

TRUCK AFTERMARKET SPECIALISTS

STRONGER TOGETHER

Experica was born out of the merger between Revarc and Tecnauto car, two successful companies that decided to join forces, creating a single business that is now Italy's largest. Two different geographic areas and two complementary business models, blending the **efficiency of the Revarc technical department** with the **long reach of the Tecnauto car offices**.

This merger triggered a growth phase that led to the opening of new facilities in strategic locations. Thanks to that expansion, the company has **11 branches** that cover all of Northern Italy.

**TODAY EXPERICA HAS A SOLIDITY THAT
STEMS FROM MANY YEARS' EXPERIENCE AND
A VISION THAT FOCUSES ON INNOVATION,
THE FUTURE AND DEVELOPMENT.**

**A STRONG, FAR-REACHING, FLEXIBLE PRESENCE
THANKS TO NUMEROUS OPERATIONAL OFFICES THROUGHOUT
NORTHERN ITALY**

Fast delivery of any spare part for commercial vehicles, together with **comprehensive, punctual service**, are the hallmarks on which Experica aims to continue building a product and service range that is increasingly tailored to customers' requirements. Strategically located branches with well-stocked warehouses ensure an optimal response to urgent requests and guarantee **immediate delivery of products made by the market's leading brands**.

**EXPERTS, PROVIDING
THE BEST SOLUTION.**

OUR BRANDS

We're partners with the leading commercial vehicle component producers. The company strategy is to supply **top quality spare parts** and **make effective use of direct collaboration with suppliers**.

AN INNOVATION- FOCUSED VISION

Our **ultra-modern, dynamic facilities** allow us to guarantee a comprehensive, always-up-to-date range of spare parts and, above all, delivery within a few hours of placing the order. Sales, purchasing and indoor warehousing facilities **covering 15,000 m²** constitute the core of the company; those warehouses are equipped with a fully computerized product cataloguing and management system, ensuring orders are processed and fulfilled immediately.

Technology, in fact, has always been the main driver behind our work: for example, RF barcode scanners ensure we're able to handle large quantities of goods at **maximum efficiency** while minimizing both errors and waiting times. Our company philosophy is built on a commitment to quality and safety, as demonstrated by our application of a Quality Management System as per UNI EN ISO 9001:2015 and Occupational Health and Safety Management System Certification in compliance with UNI ISO 45001:2018.

...ALWAYS WITH YOU ON THE ROAD

ALWAYS AT YOUR SIDE...

Being a reference point for customers means providing them with constant, meticulous support. That's why Experica is a member of the **Truck Company Group and Grouppauto**: this guarantees us direct access to the industry's major suppliers so we can provide a vast range of products from the market's main brands. Our customers can also join the **Top Truck multi-brand workshops network**, a Grouppauto International brand present in 17 countries with over 900 workshops worldwide, of which 190 in Italy alone.

Best-brand spare parts for industrial vehicles, a full range of services and the most sophisticated instrumentation: that's how we respond to the demands of a constantly evolving industry, making us an **exclusive reference point for the truck aftermarket**. Our dynamic, innovation-driven approach also sees us supply **cutting-edge diagnostic devices for the remote repair** of vehicles and provide prompt intervention in the event of a breakdown. Experica's customers can count on **highly reliable ground-breaking technology, plus consultancy and technical assistance services**, available by phone or directly in the field. And to ensure they get the best out of the diagnostic equipment, we provide special training courses: meetings co-organized with suppliers that explain all the functions and illustrate the full potential of the technologies offered. What's more, our large fleet of vehicles and specialized couriers ensures we're able to handle emergencies and the supply of spare parts within 4 hours of the request.

**WORKING TOGETHER TO PROVIDE ONLY THE BEST,
CONSTANTLY EXPANDING TO ENSURE WE'RE
WITH YOU ON THE ROAD.**
