STORIA

Il 24/10/1978 venne costituita la società denominata Officina Meccanica Ghiotto, oggi conosciuta come O.M.G. GHIOTTO S.R.L.. I fondatori, i coniugi Ghiotto Cav. Giuseppe e Lovato Maria Assunta, già ampiamente integrati nel settore dell'aria compressa, decisero di mettersi in proprio e cambiare le loro vite, passando dall'essere soci lavoratori, a essere titolari a pieno titolo della loro azienda.

Nel 1980 l'operatività concreta dell'azienda ebbe inizio, questo nel primo fabbricato costruito dai coniugi Ghiotto con sede a Brendola, dove attualmente si sviluppa l'intera società.

La produzione iniziale era composta dai prodotti standard, già collaudati e ben conosciuti. In breve tempo grazie alle grandi capacità imprenditoriali e a una risposta molto favorevole da parte del mercato, la giovane società fu in grado di progettare, sviluppare e costruire nuovi articoli. Tra questi una linea completa di pistole per l'aria compressa marchiate MADE IN ITALY, che diedero ancor più vigore all'impresa, e un notevole risalto sul mercato internazionale.

Ad oggi la Famiglia Ghiotto continua a dirigere l'azienda, a occuparsi con i propri collaboratori dei vari settori che compongono un'azienda moderna che oggi produce circa 3000 articoli.

HISTORY

On 24/10/1978, was established a company called Officina Meccanica Ghiotto, today known as O.M.G. GHIOTTO S.R.L..

The founders, Mr. Ghiotto Cav. Giuseppe and Mrs. Lovato Maria Assunta, who were already well integrated in the compressed air sector, decided to set up on their own and change their lives, going from being working partners to being full owners of their company.

In 1980, the company's concrete operations began, this in the first building built by the Ghiotto's in Brendola, where the entire company is currently based.

Initial production consisted mainly of standard products, already tried, tested and well known. In a short time, thanks to great entrepreneurial skills and a very favourable response from the market, the young company was able to design, develop and build new products.

These included a complete line of compressed air guns branded MADE IN ITALY, which gave the company even more vigour, and considerable exposure on the international market.

To this day, the Ghiotto's Family continues to run the company, working with their collaborators in the various sectors that make up a modern company that today produces around 3000 articles.
