# About US

Guangzhou Yupeng Auto Parts Co., Ltd. was established in 2002. The company has a long history and strong strength, covering an area of 5,000 square meters. It currently has the most advanced three sponge production lines in China and the most advanced cutting machine in Germany. The company has strong scientific research and technical strength and has passed the GMC international quality management system. Certification. Our company has been developing and producing auto beauty products for ten years. It is one of the oldest auto accessories manufacturers in China. Automobile beauty products with "OWLLIKE" registered trademark are famous for their high quality, low cost, novelty and practicality. Various types of polishing machines, car washing sponges, polishing balls, polishing discs, waxing sponges, polishing trays and other products are the first choice of professional wholesalers at home and abroad.

Our company specializes in producing lacquer polishing products, and produces sponge and wool polishing products. There are international top and general high-end materials, and there are complete sets of products for grinding, polishing and reduction according to the process. In accordance with the usage habits of various countries in the world and domestic, our factory also produces a variety of different types of polishing supplies. Customers with different needs choose to use, and at the same time welcome to provide customized OEM drawings and samples. At the same time, we have been tracking and applying technological development and the latest materials research and new achievements to ensure that the company's products maintain world-class standards. Products are exported all over the world.

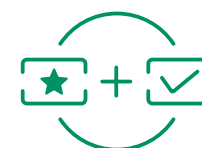

"Customer first, service first, integrity-based" is our business philosophy. Looking ahead, we expect to provide you with more sophisticated products, better quality, comprehensive services and the most affordable prices, based on the professional "polyurethane products" cradle, to create a sponge supermarket business model. And with your support and help to develop together with you, grow together and create a win-win situation !

## ***Icebreaking***

### **2007** We attended in the Canton Fair for the first time

We got the first foreign trade order in this exhibition, many types of products in this order were not completed by the own production equipment at that time. In order to complete this order, we independently developed modeling equipment, delivered the first container on time, earned the first bucket of gold, and the factory can also produce more models.

## ***Innovation***

### **2014** The DA Polishing System was officially launched

This is a new concept to subvert the global automotive finish polishing technology, perfect scheme, reasonable collocation, simple operation, so that 3 years of professional technology can be simplified into 10 minutes. We have also expanded from only manufacturing products to tailor-made solutions for global professional customers to meet the needs of different customers.

## ***SetSail***

### **2002** The factory was officially established

At that time, the factory area was only about 500 square meters, only one sponge polishing ball production machine and an old stamping machine, can only do the most common conventional products, mainly in the domestic market.

## ***Upgrade***

### **2008** The factory moved

The new factory has increased from 500 square meters to 1200 square meters. The equipment of the factory has also been upgraded and improved and increased simultaneously. Some international famous brands have started to cooperate with each other.

## ***Leap***

### **2014** To Present

The company continues to grow and expand, the factory has expanded to 5000 square meters, the old production equipment has been replaced by advanced automation equipment, won a lot of invention patents, utility model patents, independent research and development and design of products, novel design, perfect function, has been recognized and favored by professional customers at home and abroad.

# POLISHING MACHINE Series

Da

15

### Eccentricity 15°

- 1. High-quality pure copper durable motor
- 2. Optimized arm design, light weight, simple and portable
- 3. Easy to adjust the use of six gears
- 4. Metal gear box, longer service life
- 5. Full roller bearing to ensure more durable tools
- 6. Velcro tray, easier to replace accessories
- 7. Constant electronic function, effectively prevent overload
- 8. Strengthen coil and double insulation protection, effectively prevent dust

Da

21

### Eccentricity 21°

- 1. High-quality pure copper durable motor
- 2. Optimized arm design, light weight, simple and portable
- 3. Easy to adjust the use of six gears
- 4. Metal gear box, longer service life
- 5. Full roller bearing to ensure more durable tools
- 6. Velcro tray, easier to replace accessories
- 7. Constant electronic function, effectively prevent overload
- 8. Strengthen coil and double insulation protection, effectively prevent dust

### PRODUCT PARAMETER

Model	Da15	Da21
Bare Weight	2.5kg	2.5kg
Machine Size	470*105*80mm	
Power	900W	
no-load RPM	1800-4800 RPM/mins	
Decelerating Mechanism	Mechanical Double Stage	
Output Shaft Thread	M14	
Tray Diameter	148mm(6")	
Sponge Diameter	150mm(6")	
Accessories	Handle *1 / Set Screw *2 / Carbon Brush *2 / Hexagon Wrench *1	

#### Warm Tips :

Suitable for vehicle and local polishing, it is recommended to use 3"-6" sponge plate/wool plate to obtain the best performance, shall not be used for a long time at 1-2 gear low speed, so as to avoid overload or overheating.

# POLISHING MACHINE Series

## Da25

### Eccentricity 25°

- 1. High-quality pure copper durable motor
- 2. Optimized arm design, light weight, simple and portable
- 3. Easy to adjust the use of six gears
- 4. Metal gear box, longer service life
- 5. Full roller bearing to ensure more durable tools
- 6. Velcro tray, easier to replace accessories
- 7. Constant electronic function, effectively prevent overload
- 8. Strengthen coil and double insulation protection, effectively prevent dust

## RO

### ROTATE STRAIGHT

- 1. The fuselage is made of imported plastic, with low noise and low vibration
- 2. Comfortable handle design, easy installation, simple operation, improve polishing effect
- 3. The unique two-stage gear reduction mechanism is adopted to achieve the strong output torque of ordinary polishing machine with a compact design and prolong the service life
- 4. 1-6 gears adjustable speed, speed selection for different working conditions, differentiated polishing is more efficient
- 5. Dust-proof vents, easy heat dissipation, prevent burning, higher work efficiency
