

JUMP STARTER

JS16

- 16000mAh high discharge lithium polymer battery
- Can start the vehicle 50 times when fully charged
- 1000A peak current (up to 6.0L gas/5.0L diesel engine)
- DC 12V output
- Output power display
- Dual USB for quick charging
- 3 LED modes (Flashlight, strobe and SOS)
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with L94-V0 fireproof material

JS8

- 8000mAh high discharge lithium polymer battery
- Can start the vehicle 20 times when fully charged
- 700A peak current (up to 3.0L gas/2L diesel engine)
- QC3.0 quick charging
- 3 LED modes (flashlight/strobe/SOS)
- Emergency red & blue LED lighting
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with UL94-V0 fireproof material

JS6

- 6000mAh high discharge lithium polymer battery
- Can start the vehicle 20 times when fully charged
- 600A peak current (up to 2.0L gas/1.5L diesel engine)
- 3 LED modes (flashlight/strobe/SOS)
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with UL94-V0 fireproof material

JS12

- 12000mAh high discharge lithium polymer battery
- Can start the vehicle 50 times when fully charged
- 900A peak current (up to 5.0L gas/3.0L diesel engine)
- Dual USB for quick charging
- 3 LED modes (Flashlight, strobe and SOS)
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with L94-V0 fireproof material

JS12E

- 12000mAh high discharge lithium polymer battery
- Can start the vehicle 30 times when fully charged
- 800A peak current (up to 5.0L gas/3L diesel engine)
- QC3.0 quick charging
- 3 LED modes (flashlight/strobe/SOS)
- Emergency red & blue LED lighting
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with UL94-V0 fireproof material

JS10

- 10000mAh high discharge lithium polymer battery
- Can start the vehicle 30 times when fully charged
- 800A peak current (up to 4.0L gas/2.5L diesel engine)
- Dual USB for quick charging
- 3 LED modes (Flashlight, strobe and SOS)
- Reverse charge, short circuit, overcharge and overcurrent protection
- Can be started at -20°C low temperature
- The casing with aluminum alloy material

STEELMATE

TIRE INFLATOR & JUMP STARTER

Think safety think Steelmate

TIRE INFLATOR

SP1

- 2-in-1 design, Tire inflator & Jump starter
- Built-in 8000 mAh high-capacity lithium battery
- Can start the vehicle 30 times when fully charged
- Quick inflation in 80 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type-C output
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Emergency LED lighting
- 4 different nozzles (Cars, motorcycles, bicycles, sports balls, other inflatables)

T10 PRO

- Two ways of power supply available
- - Built-in 6000 mAh high-capacity lithium battery
- - Cigarette lighter power supply
- Quick inflation in 50 seconds from 2.0 to 2.5 bar (185/60/R15)
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 2 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

T10 / T11

- Built-in 6000 mAh high-capacity lithium battery (T10)
- Cigarette lighter power supply (T11)
- Quick inflation in 50 seconds from 2.0 to 2.5 bar (185/60/R15)
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 2 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

T9

- Two ways of power supply available
- - Built-in 6000 mAh high capacity lithium battery
- - Cigarette lighter power supply
- Quick inflation in 80 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type-C output
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Emergency LED lighting
- 3 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

PO8

- Built-in 6000 mAh high-capacity lithium battery
- Cigarette lighter power supply
- Quick inflation in 85 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type-C output
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Emergency LED lighting
- 4 different nozzles (Cars, motorcycles, bicycles, sports balls, other inflatables)

PO7

- Cigarette lighter power supply
- Quick inflation in 85 seconds from 2.0 to 2.5 bar (185/60/R15)
- 4 inflation modes (Car, motorcycle, bicycle, ball)
- Auto stop inflation when the pre-set air pressure value is reached
- Emergency LED lighting
- 3 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

V12

- 2-in-1 design, Tire inflator & Jump starter
- Two ways of power supply available
- - Built-in 12000 mAh high-capacity lithium battery
- - Cigarette lighter power supply
- Can start the vehicle 30 times when fully charged
- Quick inflation in 70 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type-C output
- 5 inflation modes (Car, motorcycle, bicycle, ball, customized mode)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 4 different nozzles (Cars, motorcycles, bicycles, sports balls, other inflatables)

T5

- Cigarette lighter power supply
- Quick inflation in 70 seconds from 2.0 to 2.5 bar (185/60/R15)
- Auto stop inflation when the pre-set air pressure value is reached
- Emergency LED lighting
- 2 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

PO6-A / PO6-B

- Cigarette lighter power supply
- Quick inflation in 90 seconds from 2.0 to 2.5 bar (185/60/R15)
- Auto stop inflation when the pre-set air pressure value is reached (PO6-B)
- Emergency LED lighting
- 2 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

PO3 / PO5

- Cigarette lighter power supply
- Quick inflation in 90 seconds from 2.0 to 2.5 bar (185/60/R15)
- Auto stop inflation when the pre-set air pressure value is reached (PO5)
- Emergency LED lighting
- 2 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

T15-B

- Built-in 4000 mAh high-capacity lithium battery
- Quick inflation in 160 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type-C output
- 5 inflation modes (Car, motorcycle, bicycle, ball, customized mode)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 3 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

T15-A

- Cigarette lighter power supply
- Quick inflation in 160 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5 inflation modes (Car, motorcycle, bicycle, ball, customized mode)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 3 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)

T12

- 2-in-1 design, Tire inflator & Flashlight
- Two ways of power supply available
- - Built-in 8000 mAh high-capacity lithium battery
- - Cigarette lighter power supply
- Quick inflation in 240 seconds from 2.0 to 2.5 bar (185/60/R15)
- 5V/2A USB type C output
- 5 inflation modes (Car, motorcycle, bicycle, ball, customized mode)
- Auto stop inflation when the pre-set air pressure value is reached
- Pressure maintenance mode
- Emergency LED lighting
- 3 different nozzles (Cars, motorcycles, bicycle with Schrader valve, sports balls, other inflatables)
