## TYRE SHINER

Cleans car tyres.

It provides a long lasting shine.

It can be used on all plastic surfaces in your car, including mats, door wicks and other rubber parts.

It delays the dust retention and contamination time of the applied surface.

It has anti-static properties.

Protects tyres from fading.

Gives the tyres a wet, black, bright and dark appearance.

It performs very high in practice.

## INSTRUCTIONS ON HOW TO USE

Tyres must be thoroughly washed, cleaned and dried.

Adjust the spray endpiece of the bottle.

Spray plenty on the tyre sidewalls.

It must be rubbed into the surface with a sponge.

## COCKPIT CLEANER

It maintains, regenerate and give a natural appearance to the vinyl, bakelite, leather and plastic surfaces of the car.

It gives a wet, black, bright and dark appearance.

It does not give a sticky appearance where applied.

It does not collect dust due to its antistatic properties.

Protects the cockpit and plastic surfaces from fading.

It prevents the cockpit from cracking.

The active substances it contains are biodegradable.

Suitable for all types of cockpit.

It can also be used on vehicle tyres.

## INSTRUCTIONS ON HOW TO USE

Adjust the spray endpiece of the bottle.

Apply on the cockpit and plastic accessories.

Wipe with a sponge.

It is used by diluting 1/1 of water to make the glovebox semi-matte natural appearance.

## ENGINE CLEANER

It is a general-purpose, high concentration, powerful cleaning product for the removal of dense oil and dirt, applied in all kinds of washable engines and equipment.

It is a concentrated product. It can be used by dilution.

It removes oil dirt without damaging the vehicle's engine components or plastic components.

It also forms a protective layer on the metal surface of the engine thanks to its special mixture.

It is ideal for use on all engines, including automobiles, boats, bicycles and construction machinery, as well as on oil and tar smeared part bodies and concrete surfaces.

## INSTRUCTIONS ON HOW TO USE

Do not use on hot engines.

Cover the air intake and electrical components with plastic bag covers.

Optionally, dilute 1/1 to 1/5 depending on the dirt.

Adjust the spray endpiece of the bottle and spray profusely on the engine, wait for 2 minutes to penetrate.

Rinse with pressurized water.

Remove the plastic bag covers and start the engine immediately.

Keep the engine running for 5 minutes to dry.

Do not apply on vehicle headlights.

Physical Appearance	: Liquid
Odour	: Characteristic
Solubility (in water)	: Soluble
Density	: 1,06
Ph	: 13-14

## FOAMY CAR WASH SHAMPOO & WAX

Caustic and Solvent-free with a stable PH.

It has been developed for washing vehicles with ceramic coating and paint protection.

Easily removes dirt on the vehicle.

It provides an effective gloss on the paint surface after application.

It can be safely used on paint, rubber, glass, vinyl and plastics.

Protects the car surface with its PH balance, easily cleans and rinsed.

Suitable for all vehicles such as; cars, trucks, boats, aircraft, mobile homes and motorcycles.

Biodegradable, non-toxic, environmentally friendly and free of heavy chemicals.

### INSTRUCTIONS ON HOW TO USE

It can be diluted to 1/100 in a bucket depending on the degree of dirtiness and the amount of foam desired.

It is suitable for use with double bucket method.

It is applied on the vehicle with a brush and sponge.

Rinse with plenty of pressurized or unpressurized water.

Dry with microfiber cloth.

## BRUSHLESS FOAMY CAR WASH SHAMPOO & WAX

It can easily be used in automatic car washing tunnels and all foam producing machines with specified amounts.

Easily removes dirt on the vehicle.

It provides an effective gloss on the paint surface after application.

It can be safely used on paint, rubber, glass, vinyl and plastics.

Protects the car surface with its pH balance, easily cleans and rinsed.

Suitable for all vehicles such as cars, trucks, boats, aircraft, including mobile homes and motorcycles.

Biodegradable, non-toxic, environmentally friendly and free of heavy chemicals.

## INSTRUCTIONS ON HOW TO USE

Do not use in pure form.

After thoroughly cleaning the foam tank, put 1-liter car wash liquid in a 60-liter tank.

It is also compatible with different volume tank foam machines.

With these types of machines, it can be used with a mixture ratio of 1/60.

Mains water is recommended to be used.

Spray foam until the entire vehicle is covered with foam.

After waiting for about 1 minute, rinse with pressurized water starting from the first foamed area.

In order to prevent the foam from drying, it is recommended not to apply in direct sunlight or in windy weather.
