## ABOUT US ■ ■ ■

**POTRYKUS** is one of the largest manufacturers of auto body panels in Europe. We have more than 45 years' experience in the production of body repair panels. We have been an industry player for two generations, so we understand well the needs of the market and the expectations of our customers. For many years, our top priority has been the exceptional quality of the panels we produce, and we remain dedicated to continuously improving and meticulously monitoring them.

All panels are manufactured exclusively in our factory in Poland – in Szemud, Pomerania. Our product range consists of more than 550 types of body panels that fit the bodies of many European car brands. We manufacture door and side panels, door sills and steps, sills, wings and wheel arches, brake shields panels, trunk floor panels and many more body repair panels.

Our auto body panels are pressed exclusively using steel moulds. This ensures that they have consistent shape repeatability and high-quality workmanship. Our products are always complete, fully compatible and easy to fit to original vehicle bodies.

The dies and punches for panel pressing are designed and manufactured in the pattern shop at our factory. This ensures consistent, superior and controlled quality at all times. This clearly sets us apart from others in the industry. Our auto body panels are manufactured from galvanised steel with a thickness of 0.8mm to 1.00mm on both sides. They are ready to install upon purchase and require no additional sheet metal fabrication.

We always have a large inventory of panels in our warehouses in Szemud, which enables us to handle easily and efficiently large orders across a wide-range of products. We work with a number of international shipping companies to ensure the smoothest possible delivery.

Our customer portfolio includes well-established and renowned automotive distributors for whom we process hundreds of orders each year, with deliveries across Europe. Equally, we are happy to accept and fulfil smaller orders. Every year we increase our sales and are pleased to be able to meet the ever-increasing demands of our customers.

Considering all this, we can certainly consider ourselves to be one of the leading manufacturers of high-quality auto body panels in Europe.

**If you have any questions or you are interested in our auto body panels - please send to us your inquiry.**
