About company

KIMCHA

KIMCHA is an automobile parts trading company established in 2019.

KIMCHA has been exporting components of automobiles to multiple countries, developing and running various online services in order to help small and medium-sized enterprises in Korea settle down in overseas markets.

Name of company	KIMCHA (sole proprietorship)		
Representative of company	Yang Yoo Jeong

About SENGO brand

Global Auto Parts Inventory Sales Mall 'SENGO'

To further expand our brand 'SENGO', we have manufactured and provided automotive parts in ODM - Items: Fuel pump, seal

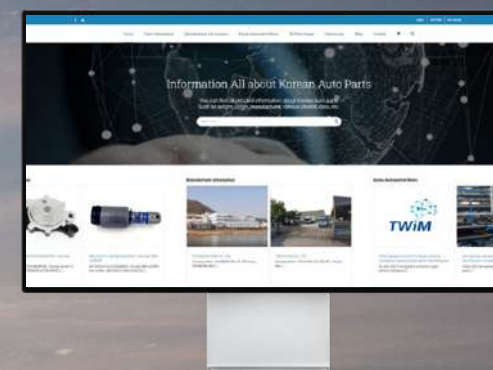

Our business model

1. Online platform development and overseas PR services

koreapartsinfo.com: Information service about Korean automobile parts for overseas customers

KIMCHA has developed a service that provides information on parts of Korean automobiles based on the CEO's 12-year-long experience of overseas automobile parts sales and questions frequently asked by overseas buyers.

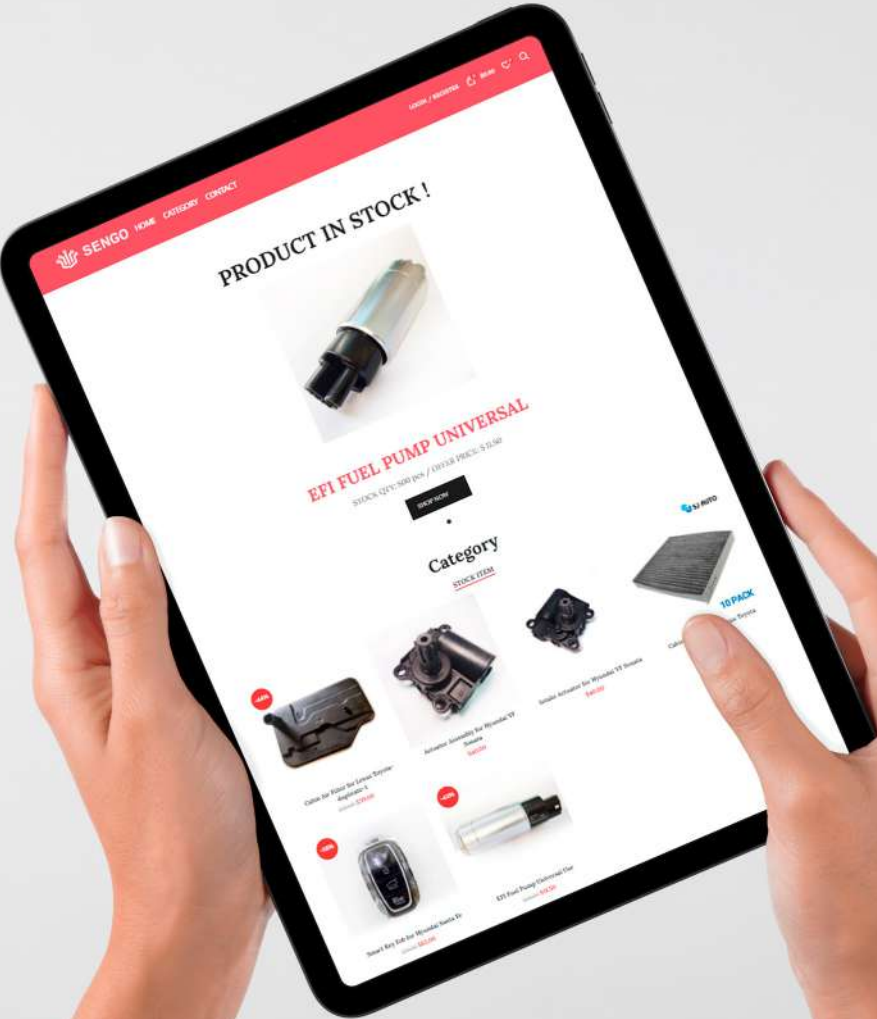

Koreapartsinfo.com introduces Korean companies that manufacture automobile components, it also shares details on automobile parts with overseas buyers by translating them.

Our business model

Stock-clearing store of Korean automobile parts for overseas customers (sengo.co.kr)

Sengo.co.kr provides information on automobile component inventory owned by Korean makers. Those parts are updated by unit of MOQ and sold at prices within affordability. Customers can conveniently order the parts in stock with no wait manufacturing period! Easy payment with Paypal is also available.

Group purchase and B2B sourcing of products by Korean enterprises for overseas customers (kimcha.shop)

Looking for new made-in-Korea products?

This service reduces your cumbersome and repeated comings and goings to Korea to source the products. KIMCHA simultaneously brings a joint purchase system that includes a definite target quantity and period, and also provides a sample product selling service that allows orders for only one unit.

The joint purchase system relieves suppliers' pressure on inventory management, and the buyers can get the products they want at moderate prices.

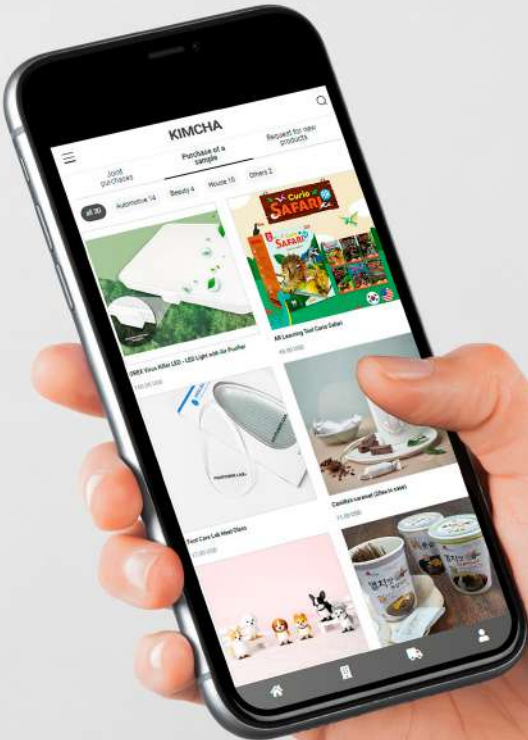

If you're not assured of the quality of a new product you haven't bought yet, try it through a sample purchase service, which accepts even one-unit orders.

In addition, you can inquire about products you desire to source from Korea.

Easy payment by Paypal on (mobile) web environment more facilitates your import-from-Korea work.

The service enables buyers to easily source Korean products.

(Currently in development and beta test phase)

Our business model

3D image selling & production service (boopum.com)

In many cases, photos taken of the actual products don't look better than you expected, and that kind of experience makes you upset.

In particular, no matter how hard you try, pictures of automobile parts usually get too dull to include in your brochures.

By creating 3D models of your products, this service goes beyond the limit of actual photos and changes them into splendid images suitable for your PRs.

Visit boopum.com and create beautiful images of your marketing work needs.

2. Export/export agency of automobile parts

By collaborating with factories that guarantee product quality at the level of OEM products, KIMCHA produces and exports automobile components by ODM method. In addition, it also exports various kinds of parts for automobile repair with high overseas demand

KIMCHA's main products

Fuel pump

- EFI fuel pump (gasoline). Fuel pump with proven quality and reasonable price

Ignition coil

- Various models of ignition coils for Korean automobiles and others, quality close to OEM products

Spark plug/glow plug/oxygen sensor

- Get diversity and moderate prices on products made by NGK and NTK

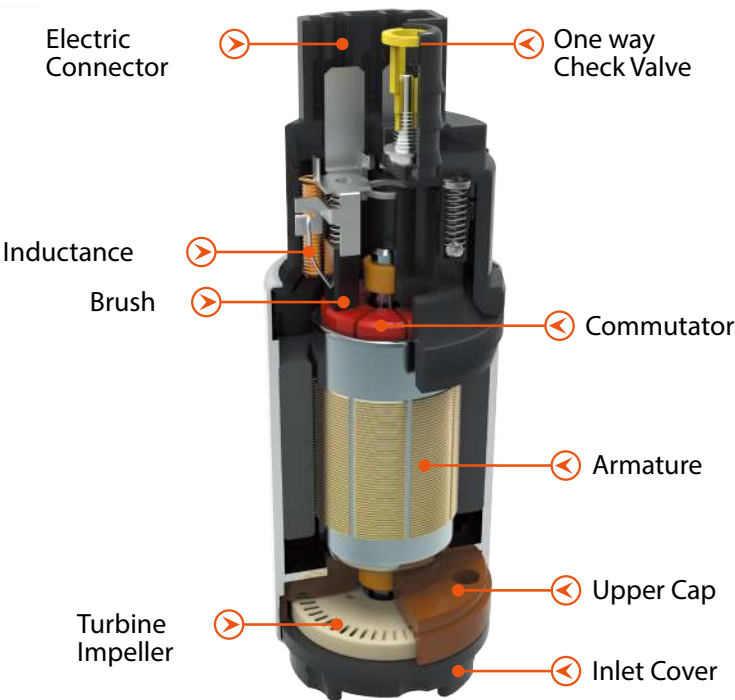

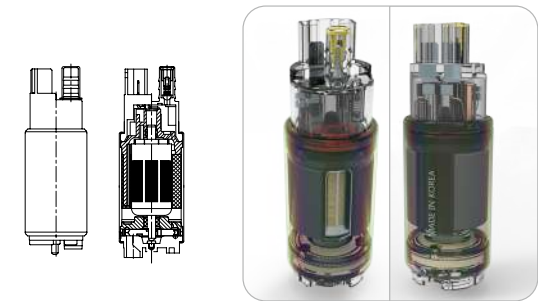

Auto-transmission parts

- The hard-to-buy components are provided quickly

Fuel pump

Petrol or diesel fuel is normally required to operate vehicles with combustion engines – the components used for this process is classified with the term, 'Fuel System' and the fuel pump is at the 'heart' of this system.

Electric fuel pump is undeniably a very important component of a vehicle and in every operating condition, the electric fuel pump must supply sufficient fuel to the engine at the correct pressure for injection.

Ignition Coils

An ignition coil is an induction coil in an automobile's ignition system that transforms the battery's voltage to the thousands of volts needed to create an electric spark in the spark plugs to ignite the fuel.

KIMCHA supply various kinds of ignition coils in Original and Non-genuine brands
