

LOW AND HIGH VOLTAGE
HARDWARE LABORATORY
FOR HARDWARE TEST AND
DESIGN VERIFICATION

POWER ELECTRONICS AND EMOBILITY

SPECIAL EXPERTISE
IN EMOBILITY PROJECTS

PROTOTYPE TESTING

- In-circuit testing
- Board and system level test
- Low and high voltage tests
- Wide temperature range
- Manual and automated test

CALCULATION

- Worst case analysis
- Check of component selection
- Lifetime calculation
- Temperature rise calculation
- ISO pulse stress analysis

RETURN PART ANALYSIS

- Fault history evaluation
- Defected component analysis
- Root cause analysis
