- Rake wheel

“RIGHT CHOICE OF MATERIAL OFFERS
MORE ADVANTAGES,”

OUR MISSION IS TO

SERVE YOU BETTER

Balaji Springs specialize in the custom manufacture of wire springs, flat springs, wire products and machined components using different raw materials. We know choosing the right material can be challenging and is the most important aspect of the design. At Balaji We will assist you in picking the best material for your specific application, all at the right price. The most common used raw materials are :

- **EN 10270-1, COLD DRAWN SPRING WIRES- SM, SH and DH**

Used for general springs.

- **EN 10270-2 Oil tempered spring wire- FD and VD**

Used for higher tensile strength and improved lifetime, such as engine valve springs.

- **EN 10270-3, Stainless spring wires- W 1.4310 common, W.1.4401 acid resistant, and W.1.4568 heat resistant**

Used for high demands regarding corrosion.

We also work with diverse materials for industries with special requirements for their products Among other: oil and gas industry, food industry, and power generation plant where we working with some special materials.

“EXCELLENCE YOU CAN
TRUST,”
