Vasure strength

Plan for the future

Company Profile

Established in **1997**, Vasure proposed the slogan "Industry will prosper China, and frankness will be trustworthy".

With the **new plant in Shaoxing commissioned in 2007** and the **Ruian headquarters completed in 2011**, Vasure has developed over 3,000 varieties of clutches.

60% of the products are exported to **over 70 countries**, including Europe and South America, **20%** are sold domestically, and **20%** are supplied to domestic OEMs.

This has earned the trust and recognition of customers both locally and internationally.

Vasure specializes in producing clutch driven plate assemblies and cover assemblies.

It passed **ISO9002** certification in 2001 and **TS16949** certification in 2008.

Creating a global brand is the shared goal of all Vasure employees!

System Certification

Human Resources

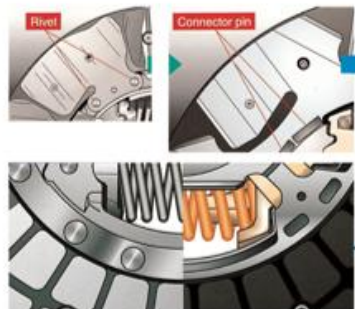

We adhere to a people-oriented approach, valuing and respecting talent. By bringing together management elites and technical talents from all over the world, we focus on the market and aim for maximizing efficiency. **We emphasize employee performance evaluations** and have established a **systematic and comprehensive market pressure transmission mechanism and target management system**. Continuously enhancing our cultural management, we foster an atmosphere of **competition, unity, learning, and openness**, as well as a **relaxed and flexible work environment**.

Product Service

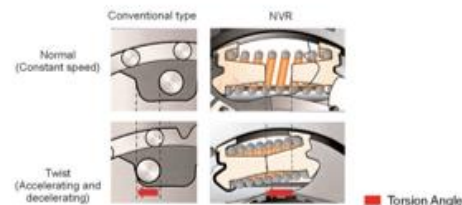

Employs single-unit disc spring assembly

The use of a integrated disc spring allows coil springs to be positioned at the outmost edge of the disc plate, which increases NVR performance.

Use of Seat Stopper

Adding a seat stopper function made it possible to increase the torque angle.

Conventional type → NVR

Addition of spring retention feature to seat

New coil spring design eliminates contact with the metal plate improving friction durability.

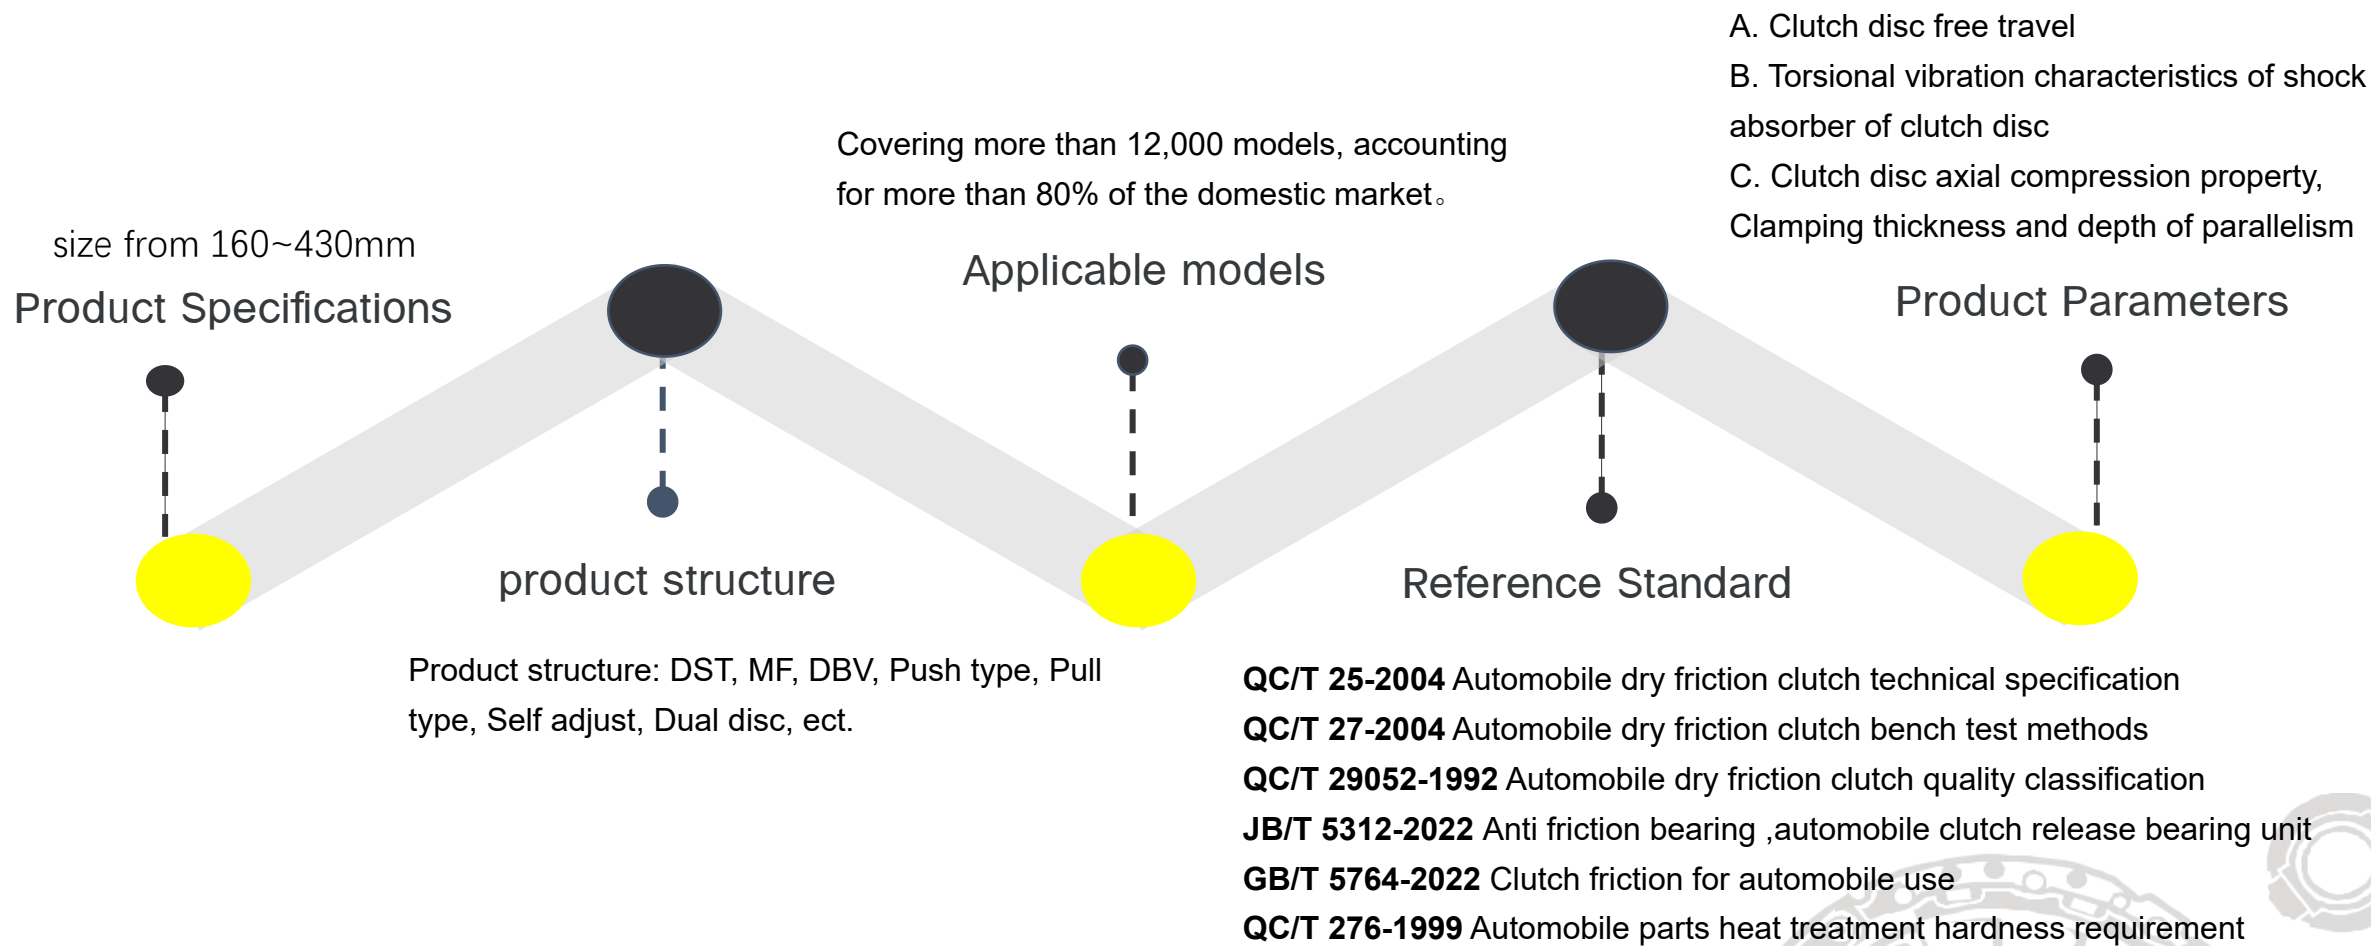

Use of large capacity coil springs

Use of large capacity coil springs enables extended applicable torque range

product description

Based on your needs, **Vasure** will design products that meet your requirements, develop the process flow, provide data, and handle installation and debugging. **You** only need to provide your suggestions and requirements, and Vasure will deliver perfect quality and customized solutions.

- Product advance design and development
- Mold design and mold making
- Accessories stamping and heat treatment, accessories machining
- Assembly
- Full quality inspection test at the test center
- Mould design and mould making

Quality Assurance

Detection system

Vasure integrates the world's strictest quality inspection standards to ensure that every Vasure product fully meets development intentions and usage requirements: **focusing on details and starting from the smallest aspects.**

Vasure has also brought in a series of precise testing instruments and equipment. The company implements a **three-level inspection system**: raw material inspection, process inspection, and warehouse product sampling inspection, to **strictly control product quality.**

Product display

>>Vasure Clutches, the Custom Choice,
Extraordinary Power

Heavy Truck : Custom clutches, bearing heavy
loads, driving without obstacles.

Passenger Car: Precisely tuned, smooth shifting,
easier driving.

Agricultural Car: Custom agricultural clutches,
stable and efficient, aiding in bountiful harvests.

Customization Services: Tailored to your needs,
customized to match your power expectations.

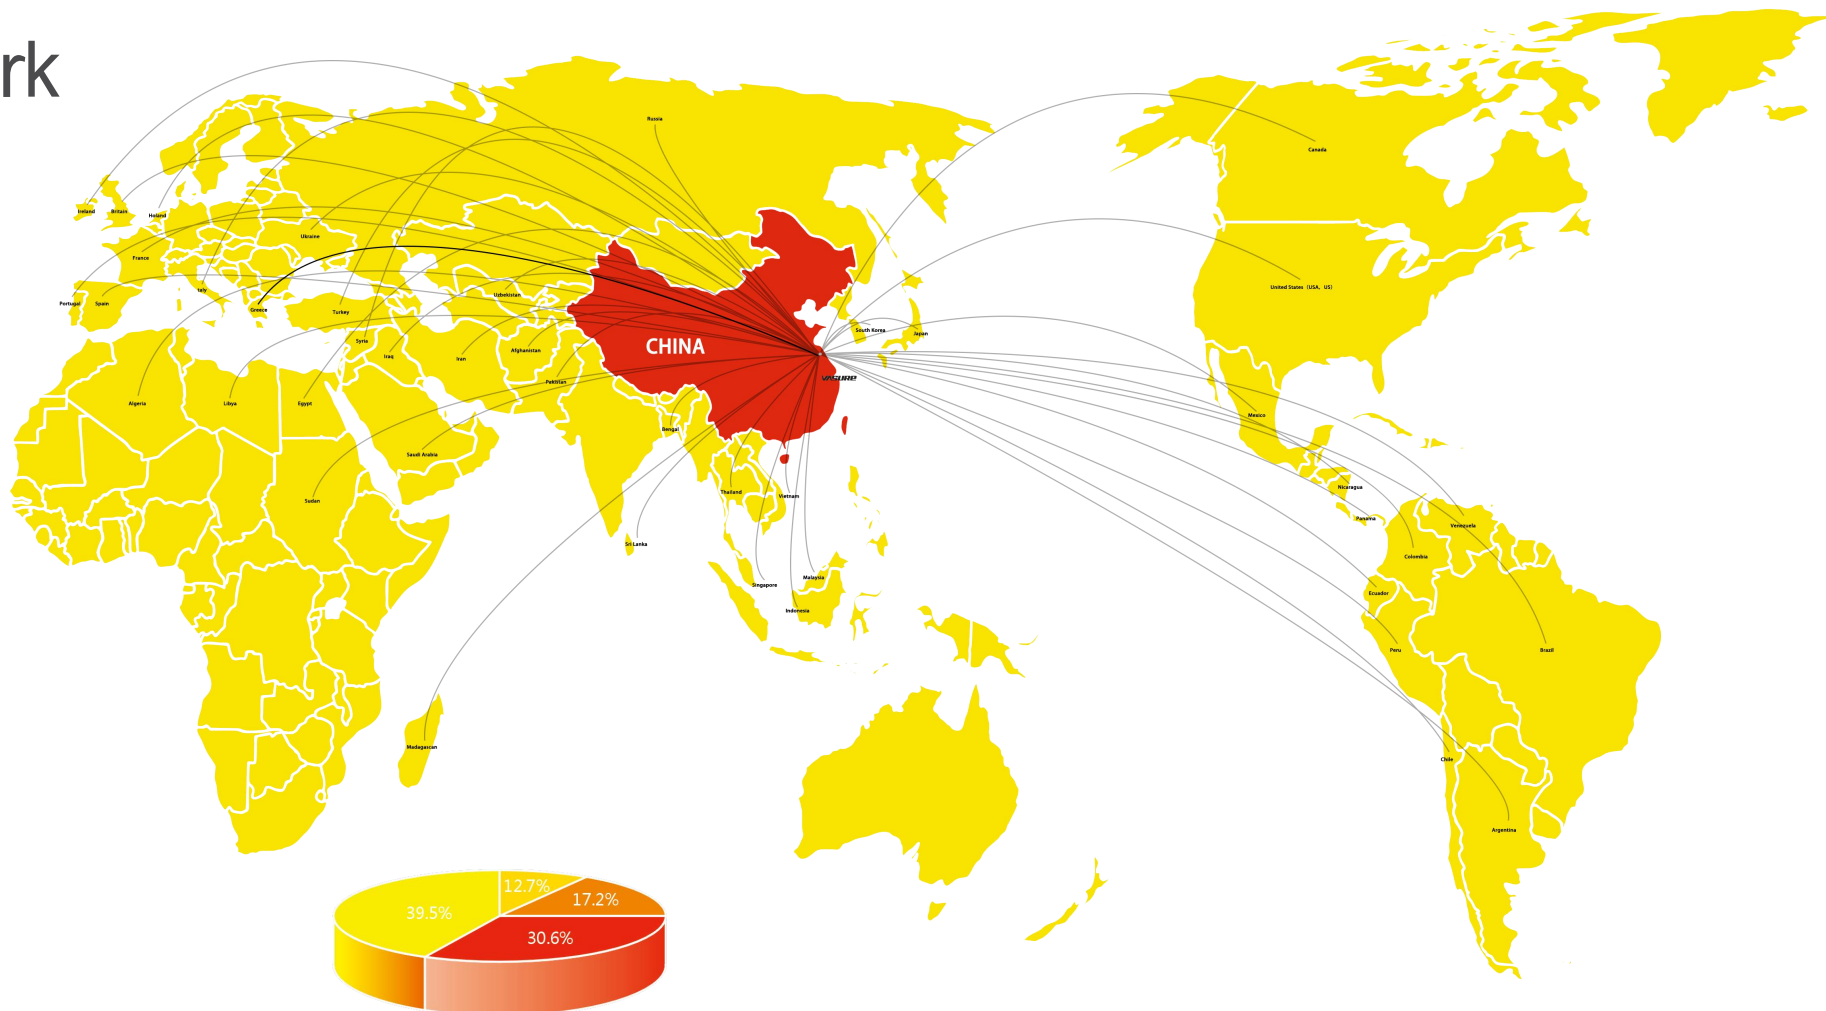

Vasure Clutches, the Custom Choice, making
your vehicle's power extraordinary.

Marketing network

>>After years of development, Vasure Enterprise has now established multiple sales networks and institutions in China, covering all provinces, cities, autonomous regions across the country and exporting to South America, Europe, Southeast Asia and other countries.

- Asian and Pacific area
- European area
- Americas area
- Other areas

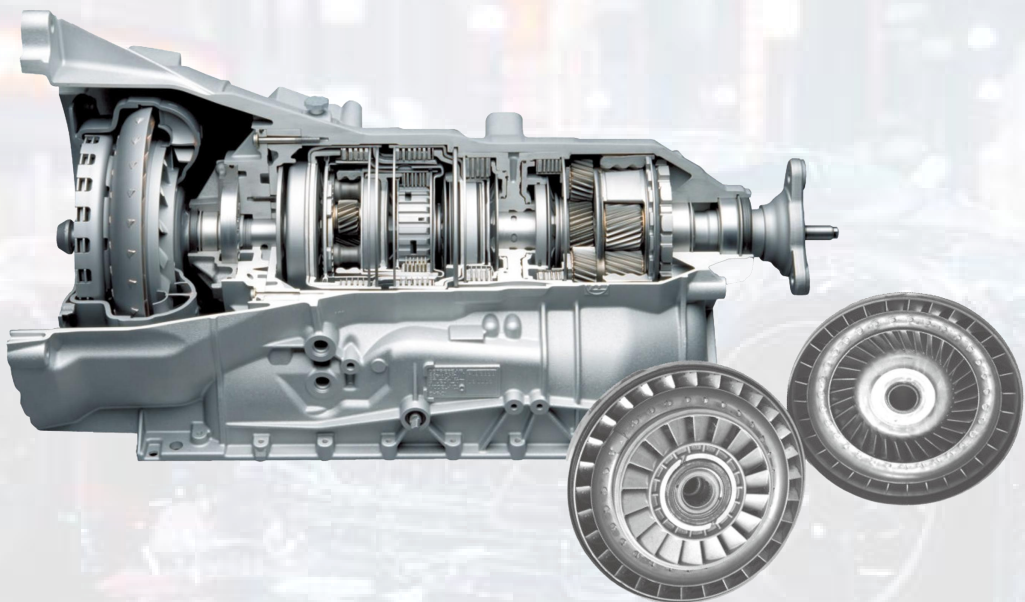

Maritime Logistics

vasure Logistics provides superior and reliable maritime logistics services based on a global shipping network. Through efficient transportation services, innovative logistics solutions, green and sustainable practices, and professional team support, we ensure your goods reach destinations worldwide seamlessly.

Vasure Strength

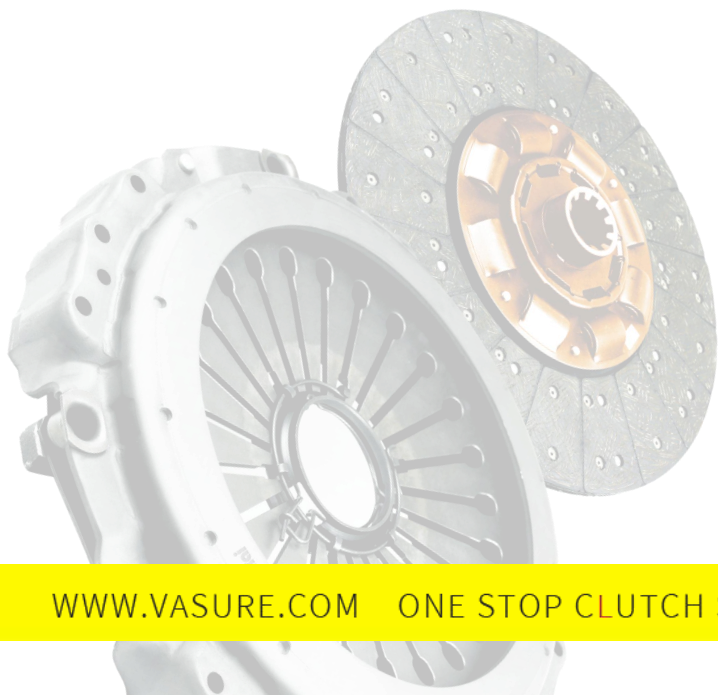

Competitive Advantage

- 01 25 years of craftsmanship in transmission system R&D and manufacturing
- 02 Covering more than 12,000 models
- 01 Established Dr. Huaxin Station
- 02 Perfect quality, personalized customization

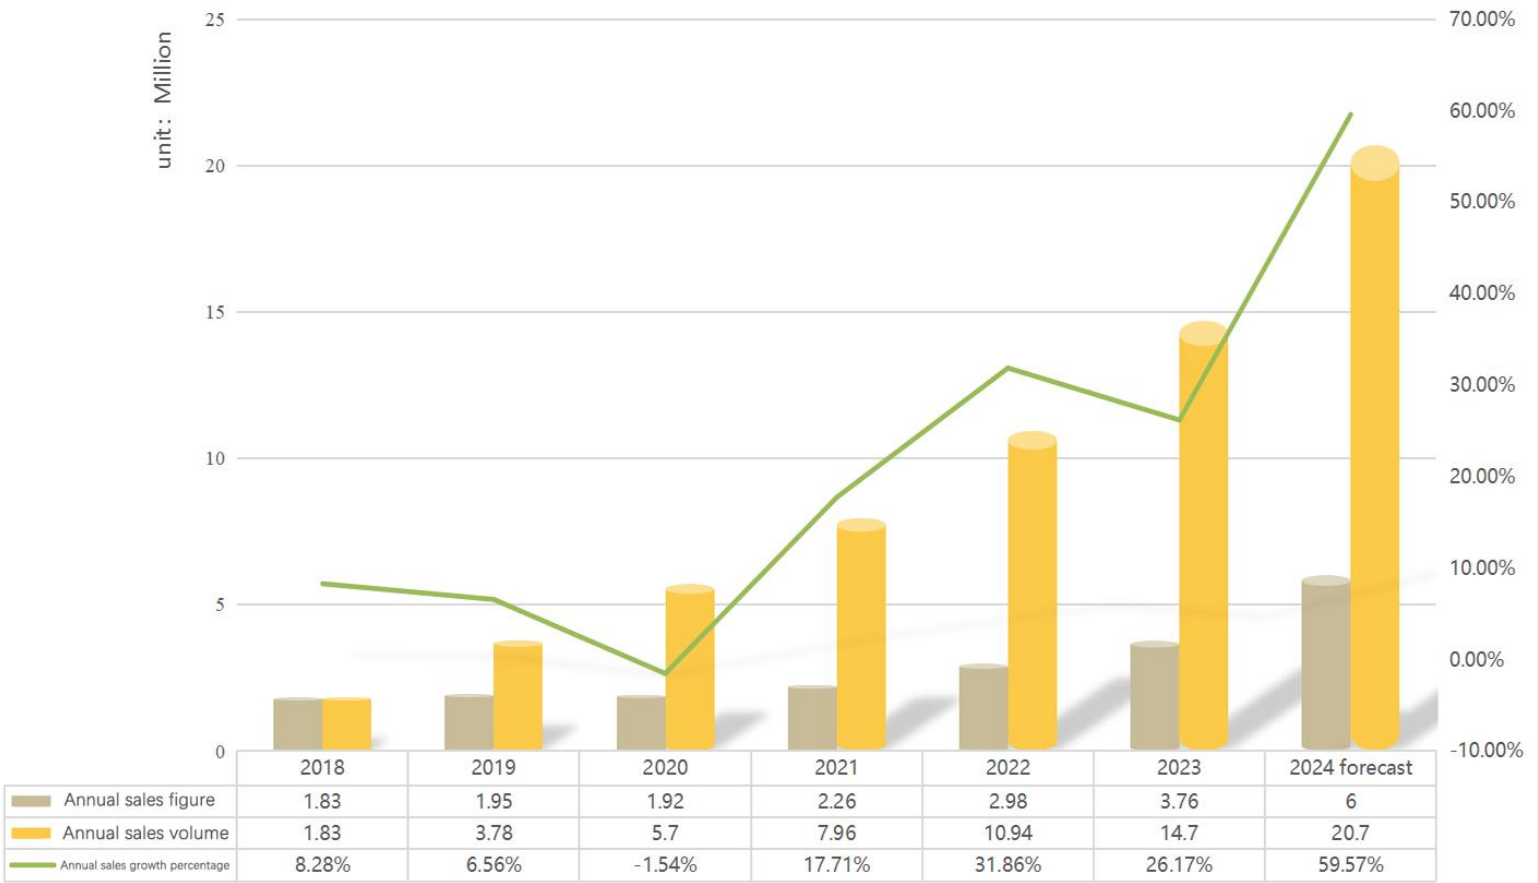

Sales Data

Annual sales volume shows a steady upward trend

It is expected that the annual sales volume in 2023 will increase by 32.74% compared with last year

Annual sales data chart

Cultural Concept

Vasure's mission: to build a global one-stop supply platform.

Vasure's vision: Huaxin's excellence comes from integrity.

Vasure's goal: to stay in China and establish the world with trust.

Vasure's philosophy: to provide value-added services to users, to create an organization focused on contribution, and to strive for a world-class brand.

Vasure's spirit: to convey positive energy thinking and realize Vasure's dream factory.

Quality policy: perfect quality, personalized customization.

Core values: Perseverance because of belief!

Taking the creation of a global one-stop supply platform as a mission.

requires not only a positive attitude, but also the embrace of change and unwavering confidence.

Persistence is not only our value, but also the driving force for us to complete our mission and embody our value.

Persistence is a kind of perseverance, which brings us together a group of people, one thing, and a lifetime.

Persistence is a kind of wisdom, which makes us regain our strength in innovation.

Persistence is a kind of power, which makes us burst out in the accumulation of momentum.

Persistence is a kind of optimism, which makes us firmly believe in the goal to be reached.

Persistence is a kind of accomplishment, which teaches us to be upright and do things clearly.

Persistence is a kind of kindness, which guides us to be grateful for the past, cherish the present, and fear the future.

Talent Development

Vasure Talent Strategy: Focused Development with an International Perspective

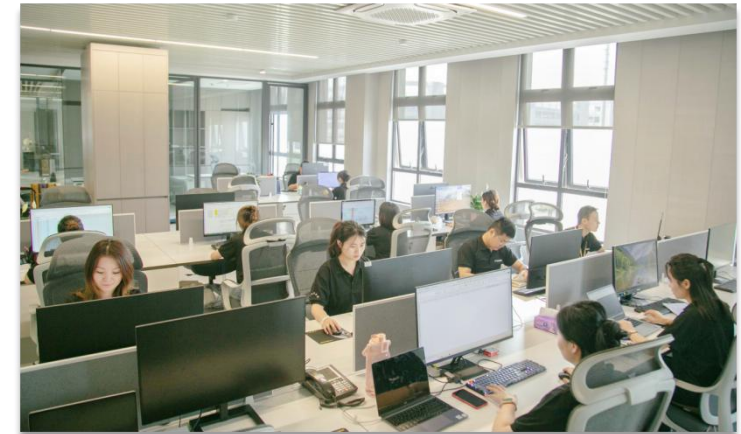

Vasure recognizes that talent is the cornerstone of development. Therefore, we:

International Exchange: Establish platforms for global technical exchange and encourage participation in industry academic events.

Comprehensive Training: Provide growth opportunities for all employees through training, recruitment, and outsourced programs.

Incentive Mechanism: Align benefits with contributions to boost creativity and enthusiasm.

Service Excellence: Focus on value-added services and aim to create a world-class brand.

Planning for the future

vasure five-year ideal

2023 - 4 million units

2024 - 5.5 million units

2025 - 7.5 million units

2026 - 10 million units

2027 - 13 million units

New factory construction

We have 120,267 square meters of new factory land.

12 million sets will be put into production in 2022.

Optimization point

Control Arm

The suspension system is an important part of modern automobiles and has a significant impact on the vehicle's ride comfort and handling stability.

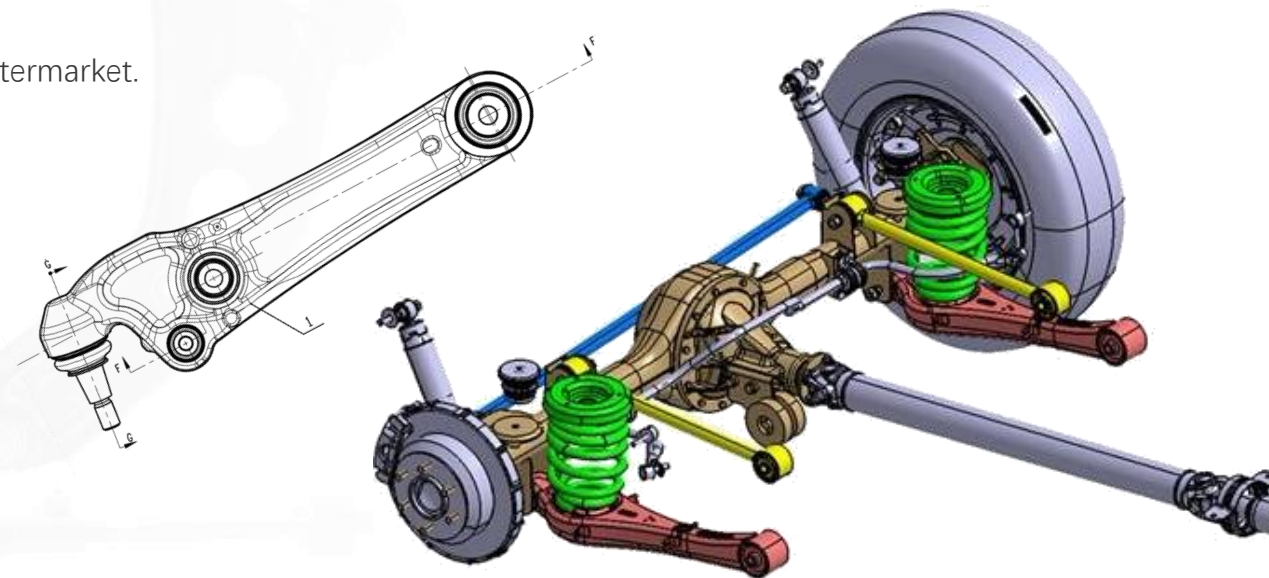

The control arm, also known as the swing arm, is a guiding and force-transmitting component of the suspension system.

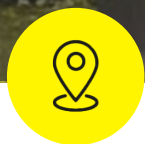

It transmits various forces acting on the wheels to the vehicle body while ensuring that the wheels move along a specific trajectory.

Vasure began researching the automotive control arm market in 2018 and officially launched the Vasure Control Arm Project.

Currently, Vasure has automated control arm production equipment and professional technical personnel, developing over 2,000 types of iron and aluminum control arms.

Vasure provides high-quality products that meet OEM standards for the aftermarket.
