## What is AUTORIGIN doing?

AUTORIGIN meticulously attend to every detail in productions, matching to OEM inspection specifications, not only diaphragm spring detection, balance detection, comprehensive performance testing, anti-fatigue service life assessment, but also road performance checks and calibration drives in test vehicles. AUTORIGIN rigorously tests and monitors every critical aspect to consistently ensure premium performance for each component.

## Agricultural & Tractor Clutch

AUTORIGIN places a strong emphasis on 100% quality control for agricultural and tractor clutches across a wide range of models, ensuring optimal performance and the ability to withstand high levels of torque and power output.

## Medium and Heavy Duty Clutch

All clutches are designed on CAD systems to match original equipment specifications. The quality of AUTORIGIN products is the result of continuous improvement and development over many years. AUTORIGIN clutches allow you to tackle different driving environments and conditions, including high-speed driving, low-speed driving, uphill, downhill, etc. easily. No matter where you are globally, AUTORIGIN clutches are always available and dependable absolutely.

## Passenger Car Clutch

With features such as excellent wear resistance and effective reduction of noise, vibration, and harshness, AUTORIGIN clutches ensure smooth starts and secure driving experiences for users.
