# Your All-in-One Device Management Solution

BUILT FOR FLEXIBILITY: MEETS EU R156 & ISO 24089 STANDARDS ON ANY SERVER CONFIGURATION

#### THE LIFECYCLE OF IOT DEVICE INTEGRATION: FROM CONNECTION TO MANAGEMENT

Registering devices

Provisioning

Authentication

Configuration

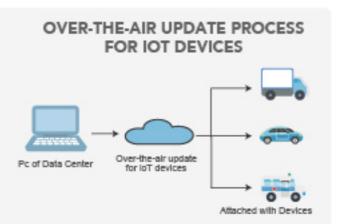

Maintenance

Diagnostics

End of life

### **REASONS TO UPDATE SOFTWARE**

# EFFORTLESS ONLINE CONFIGURATION

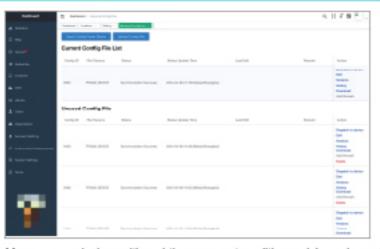

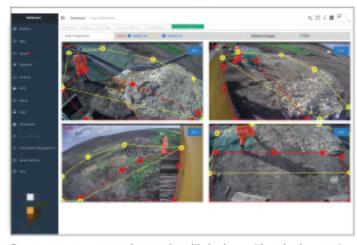

#### STREAMLINED ONLINE O&M

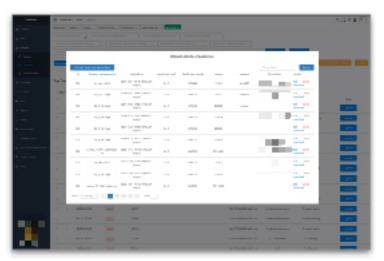

#### STREAMLINE YOUR SETTINGS: ONLINE CONFIGURATION IN ACTION

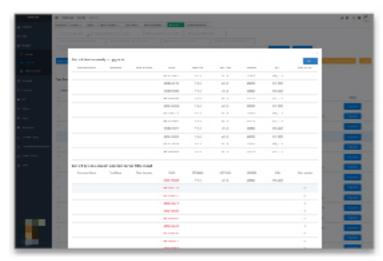

Manage your devices with real-time parameter editing, quick version switches for emergency recoveries, and multi-device setting deployments. Plus, redefine detection area setup with our intuitive live-feed tool—just drag and drop to customize. Simplify complex configurations into easy tasks

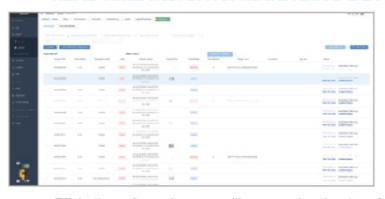

#### UPGRADE MADE EASY: EFFORTLESS MANAGEMENT AND PRECISION EXECUTION

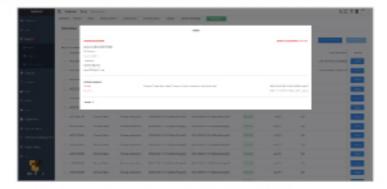

Manage versions and device compatibility effortlessly, and execute targeted or batch upgrades with precision. Simplify with one-click uploads and comprehensive progress tracking.

#### REAL-TIME INSIGHTS: MANAGING DEVICE HEALTH & MAINTENANCE STATUS

Efficiently monitor and manage with a comprehensive view of your devices' operational status and detailed insights into malfunctioning units, including fault specifics, duration, and operational impact.

## CRAFTED FOR REALITY: HARNESSING INDUSTRY SCENARIOS WITH EU'S R156 & ISO 24089 STANDARDS

R156: An EU regulation ensuring safe, reliable vehicle repairs, enhancing road safety. ISO 24089: Sets global standards for secure, efficient vehicle software updates. These standards bolster vehicle safety and software reliability, benefiting manufacturers, service providers, and the public by ensuring high-quality maintenance and secure updates.
