### Products 1

It is a vehicle auxiliary steering wheel bar that can be mounted on all autonomous, semi-autonomous and manual vehicles. It is an auxiliary means for driving when there is a traffic jam on the highway and in a straight line. It has been recognized for its safety because it has 100 million auto insurance. It is a device that reduces shoulder pain, neck and back pain by putting your hand on the thigh and changing the shape to the desired shape and driving comfortably while maintaining the holding force. As an additional function, AI cameras on the dashboard identify real-time drowsiness and support safe driving through voice guidance to prevent drowsiness through applications.

### Products 2

Car Armrests can be mounted on any car's console. You can freely mount your arms and control the height and back. Along with the fluffy touch, you can wirelessly charge and enjoy work and cooking as needed. It is an armrest that can be used freely because there are enough cup holders.
