

# 10.1 inch Intelligent Vehicle Recording Monitor

( HD297R )

Have you ever met the following **problems** ?

How to know if there are pedestrians or vehicles in the **blind spot** and avoid a collision?

How to provide **evidence** for traffic accidents?

How to **check** vehicle position and monitoring footage in real time?

How to make sure we get a **clear** view even in rain and snow?

Can we use a single monitor to achieve efficient fleet management and intelligent driving **warning** ?

.....

**Collision in  
blind spots**

**No evidence  
available  
for accidents**

**Blurry views in  
rainy days**

**Difficulties in fleet  
management  
and operation**

# STONKAM® 10.1" Pedestrian & Vehicle Detection and Warning Intelligent Vehicle Video Surveillance Monitor Solution Smarter safer more cost-effective

Pedestrian & Vehicle Detection and Warning adopts deep learning technology has 4-channel built-in AI algorithm, detecting pedestrian and vehicles all around the vehicle to remind drivers of potential risks and avoid collision, improving driving safety!

Meanwhile, it carries GPS/Wi-Fi/4G function, This helps improve fleet management efficiency.

Moreover, the monitor is IP66 waterproof, capable of working outdoors in rainy and snowy days.

# Large-capacity video storage to ensure uninterrupted recording

Support video recording, with 2\*512GB micro SD and 1\*2TB SSD storage; Support automatic loop recording, which means new records overwrite the earliest videos when the storage is full.

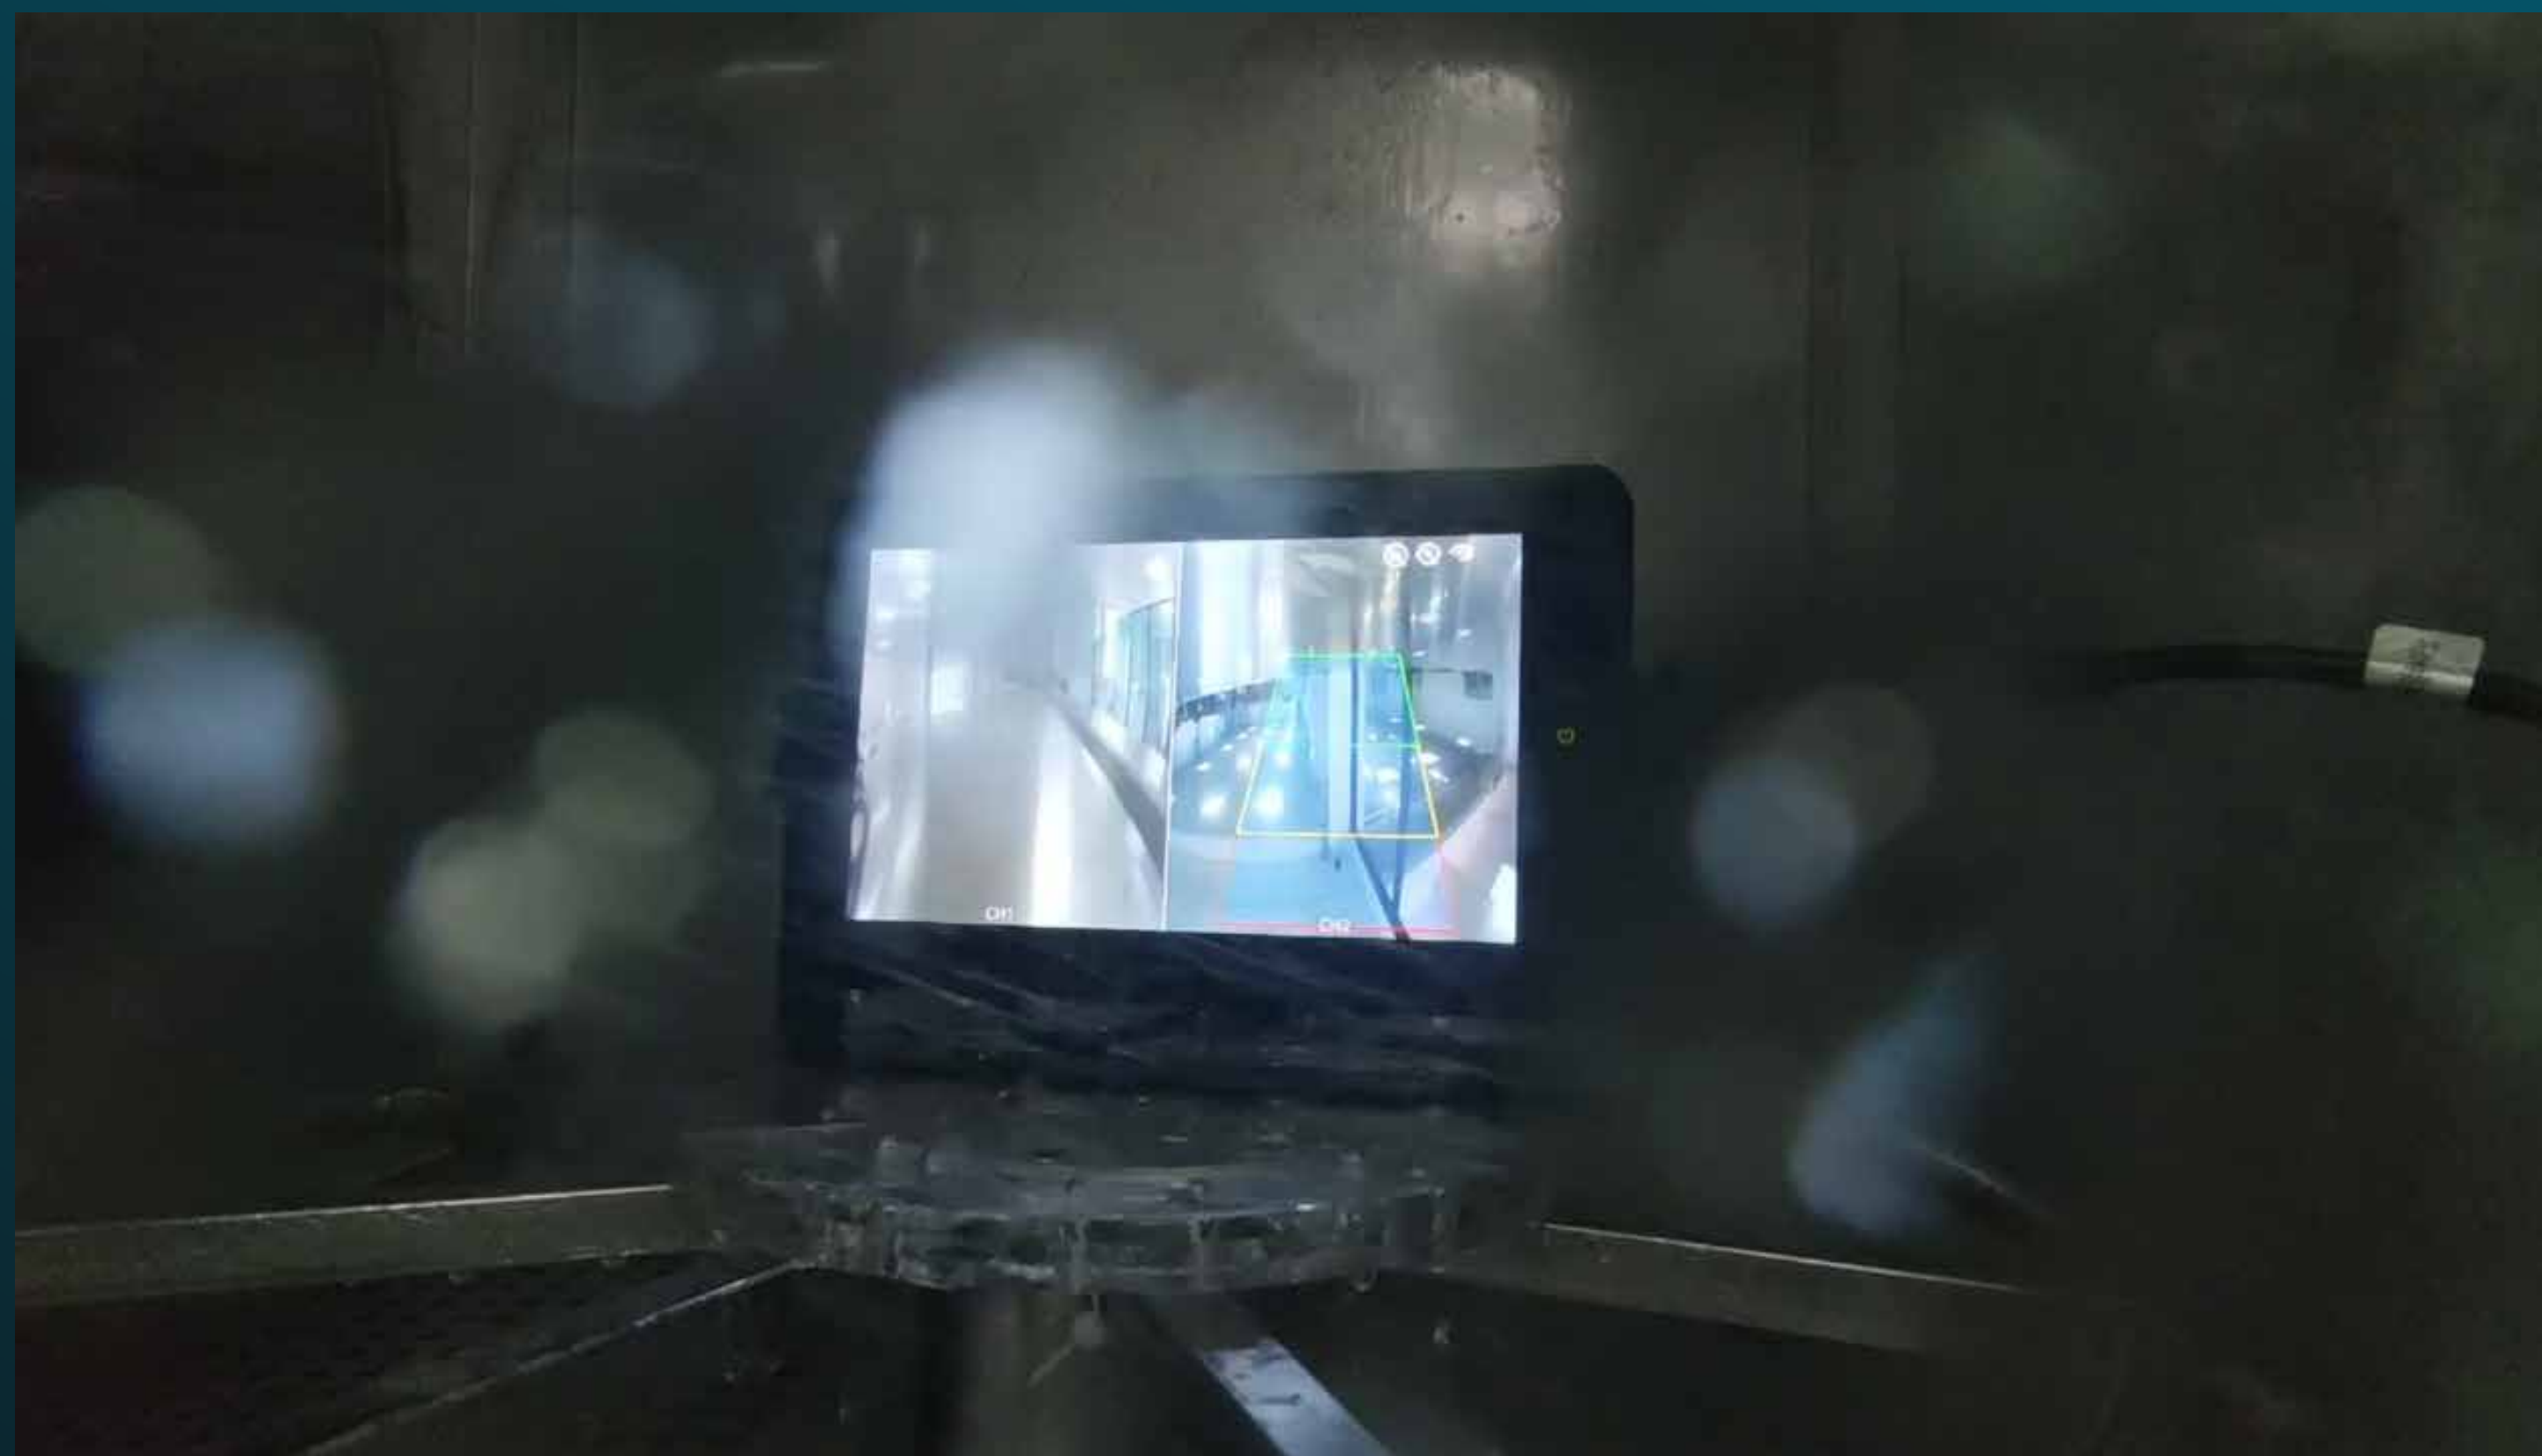

In this way, recording will be forever on going and obtain reliable driving records for accident investigation, dispute resolution and driving analysis when necessary.

# IP66 waterproof, workable even in rain and snow

IP66 waterproof, workable even  
in rain and snow

# Pedestrian & vehicle detection, intelligent driving assistance

Use adopts deep learning technology, contributing to accurate pedestrian & vehicle detection.

It can detect people around such as cyclists, motocyclists, and pedestrians to assist large vehicle drivers in safe driving, avoiding potential injuries to the vulnerables.

# Two-in-one that combines in-vehicle DVR and monitor, make your driving safer

No need of external DVR, with built-in GPS/Wi-Fi/4G, you can easily track vehicle location, receive surveillance images and data at any time through wireless network for remotemonitoring and vehicle management.

# Data security is guaranteed

Memory slot lock and account password login provide double protection for data storage and access

## 10.1" IPS Screen

High contrast, high brightness. It could restore the true color, presenting the brighter and more delicate display with much higher resolution.

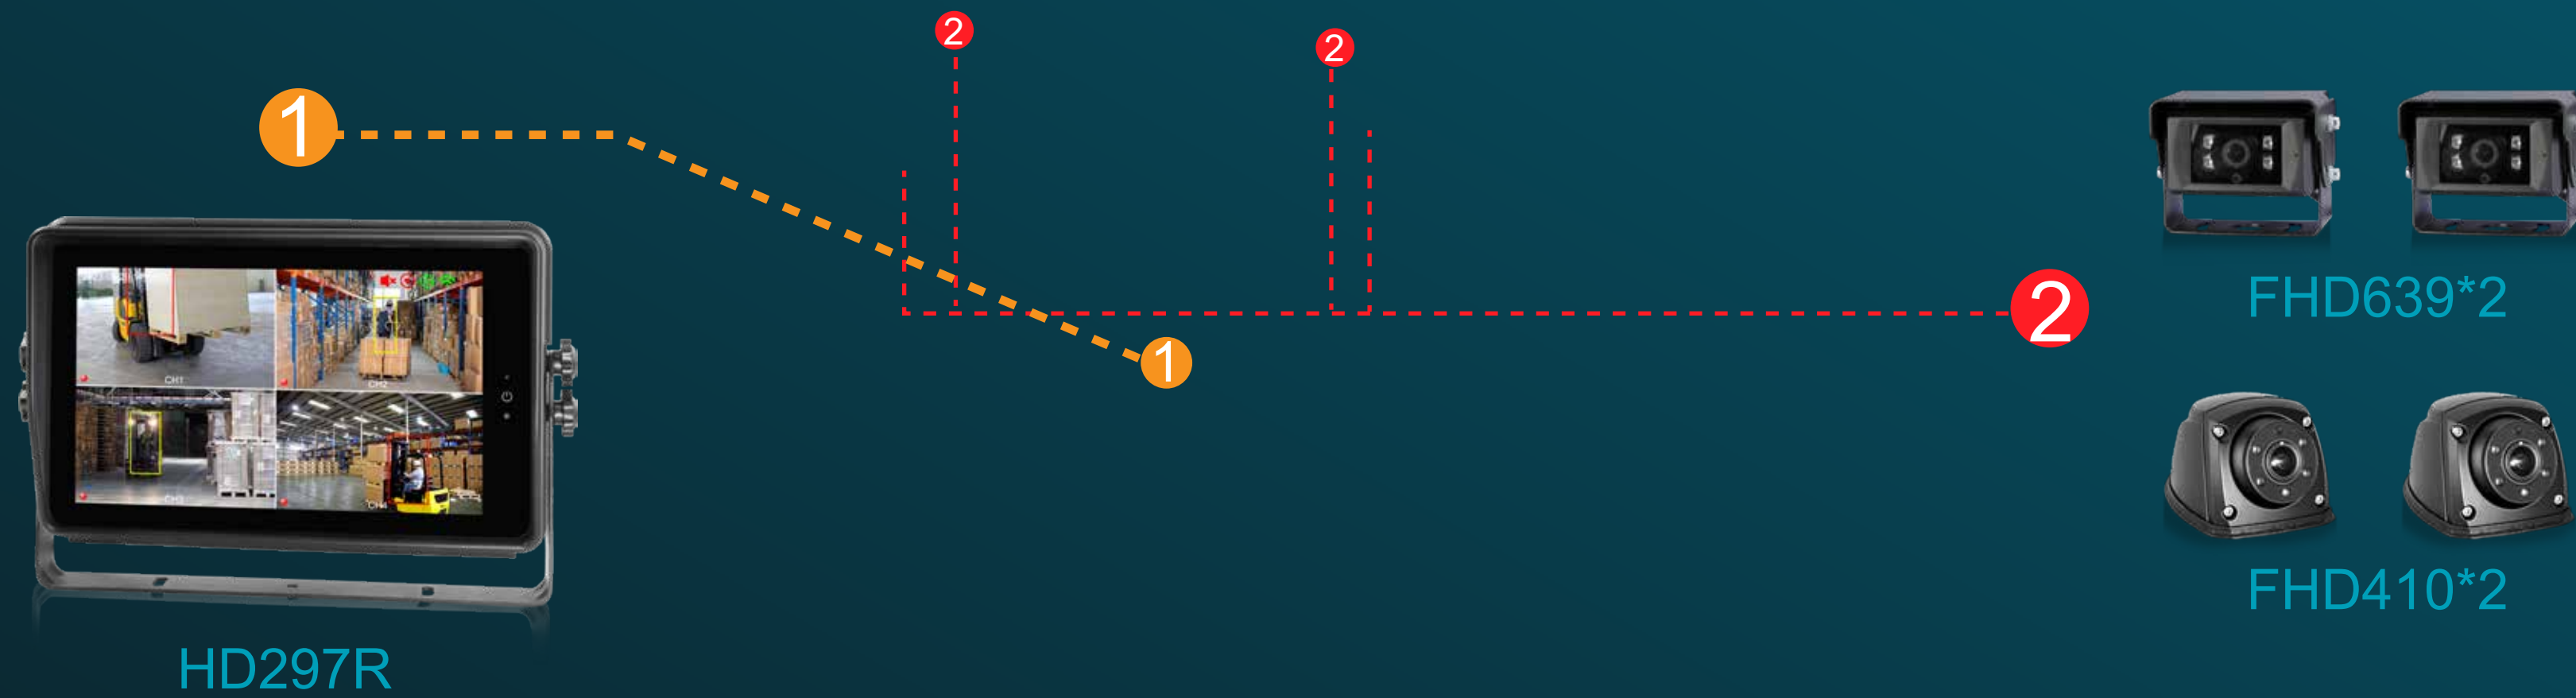

# Applications

STONKAM® 10.1-inch Pedestrian & Vehicle Detection & Early Warning Intelligent Vehicle Video Surveillance Monitor is a remarkable breakthrough in this field. It is powerful and adapts to a wide range of applications, for example trucks, buses, trailers, RVs, school buses, tractors, and even ships, etc., helping improve driving safety and operation efficiency.
