## »»» Company Profile

Taizhou Yongzheng Automobile Parts Co., Ltd. an innovative automotive parts manufacturer since 1997, is dedicated to developing and producing the critical chassis suspension parts----sway bars and the accessories.

We own complete production line with no outsourcing for prep or post-op work. Forging, cutting, forming, heat treating, fabrication, shot peening, powder coating and, QC-check testing . . . It all happens here, under one roof.

As an IATF 16949:2016 certified enterprise, we have strict control from raw material to finished goods. Sway bars are made of high strength spring steel. Goods are conducted various tests, including salt spray test, fatigue test., etc. All our parts are tried and tested in harsh conditions, ensuring our goods will perform no matter the task or terrain.

Over the 20 years, we transformed from "product diversification" to "specialized production", aiming to create suspension solutions to provide better stability, handling and control in on and off-road applications.

Taizhou Yongzheng is renowned as one of the best suspension parts manufacturers in all markets and global applications. We've established good strategic cooperation with some big players in the international automotive aftermarket, OEM and performance market over the years.

We aim to provide our customers with high-quality and cost-effective products, satisfying customized needs. We strive to create greater value for customers and seek better benefits for employees.

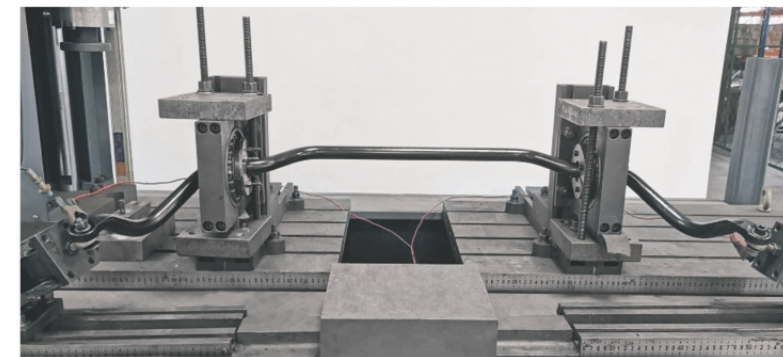

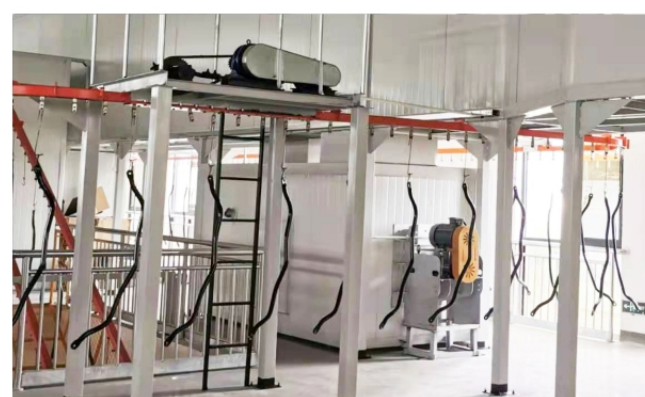

## Certification

IATF 16949:2016

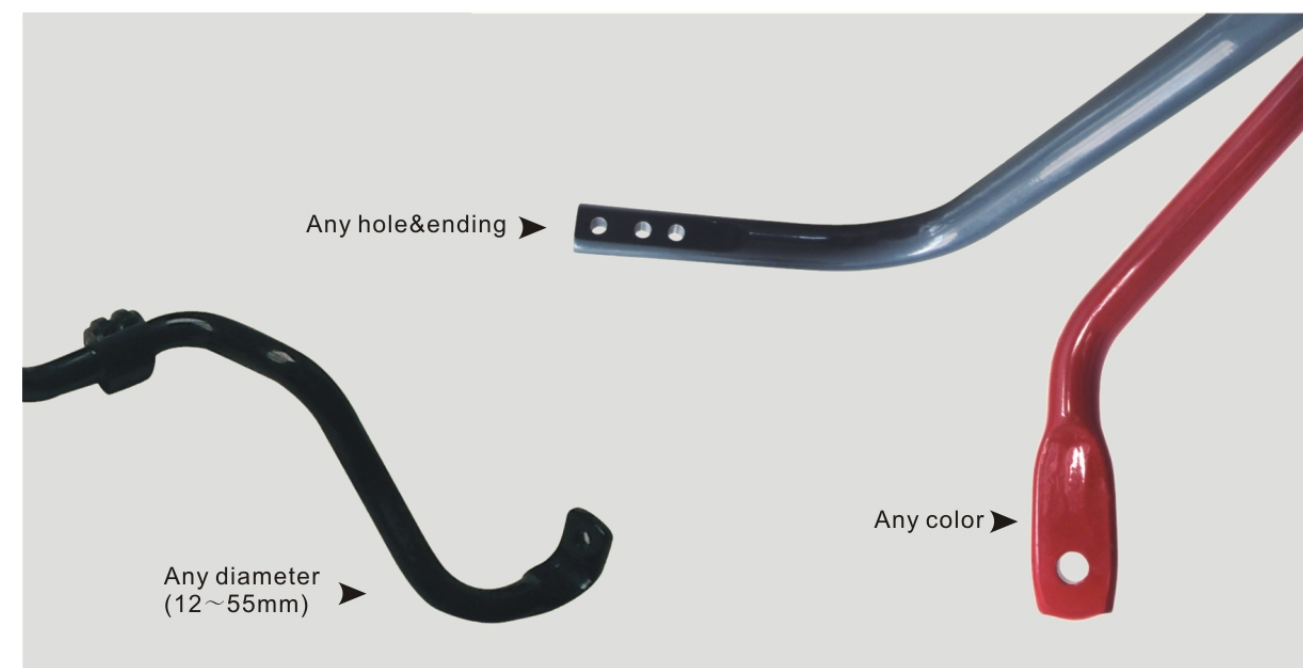

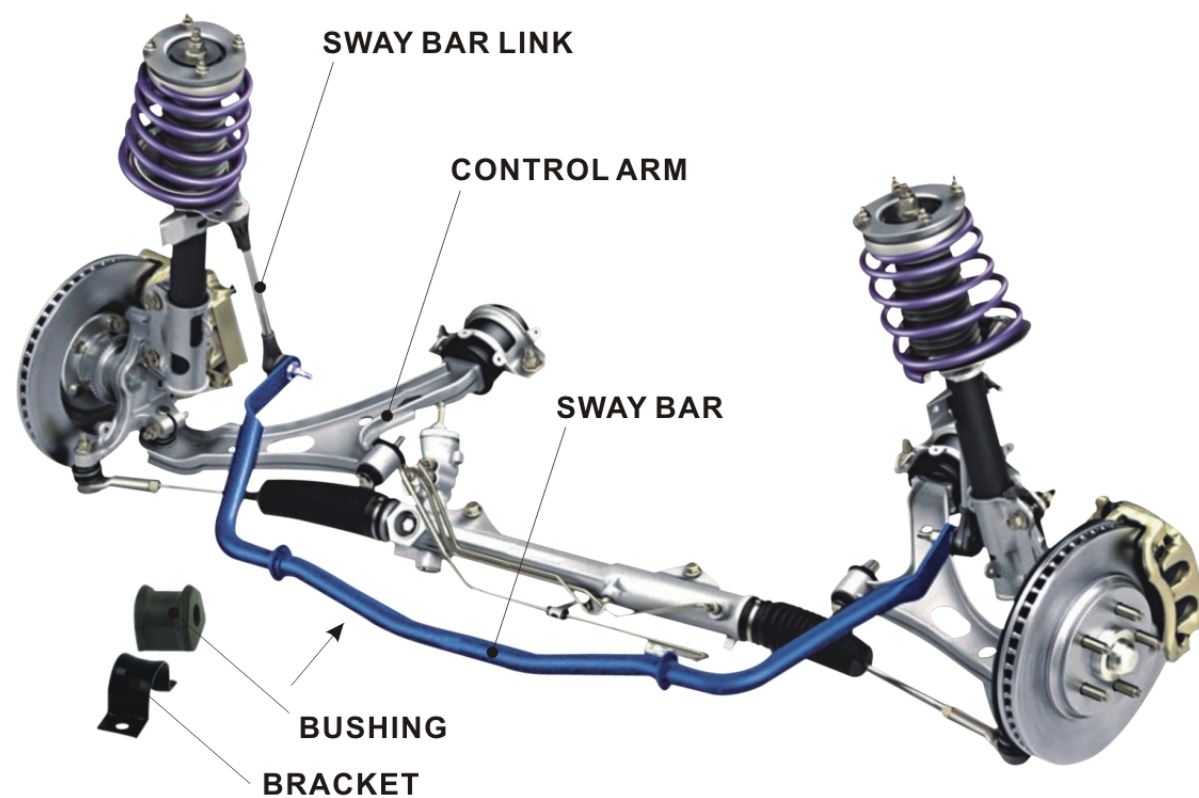

- Provide customers with cost-effective, high quality products
- Work on labor-saving solution, production process innovation.
- Lead time is optimized to be the earliest time

- All moulds are CNC shaped
- Strictly follow IATF 16949: 2016
- All parts are verified by special fixtures and 100% inspected before shipment

<b>Material</b>	A <sup>+</sup> Spring steel
<b>Process</b>	Hot/ cold-forming Heat treatment for all parts
<b>Customized</b>	Color /size optional Fit various vehicles

### Quality Assurance

- 100% inspection before shipment
- Each part verified by special fixtures
- Salt spray test up to 400<sup>+</sup>h
- Fatigue test up to 200,000<sup>+</sup>cycles

### Innovation is our most core value

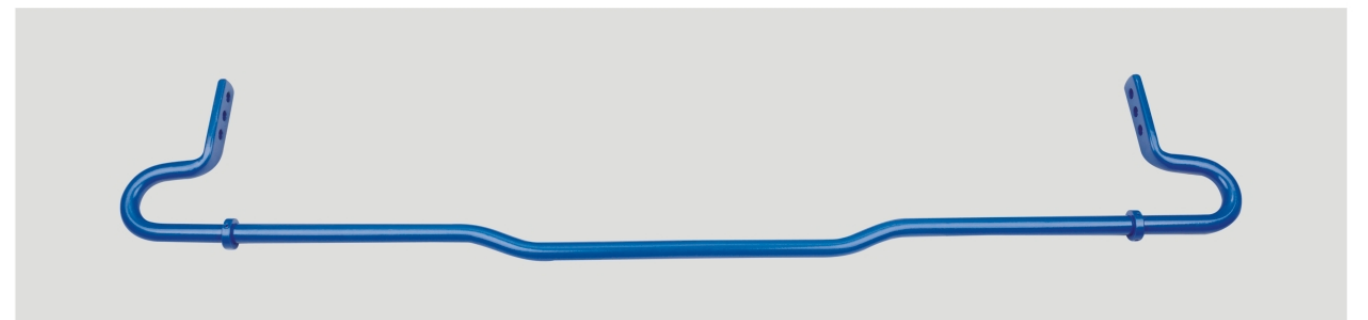

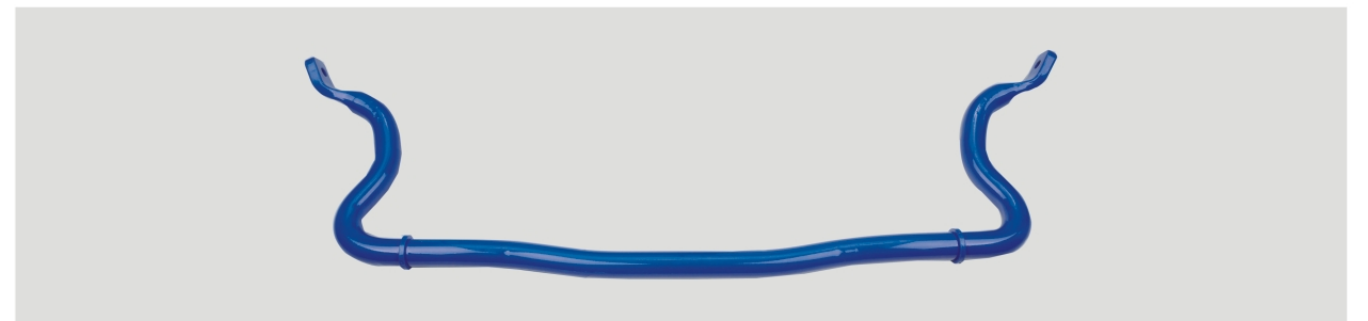

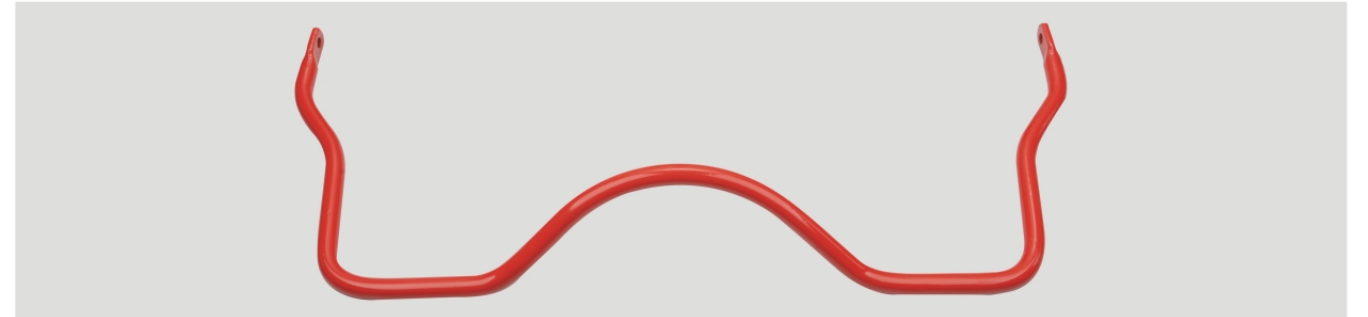

We have the ability to develop new products by state-of-the-art tools, technology, customer feedback, actual market situation.,etc.
