Specialist in innovative paint systems

+175
innovative products

You can rely on over 200 years of experience in developing paint systems! This expertise is our guarantee of high-quality coatings with an innovative nature. Our focus is on the development and application of eco-friendly and sustainable coatings to provide the best possible protection for your products.

+550
industrial customers

Want to know what we are really passionate about? High-quality paint solutions and satisfied customers. That's why we start from where the big multinationals stop. At Advanced European Coatings, we not only advise you on products that are perfect for you – our application specialists will also come on site to give advice on the spraying work, right down to the very last detail.

+200
years of experience

We listen to your expectations and engage with your products and their environment. By doing this, we can offer you paint solutions that will perfectly suit your activities. Open dialogue is essential for us as your satisfaction is our priority, now and in the future!

Used in over
20 countries

Our paint systems are used all over the world in a wide variety of industries. Our coatings provide optimum protection for machines, installations and other products in constantly changing environments. For global players, our personalised approach and the numerous options of our customised solutions are undoubtedly decisive factors.

Optimum protection at all times

Vehicles, installations and machines have to be able to withstand a lot. That is why we always match the paint systems to your product and industry. From corrosion-resistant coatings in humid environments, to scratch-resistant paint for cranes and paint systems that are resistant to chemicals – our solutions always provide protection in the best possible way!
