

# BLOOD TEST FOR YOUR CAR

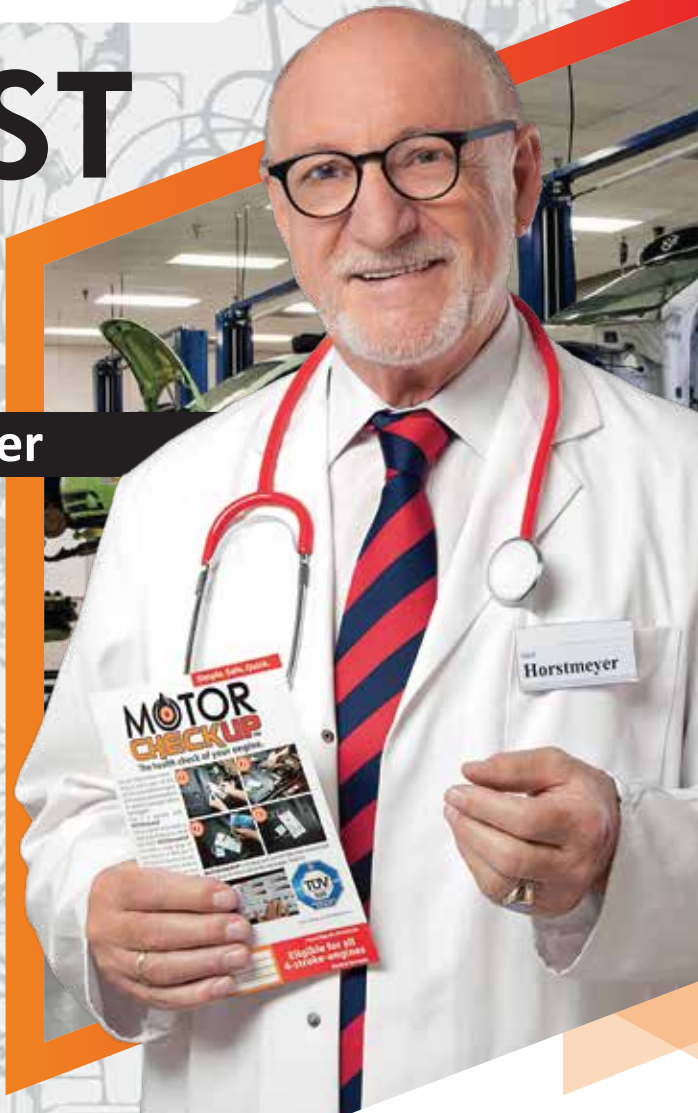

Dr. Horstmeyer

## THE LOOK INTO THE ENGINE

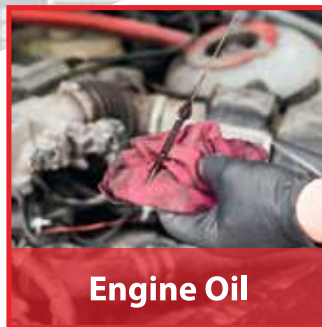

Just ONE DROP OF ENGINE OIL  
IS SUFFICIENT to check the  
engine's health.

A SIMPLE AND SAFE diagnosis  
system for:

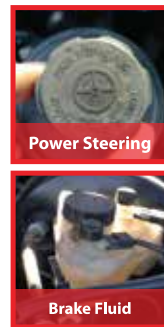

- Sediment, Grime, Abrasion
- Condition of Oil
- Water ( Coolant )
- Fuel in Oil

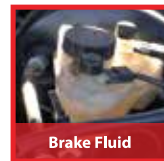

ACCURACY  
UP TO 99%

Engine Oil

Power Steering

Brake Fluid

Transmission Fluid

TESTED &  
CERTIFIED  
BY TUV

Made in Germany.  
Easy.Safe.Reliable.Accurate.

# JUST ONE DROP

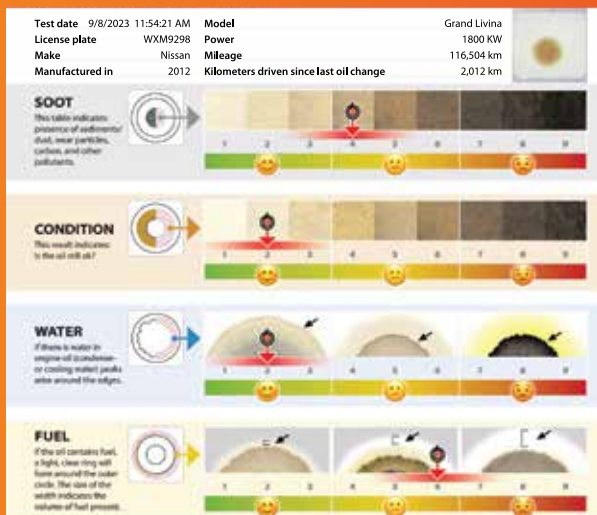

## HEALTH CHECK FOR MOTOR AND COMPONENTS

### TAKING OIL SPECIMENT

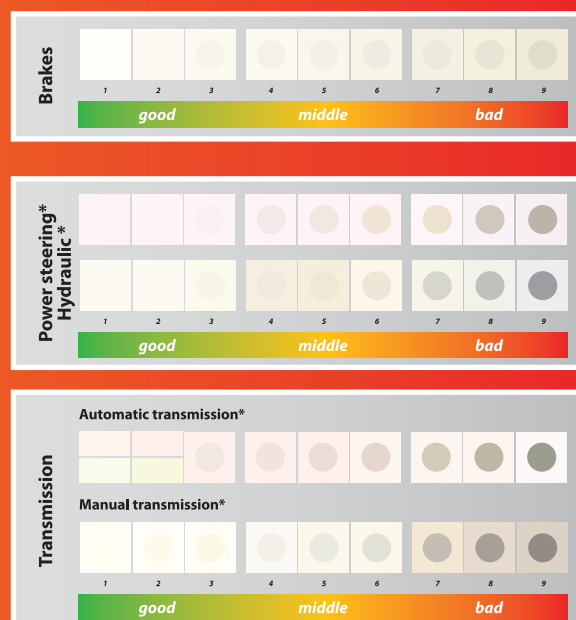

### SAMPLE OF TEST REPORT

### TEST RESULT ( OUR RECOMMENDATION )

Combustion residues (soot, abrasion, sediments) too high and condition of oil obviously good. Too high fuel content, this could be caused by short distance drives for example. Retest after 5,000 km. This diagnosis is explained in detail on page 2-.

### CONDITION OF COMPONENTS
