

A high-angle photograph of a warehouse worker wearing a green hard hat and a white t-shirt with a safety harness. The worker is pushing a green pallet jack that carries a large cardboard box secured with a red ribbon. The box is on a wooden pallet. The worker is moving towards the right side of the frame, which is filled with stacks of cardboard boxes. The floor is a smooth, grey concrete.

*WHILE YOU MAKE
YOUR DREAMS COME TRUE,
WE PACK YOUR IDEAS*

MISSION STATEMENT

We have been on the market since 2013 as a distributor and producer of packaging products, closely specialized in the automotive industry.

PRODUCT PORTFOLIO

Stretch Film

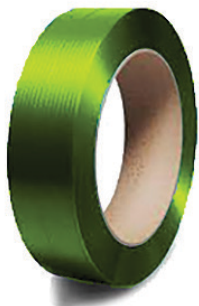

large offer of dimensions, colors and types of stretch film. Ideal for product distribution and protection and

LDPE /HDPE bags

The most commonly used materials for the protection of pallets. They are extremely strong and impenetrable, so they provide excellent protection against moisture and weather conditions and facilitate transport and storage in warehouses.

PRODUCT PORTFOLIO

PP and PET strapping tapes

They are used for packing light, medium and heavy packages, usually of larger volumes, on pallets, for closing and securing boxes, tying metal pipes, wood and other waste materials.

Air bubble film

The film is made of bubbles filled with air, which are located between two polyethylene films. excellent for extremely fragile products, as well as those with sharp edges that are prone to fraying

Adhesive tapes

Whether you work with woodworking, metalworking, printing or canning, in our catalog you can find a large selection of scotch tapes for different purposes, materials

Air bubble and EPE bag

To adapt the bag to your product and protect it in the best way

PRODUCT PORTFOLIO

EPE foam and sheet

As protection against mechanical damage - scratches and breakage, then to prevent the penetration of UV radiation and as insulation from the cold, and partially protects the product from moisture.

EPE foam profile

Angled EPE profiles provide the best protection against mechanical damage such as impacts, scratches and breakage, but they also protect against moisture and water. protect the edges of your products
