HONOR & CULTURE

National Technologically Advanced "Little Giant" Enterprise, High-tech Enterprises, with 3 Provincial R&D institutions and 1 Provincial Graduate workstation, with 12 authorized invention patents.

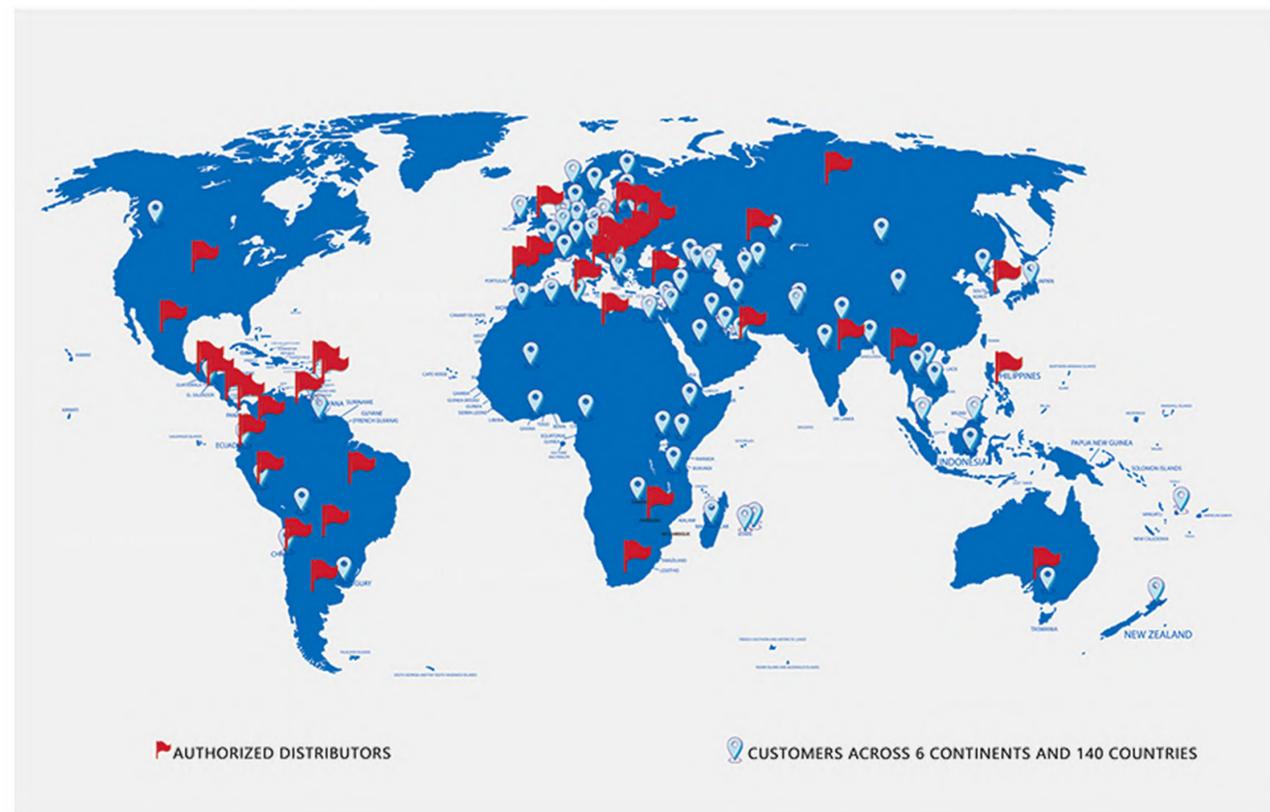

COMPANY PROFILE

E&E TURBO, access to quality certification IATF16949: 2016 / ISO9001: 2015, is a global quality aftermarket turbocharger and turbo parts manufacturer in China Since 2002. The factory covers 24,500 square meters, and it is a national hi-tech enterprise. Its product series include turbochargers, turbo parts, small gas turbine engine parts, high-speed motor direct-driven core compressors (electronic superchargers, fuel cell air compressors, and industrial compressors), etc.

E&E Turbo has the capability of the whole processes from R&D to production, such as tooling design, manufacturing, precision casting, CNC machining, welding, dynamic balance, and assembly test. Workshops have a number of state-of-the-art processing equipment, and dynamic balancing facilities, and all turbochargers and turbo parts are given a full minimum 12 months warranty.

E&E GLOBAL COOPERATION SYSTEM

Serving customers in over 140 countries and regions around the world

Global supplier of a full range of turbochargers and components

E&E Turbo is a well-known brand in the global turbo remanufacturing and aftermarket, and also supply for performance market and OEMs, covering Honeywell (Garrett), BorgWarner, Cummins, MHI, IHI, MTU, ABB and etc. A full range of automotive (passenger cars, commercial vehicles) and off-highway diesel engines & gasoline engines/industrial and marine superchargers/aeropiston engine superchargers. Products cover complete turbochargers (over 500 models), cartridges (over 2,000 models), turbine wheel, compressor wheel (including MFS), bearing housings, nozzle rings, actuators, repair kits. With 40,000 SKU (over 30,000 SKU with perennial inventory) sold to more than 140 countries and regions around the world.

Intelligent Manufacturing

2015

Independent R&D of the 1st automatic production line for turbine wheels
5-axis machining center was imported from Switzerland.

2002-2014

Starting from 6 sets of equipments with manual production line.
Investment casting production line was set up.

2018

The 2nd automatic production line of turbine wheels in operation.

2019

Fully automatic intelligent turbocharger assembly line.

2022

The 3rd automatic production line of turbine wheels in operation.

2021

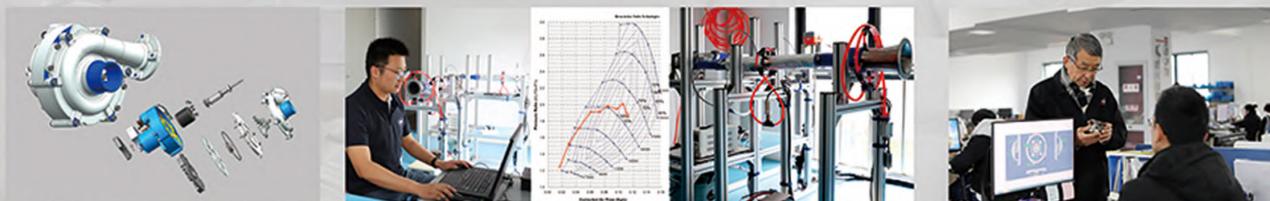

Independently developed groups of automatic processing units of impellers.

E&E Intelligent Manufacturing is a flexible manufacturing that meets the individual needs of customers. Multi-process products are combined with similar items through technology guidance to form mass production of processes.

E&E R&D

- Product & Part Design
- Reverse Engineering Design
- Design Verification

E&E QC

• Quality Management Tools

MSA/SPC/PPAP/APQP/FMEA

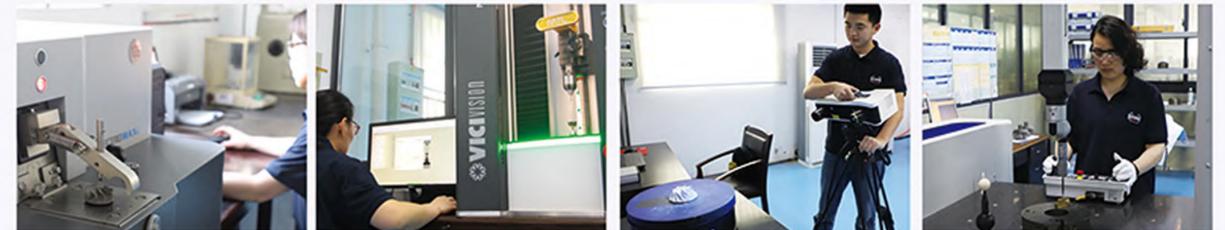

• Quality Policy

Quality Priority Client Foremost People Oriented Quick Response

• Quality Goal

Customer Satisfaction Score >95
inspection Pass Rate>95%
PPM < 1000 (OEM<100)

Product One-time
On-time delivery Rate≥92%
