

### Hint points

1. Purpose
  - Efficient and safe handling of heavy loads.
  - Forklift accessories.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

- The operator does not leave the forklift while working with the manipulator.
- Easy to use.
- Safe for work.

## ➤ Forked load carriers

- Manipulation of heavy loads (pallets, trays, boxes, etc.) with the help of additional equipment for cranes

### Hint points

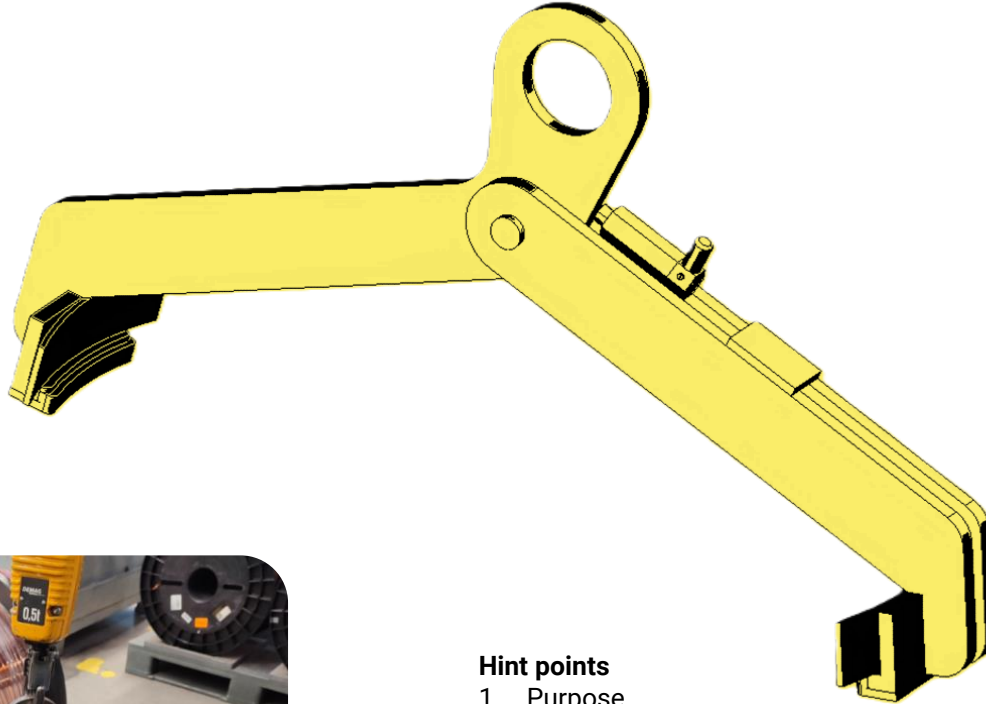

1. Purpose
  - Efficient and safe handling of heavy loads.
  - Crane accessories.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Coil and drum carriers

- Manipulation of heavy loads (barrels and drums) with the help of additional equipment for cranes

### Hint points

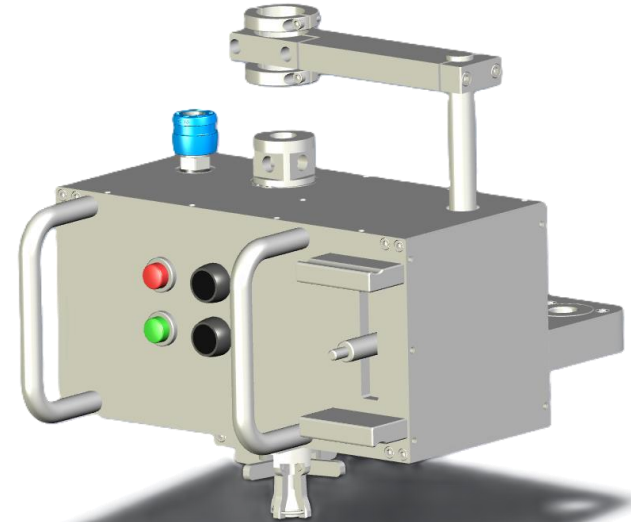

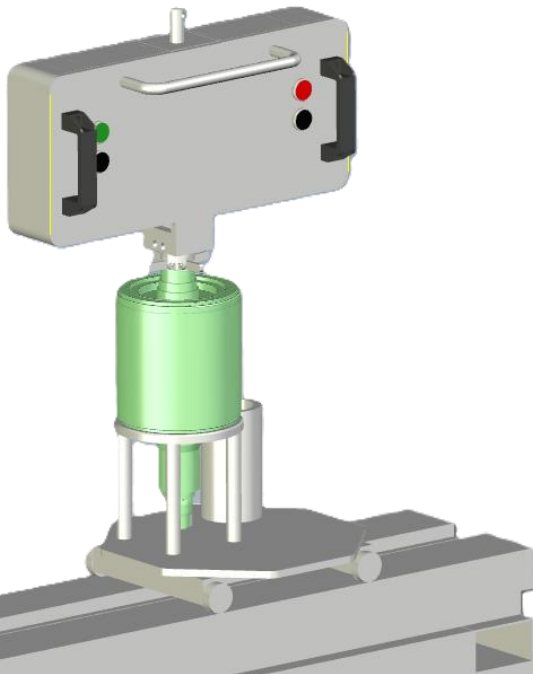

1. Purpose
  - Efficient and safe handling of heavy loads.
  - Crane accessories..
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

## ➤ Pneumatic grippers for material handling

- Manipulation of heavy loads (production components on automatic lines or CNC machines) with the help of additional equipment for cranes

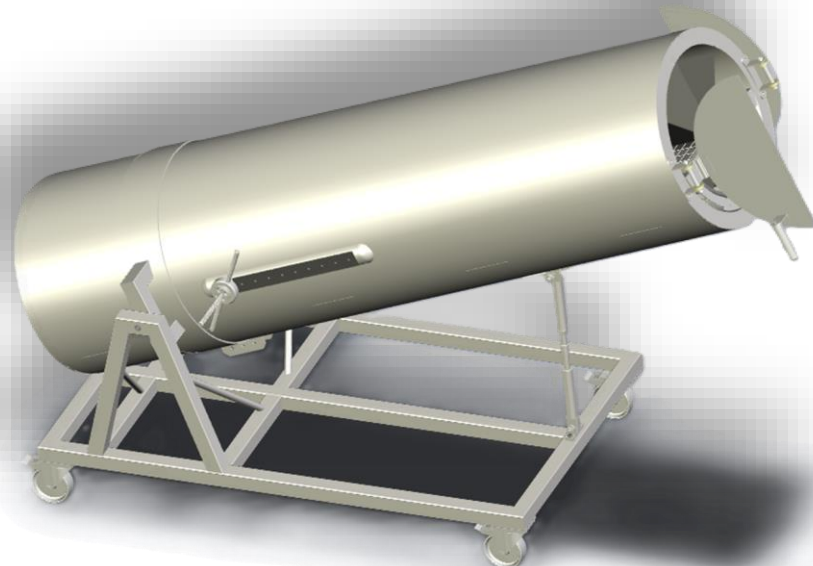

### Hint points

1. Purpose
  - Efficient and safe handling of heavy loads.
  - Crane accessories.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

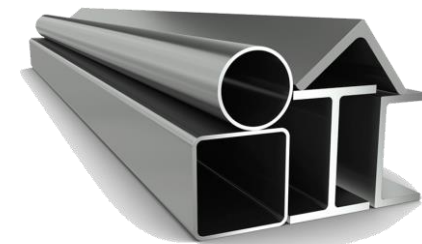

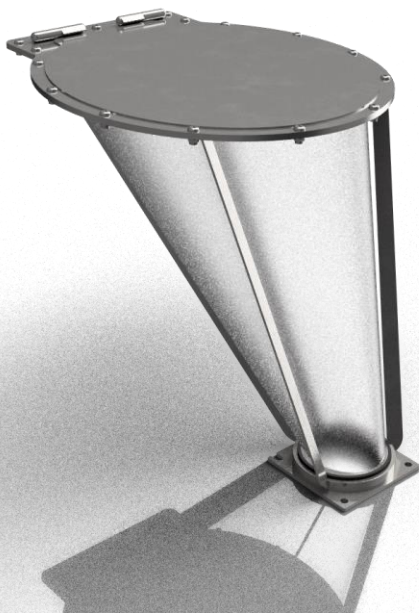

## ➤ Light metal constructions

- Manufacturing according to customer documentation or according to SOLINTECH documentation

### Hint points

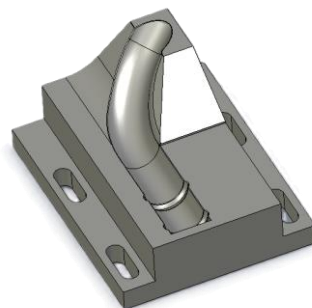

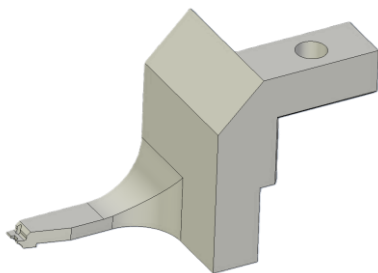

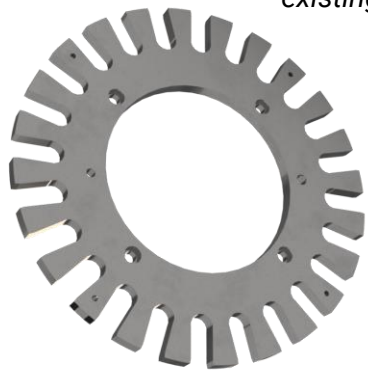

1. Purpose
  - Carriers, containers, pallets, platforms, machine chassis, silos, etc.
2. Useful space dimensions [length x width]
  - Upon request.
3. Materials from which they are produced:
  - Mild steel S235 (EN 10025);
  - Plastic,
  - Acrylic glass,
  - Aluminium,
  - INOX (stainless steel), 1.4301 (EN/Wr).
4. Anti-corrosive protection
  - Painting or powder coating;
  - Galvanisation.
5. Upon customer demand
  - Various equipment;
  - ESD properties.

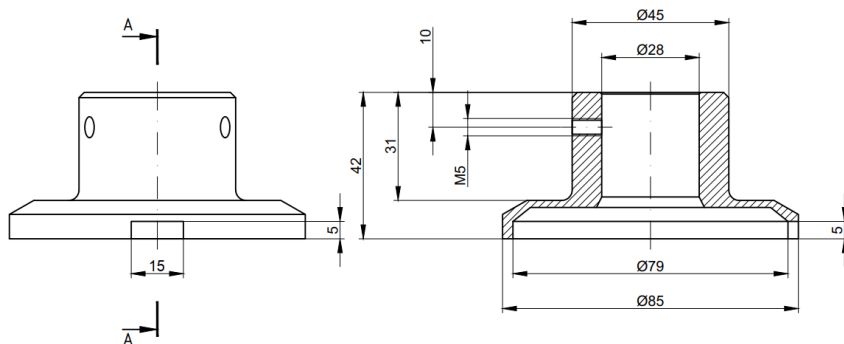

## ➤ Spare parts for machines, devices, equipment and tools

- Manufacturing according to the customer's drawing or sample, development and improvement of the existing design

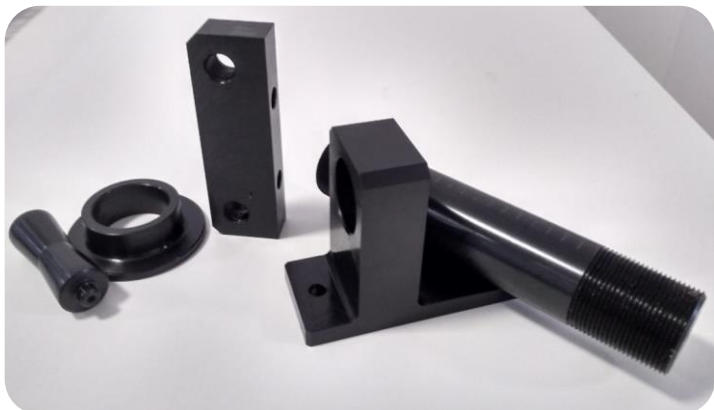

PRESEK "A" - "A"

### Hint points

- Manufacturing in accordance to customer documentation.
- Manufacturing in accordance to sample (3D scanning of the part, design and manufacturing);
- Improvement of existing part.

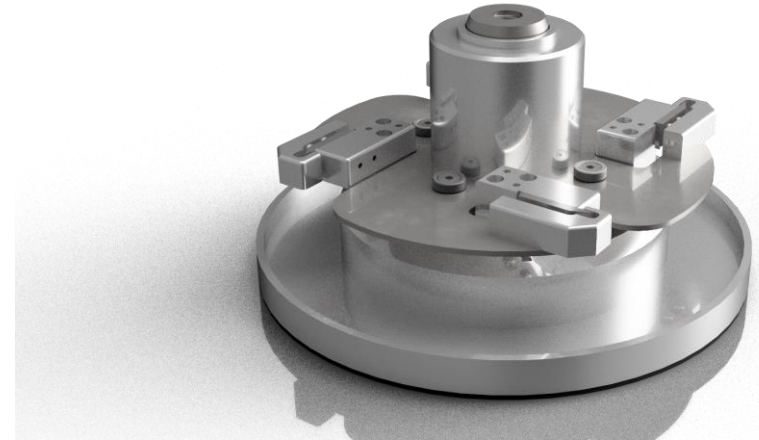

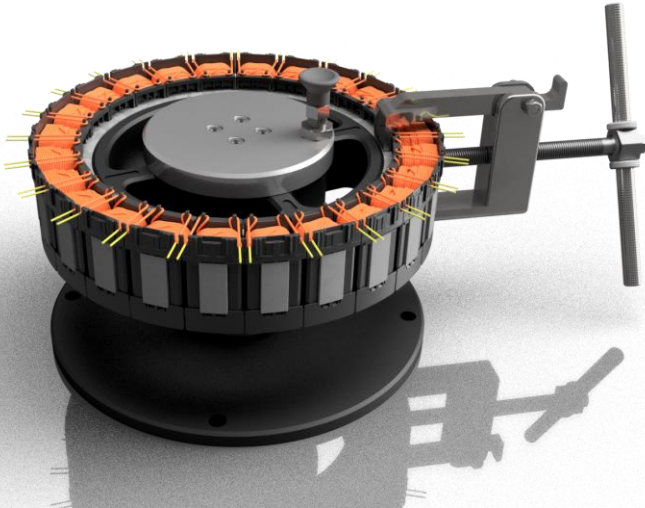

## ➤ Tools for various production operations

- Tools custom made to the requirements of the production process

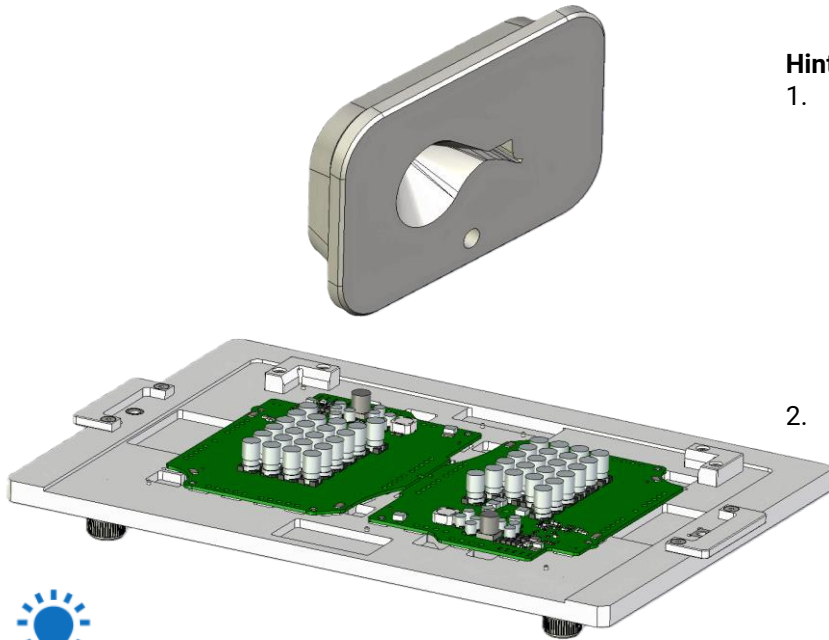

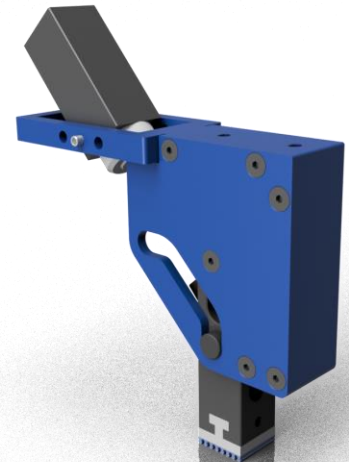

### Hint points

#### 1. Purpose

- Testing samples in the laboratory,
- Removal of excess plastic,
- Pallets for processing or testing PCB boards (routers, X-Ray, etc.),
- Working tools for screwdrivers;
- Marking of products;
- Extrusion of rubber;
- Assembly of components or assemblies;
- Etc.

#### 2. Upon customer demand

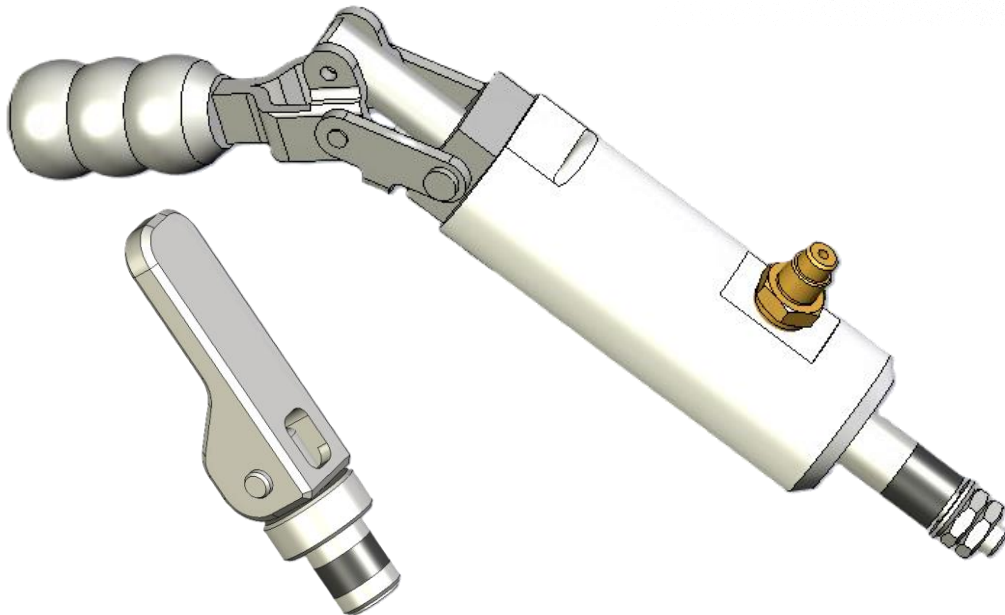

- ESD properties;
- Pneumatic or electric system;
- Other.

## ➤ Tools for various quality control operations

- Tools custom made to the requirements of the production process

### Hint points

#### 1. Purpose

- Go-no-go tools ("GO-NOGO" tools);
- Leakage testing ("leakage testing tools");
- Control of shape and dimensions;
- Etc.

#### 2. Upon customer demand

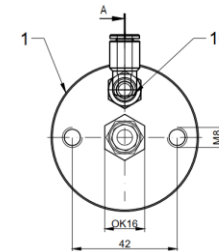

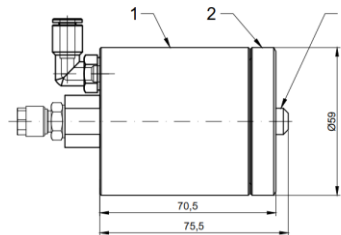

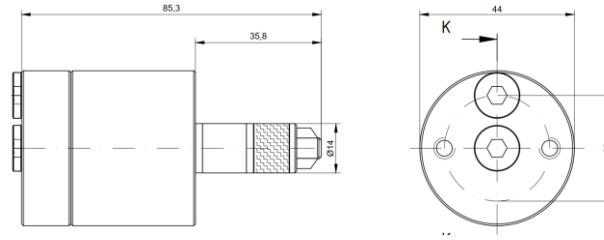

- ESD properties;
- Pneumatic or electric system;
- Other.

## ➤ Pneumatic couplings for "Leak test" of fluid transport parts

- Standard or on the customer demand

### Hint points

#### 1. Purpose

- Leakage control ("leak test tools");
- They are used to quickly fill the installation with air for leak testing.
- The principle of operation is to seal the air inlet.
- Sealing of the inner and outer diameters;

#### 2. Upon customer demand

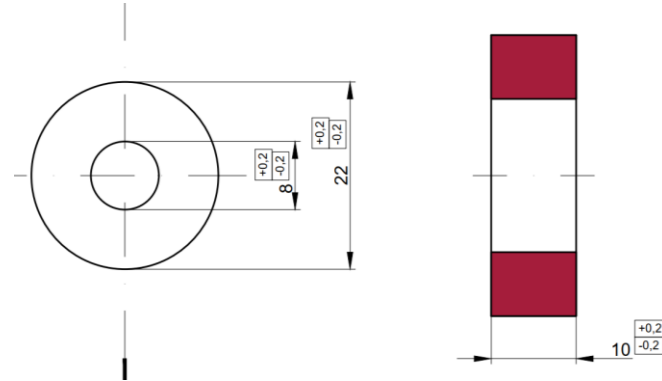

- ESD properties;
- Pneumatic or electric system;
- Other.

## ➤ Rubber products for industrial application

- *Standard or on the customer demand*

### Hint points

#### 1. Purpose

- Seals for leak test tools;
- Feet and bumpers;
- Gripper support supports;
- Etc.

#### 2. Upon customer demand

- ESD properties;
- Pneumatic or electric system;
- Other.
