Kairui quality level and control

Advanced equipments to guarantee products quality:

- **4pcs** four axis machining center, **28pcs** high precision CNC equipment
- **5pcs** automatic robot welding arms, **3** automatic welding line
- automatic **water base painting** line

Auto welding workshop

CNC workshop

Automatic water base painting line

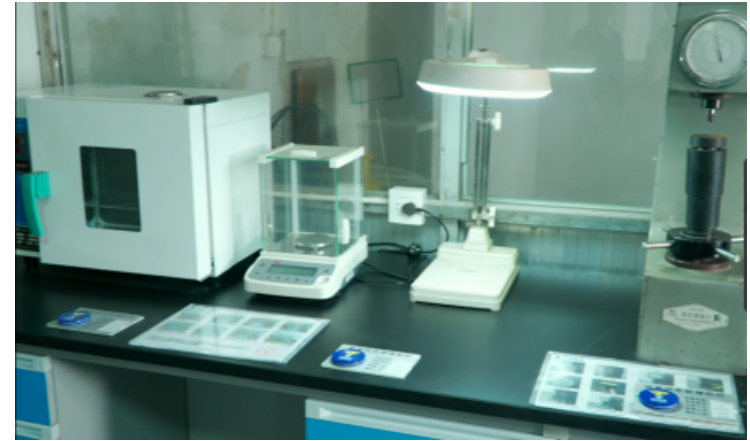

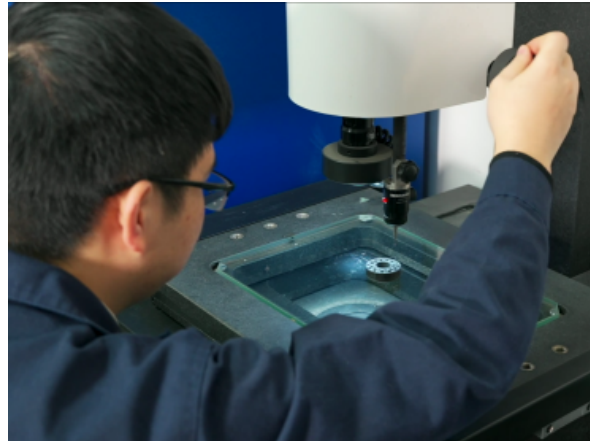

Skilled workers and quality control procedure to guarantee quality:

- **70%** workers have worked for Kairui more than 4 years, good stability of personnel.
- **First article** inspection, **routing** inspection, **pre-shipment** inspection management procedure

Good supply-chain and strict incoming inspection to guarantee quality

- Excellent **reliable supply-chain** and **same components as Oems**
- Strict inspection and performance test for incoming spare parts
