

DENCKERMANN

GEPRÜFTE QUALITÄT

4 FOUR-LAYER ANTIMICROBIAL, ANTIBACTERIAL, ANTIVIRAL FILTER.

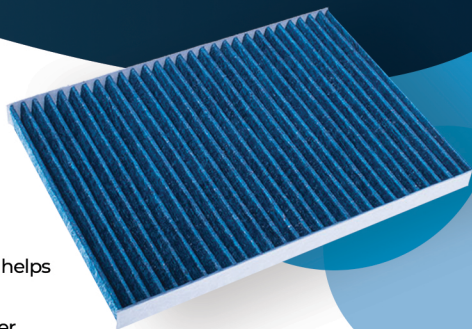

1. PRE-FILTRATION LAYER. Intercepts and eliminates dust and pollen. Electrostatic charge attracts and traps fine dust particles allowing for unrestricted high air passage and high efficiency.

2. MICRO LAYER. Synthetic fibres remove the finest contaminants. Effective, high precision filtration of up to 2.5PM.

3. ACTIVATED CHARCOAL LAYER. Traps mould spores and harmful gases like carbon monoxide and sulphur dioxide. Combined with sodium bicarbonate, eliminates unpleasant odours from moulds and smoke/fumes.

4. SILVER AND COPPER ION LAYER. Antibacterial microtechnology using silver and copper ions is a long-lasting, proven solution for antibacterial and antimicrobial protection. Copper ions inhibit germs, bacteria and viruses, while silver ions kill them.

INNOVATIVE TECHNOLOGY FOR ULTRA CLEAN AIR

- Suitable for people with allergies
- Filtration of unpleasant odours, exhaust fumes, and smog
- Effective protection when used
- Antimicrobial and antiviral silver and copper ion technology helps fight off viruses, bacteria and fungi
- High precision filtration of up to 2.5PM fine particulate matter
- Filter insert made without harmful chemicals and substances
- 100% recyclable natural filter insert
